The Daughters of Juarez

In this wickedly funny first novel-think Legally Blonde in Oxford-a young New York woman exchanges her corporate job for a year of books, blokes, beers, and new best friends in graduate school in England. Alexandra Brennan is fed up with her dead end New York City job-and even more fed up of running into her smug ex-boyfriend. So when he crosses the line by telling her that she'll never get into graduate school in the United Kingdom, that's precisely what she does. Armed with imported cigarettes and extra strength coffee, Alex leaves home and crosses the Atlantic to face all that Great Britain and grad school have to offer, including ill-considered romantic interludes, a red-headed nemesis with intellectual pretensions and ulterior motives, a preponderance of eighties music, and more books than she can possibly read in a year. What she discovers, however, is that instead of running away from home - she may have actually found it. With a cheeky sense of humor and terrific cast of characters, ENGLISH AS A SECOND LANGUAGE is a funny and irreverent novel about a young woman's misadventures on the path to adulthood.

Further, many of the most important names in late twentieth century biblical historiography appear as authors of various contributions: Hayes, Brettler, Van Seters, Miller, and de Vaux. In a work of more than 600 pages, Long finds room for thirty-two different writers. In addition to his concluding chapter, he also introduces each section and reprints an important essay of his own on history and literary

technique. Every reader, including those already conversant with the subject, will gain much from reading this book. However, some will also recognize gaps or areas that they wished had been highlighted. Despite the word, 'Recent,' one wonders why no samples of the writings of Wellhausen, and especially of Alt, Noth, and Albright are included. Although most of the essays date from the 1990's, Hans Walter Wolff's contribution comes from a 1963 volume.

The interbiblical period has been the focus of intensive scholarly study for many years, yet the fruits of this work often remain inaccessible to the theological student and minister. Robert L. Cate rectifies this situation, gathering and communicating the results of research in clear, readable prose. Cate argues persuasively that an understanding of the interbiblical period is crucial to those who are concerned with the development of Judaism, the life and ministry of Jesus, the historical setting for the New Testament's development, and the emergence of the church. He then introduces the reader to the people, geography, politics, religions, philosophies, and lifestyles that combine to make up the history of the Bible lands in the interbiblical period.

Neuroanatomy: Draw It to Know It, Third Edition teaches neuroanatomy in a purely kinesthetic way. In using this book, the reader draws each neuroanatomical pathway and structure, and in the process, creates memorable and reproducible schematics for the various learning points in Neuroanatomy in a hands-on, enjoyable and highly effective manner. In addition to this unique method, Neuroanatomy: Draw It to Know It also provides a remarkable repository of reference materials, including numerous anatomic and radiographic brain images and illustrations from many other classic texts to enhance the learning experience. In the third edition of this now-classic text, the author completely reorganized the book based on user-feedback, taking a more intuitive and easy-to-use approach. For the first time, the illustrations are in full color. No other text in neuroanatomy engages the reader in as direct a manner as this book and none covers the advanced level of detail found while retaining the simplistic approach to the learning which has become the cornerstone of the text. Neuroanatomy: Draw It to Know It is singular in its ability to engage and instruct without overwhelming any level of neuroanatomy student.

The Looking Glass House

"As an introduction to his own notoriously complex and challenging philosophy, Hegel recommended the sections on phenomenology and psychology from the

Philosophy of Spirit, the third part of his Encyclopaedia of the Philosophic Sciences. These offered the best introduction to his philosophic system [This book] makes it possible for the modern reader to approach the philosopher's work as he himself suggested. The book includes a fresh translation of "Phenomenology" and "Psychology," an extensive section-by-section commentary, and a sketch of the system to which this work is an introduction."--Provided by publisher.

Wellbeing and Quality of Life Assessment is a practical resource for people working in social or development policy and practice who are thinking about integrating wellbeing or quality of life in their work in both the global North and South. The main body of the book presents different tools that have been developed and used in social and development policy and practice, written by NGO professionals. These chapters outline the inspiration behind their approach, how it works, what has been learned through it, and issues and dilemmas that remain. Human development may encompass social, cultural and spiritual facets as well as economic improvement, and development organizations are beginning to recognize this fact. But building into programming a wider understanding of development throws up a number of questions: how do our organizations define wellbeing and quality of life? What do target communities in the global north or south mean by a quality of life? How can we measure change in wellbeing, and attribute it to our programming?

