PowerPoint was the first presentation software designed for Macintosh and Windows, received the first venture capital investment ever made by Apple, then became the first significant acquisition ever made by Microsoft, who set up a new Graphics Business Unit in Silicon Valley to develop it further. Now, twenty-five years later, PowerPoint is installed on more than one billion computers, worldwide. In this book, Robert Gaskins (who invented the idea, managed its design and development, and then headed the new Microsoft group) tells the story of its first years, recounting the perils and disasters narrowly evaded as a startup, dissecting the complexities of being the first distant development group in Microsoft, and explaining decisions and insights that enabled PowerPoint to become a lasting success well beyond its original business uses.

On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle taxi drivers, who slowed down, filtered, and severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged

a military coup, unopposed by protesters. How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? *Owners of the Map* provides answers to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio Sopranzetti explores the unresolved tensions in the drivers' everyday lives, their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis. Reconstructing the entanglements between their everyday mobility and political mobilization, Sopranzetti reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, *Owners of the Map* advances an analysis of power that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its potential fragility as well as the work needed for its maintenance.

The ability to bring new and innovative products to market rapidly is the prime critical competence for any successful consumer-driven company. All industries, especially automotive, are slashing product development lead times in the current hyper-competitive marketplace. This book is the first to thoroughly examine and analyze the truly effective product development methodology that has made Toyota the most forward-thinking company in the automotive industry. Winner of the 2007 Shingo Prize For Excellence In Manufacturing Research! In *The Toyota Product Development System: Integrating People, Process, and Technology*, James Morgan and Jeffrey Liker compare and contrast the world-class product development process of Toyota with that of a U.S. competitor. "A damning denunciation of things as they are, and a platform for how we can do better."—Andrew Leonard, Salon Building on the international bestseller *Globalization and Its Discontents*, Joseph E. Stiglitz offers here an agenda of inventive solutions to our most pressing economic, social, and environmental challenges, with each proposal guided by the fundamental insight that economic globalization continues to outpace both the political structures and the moral sensitivity required to ensure a just and sustainable world. As economic interdependence continues to gather the peoples of the world into a single community, it brings with it the need to think and act globally. This trenchant, intellectually powerful, and inspiring book is an invaluable step in that process.

## **Sweating Bullets**

How can we help poor people earn more from their knowledge rather than from their sweat and muscle alone? This book is about increasing the earnings of poor people in poor countries from their innovation, knowledge, and creative skills. Case studies look at the African music industry; traditional crafts and ways to prevent counterfeit crafts designs; the activities of fair trade organizations; biopiracy and the commercialization of ethnobotanical knowledge; the use of intellectual property laws and other tools to protect traditional knowledge. The contributors' motivation is sometimes to maintain the art and culture of poor people, but they recognize that except in a museum setting, no traditional skill can live on unless it has a viable market. Culture and commerce more often complement than conflict in the cases reviewed here. The book calls attention to the unwritten half of the World Trade Organization's Agreement on the Trade Related Aspects of Intellectual Property (TRIPS). TRIPS is about knowledge that industrial countries own, and which poor people buy. This book is about knowledge that poor people in poor countries generate and have to sell. It will be of interest to students and scholars of international trade and law, and to anyone with an interest in ways developing countries can find markets for cultural, intellectual, and traditional knowledge.