Oxford, 1862. Poor, plain Mary Prickett takes up her post as governess to the daughters of the Dean of Christ Church. When Mary meets Charles Dodgson, a friend of the family, she is flattered by his attentions and becomes convinced he plans to propose marriage. But it is also clear that he is drawn to the little girls in Mary's care, and on a boating trip one sunny day Mr Dodgson tells the story of Alice's Adventures in Wonderland a curious tale about the precocious Alice Liddell As Mary waits for her life to change, she becomes increasingly suspicious of Alice's friendship with Mr Dodgson. Before long, everything Mary believes is turned topsy-turvy, and her determination to get to the truth will have lasting consequences for all involved

About the Baby

Homespun humor about the way we live, from the pleasant futility of salmon fishing and the joys of Halloween, to quiet afternoons with soap opera families and endless nights in pursuit of trivia Tom Bodett, humorist, radio star, and pitchman for Motel 6, lives and writes in Homer, Alaska, the little town in the blue Northwest where America stops, carwise. "If you got into your car in New York," he says, "and wanted to take a nice long drive, I mean the longest drive you could without turning around or running into a foreign language, this is where you'd wind up." It's a place of moose and salmon and spectacular sunsets, but, Bodett insists, it's also small-town America, a place not all that different from the Michigan town of his youth. That's why he's made it his home: it perfectly suits his contrary appetites for the extreme and the everyday, for the rigors of the outdoor life and the mundane joys of the family circle. As Far As You Can Go Without a Passport, Bodett's first collection of casual essays, contains pieces on everything from trapping, tree cutting, and halibut fishing, to soap operas, lost socks, and sleeping in. It's guaranteed to please both the renegade and the homebody in every reader.

War, Terrible War

A History of the Bible Lands in the Interbiblical Period

Despite the fact that Juarez is a Mexican border city just across the Rio Grande from El Paso, Texas, most Americans are unaware that for more than twelve years this city has been the center of an epidemic of horrific crimes against women and girls, consisting of kidnappings, rape, mutilation, and murder, with most of the victims conforming to a specific profile: young, slender, and poor, fueling the premise that the murders are not random. Indeed, there has been much speculation that the killer or killers are American citizens. While some leading members of the American media have reported on the situation, prompting the U.S. government to send in top criminal profilers from the FBI, little real information about this international atrocity has emerged. According to Amnesty International, as of 2006 more than 400 bodies have been recovered, with hundreds still missing. As for who is behind the murders themselves, the answer remains unknown, although many have argued that the killings have become a sort of blood sport, due to the lawlessness of the city itself. Among the theories being considered are illegal trafficking in human organs, ritualistic satanic sacrifices, copycat killers, and a conspiracy between members of the powerful Juárez drug cartel and some corrupt Mexican officials who have turned a blind eye to the felonies, all the while lining their pockets with money drenched in blood. Despite numerous arrests over the last ten years, the murders continue to occur, with the killers growing bolder, dumping bodies in the city itself rather than on the outskirts of town, as was initially the case, indicating a possible growing and most alarming alliance of silence and cover-up by Mexican politicians. The Daughters of Juárez promises to be the first eye-opening, authoritative nonfiction work of its kind to examine the brutal killings and draw attention to these atrocities on the border. The end result will shock readers and become required reading on the subject for years to come.

The mainland and islands of Greece were extensively settled by peoples moving from Asia Minor in c.5000 BC, while a further wave in c.5000 BC introduced bronze-working to the region. It is from this point on that it is possible to discern a distinct Cycladic or Aegean civilisation, developing at roughly the same time as the Egyptian and Persian civilisations. Further to the south, the Minoan civilisation based on Crete held sway, and this power – along with the Helladic Achaeans to the north gradually swamped the Cycladic civilisation in between. In common with most Bronze Age societies, the culture of the Aegean world was dominated by warfare, with the inhabitants living in organized settlements and small citadels with fortification walls and bulwarks, towers and gates to provide protection

against invaders from the sea or internecine conflicts. Using the latest archaeological evidence, this title recreates the world of these peoples through a detailed examination of their material culture.

The contents of this book correspond to Sessions VII and VIII of the International Workshop on Instabilities and Nonequilibrium Structures which took place in Viña del Mar, Chile, in December 1997 and December 1999, respectively. Part I is devoted to self-contained courses. Three courses are related to new developments in Bose-Einstein condensation: the first one by Robert Graham studies the classical dynamics of excitations of Bose condensates in anisotropic traps, the second by Marc Etienne Brachet refers to the bifurcations arising in attractive Bose-Einstein condensates and superfluid helium and the third course by André Verbeure is a pedagogical introduction to the subject with special emphasis on first principles and rigorous results. Part I is completed by two courses given by Michel Moreau: the first one on diffusion limited reactions of particles with fluctuating activity and the second on the phase boundary dynamics in a one dimensional nonequilibrium lattice gas. Part II includes a selection of invited seminars at both Workshops.

The Saint Who Became Santa Claus

Two seasoned food professionals--one a cookbook editor and the other a caterer--match wits here to solve the kitchen dilemma of the '90s: how to serve imaginative, lively food without spending hours fussing or compromising on soul-satisfying flavor. Their solution is just to look to the great cooks--from Julia Child to James Beard to Diana Kennedy--for the simple dishes that are hidden away in even the most complicated cookbooks. They've assembled a treasury of superb recipes that depend on perfectly balanced flavors. The range is broad, from favorite American classics like spoon bread, corn fritters, and the only really delicious oven-fried chicken to exotic new tastes like Moghul Lamb, Bangkok Chicken, and Pasta with Vodka. For each recipe the editors offer tips, variations, suggestions, and down-to-earth commentaries about how to work with exciting new ingredients as well as giving their own tried-and-true favorite recipes, simple winners they've cooked for years to great applause. Altogether there are 119 master recipes with 81 variations and 34 Editors' Kitchen recipes, a true culinary gold mine. In their pursuit of the secrets of true flavor, Frances McCullough and Barbara Witt come up with some unusual approaches, rethinking some of our basic ideas about how to prepare roasted chicken and turkey (in a very hot oven), pasta (one method lets it sit in hot water off the flame), and baking potatoes (they're particularly wonderful baked to death). Here you'll find a lot of nitty-gritty information about entertaining, a refresher course on how to make a really good green salad, lists of canapes and tidbit desserts, a collection of quick breads, and microwave notes. In a warm, intimate, encouragingly frank style, McCullough and Witt constantly encourage cooks to improvise by offering a range of variations, to start them experimenting with foods and flavors to develop their own recipes. This is a unique, user-friendly book that works for beginners who are reasonably sophisticated eaters as well as for experienced cooks. It will become the contemporary cook's favorite sourcebook

for distinctive food.

Healthcare leaders around the world are facing tough challenges, including the need to deliver better value for patients and payers, which means improving quality while reducing cost. It might seem impossible to do both, but organizations around the world are proving it's possible, through Lean. Health systems are able to enhance all dimensions of patient care, including both safety and service, while creating more engaging and less frustrating workplaces for healthcare professionals and staff all leading to improved long-term financial performance. Building on the success of the first two editions of this Shingo Prize-Winning book, *Lean Hospitals: Improving Quality, Patient Safety, and Employee Engagement, Third Edition* explains how to use the Lean philosophy and management system to improve safety, quality, access, and morale while reducing costs. Lean healthcare expert Mark Graban examines the challenges facing today's health systems, including rising costs, falling reimbursement rates or budget constraints, employee retention, and harm to patients. The new edition of this international bestseller (translated into eight languages) begins with an overview of Lean methods and mindsets. It explains how engaging staff and leaders in Lean practices such as

value stream mapping and process observation can help reduce wasted motion for caregivers, prevent delays for patients, and improve the long-term health of your organization. In addition to a new introduction from John Toussaint, this updated edition includes: New and updated material on identifying waste, A3 problem solving, employee idea management, kanban for materials management, and strategy deployment New case studies and examples—including a new 5S case study (Franciscan St. Francis Health) and other case examples highlighting the challenges and successes of an academic medical center and a small urgent access hospital, featuring quotes and stories from executives New examples and updated data throughout, including revised chapters on patient safety and patient flow challenges and the improvements driven by Lean Detailing the mindsets and methods needed for a successful transition to a Lean culture, the book provides the understanding of Lean practices—including value stream mapping, standardized work, error proofing, root cause problem solving, and daily improvement processes—needed to reduce common hospital errors and improve performance in other dimensions. The balanced approach outlined in this book will guide you through the process of improving the quality of care and service while reducing costs in your hospital. *The Lean Certification and Oversight Appeals committee has approved Lean Hospitals as recommended reading for those in pursuit of Lean Bronze Certification from SME, AME, Shingo Prize, and ASQ

Business in North Korea: a paradoxical and fascinating situation is interpreted by a true insider. In 2002, the Swiss power company ABB appointed Felix Abt its country director for North Korea. The Swiss Entrepreneur lived and worked in North Korea for seven years, one of the few foreign businessmen there. After the experience, Abt felt compelled to write *A Capitalist in North Korea* to describe the multifaceted society he encountered. North Korea, at the time, was heavily sanctioned by the UN which made it extremely difficult to do business. Yet he discovered that it was a place where plastic surgery and South Korean TV dramas were wildly popular and where he rarely needed to walk more than a block to grab a quick hamburger. He was closely monitored and once faced accusations of spying, yet he learned that young North Koreans are hopeful—signing up for business courses in anticipation of a brighter, more open, future. In *A Capitalist in North Korea*, Abt shares these and many other unusual facts and insights about one of the world's most secretive nations.

Evidence-based care is a well established principle in contemporary healthcare and a world wide health care movement. However, despite the emphasis on promoting evidence-based or effective care without the unnecessary use of technologies and drugs, intervention rates in childbirth are rising rapidly. Evidence-based Care for Normal Labour and Birth brings to light much of the evidence around what works best for normal birth which has, until now, remained largely hidden and ignored by

maternity care professionals. Beginning with the decision about where to have a baby, through all the phases of labour to the immediate post-birth period, it systematically details research and other evidence sources that endorse a low intervention approach. The book: highlights where the evidence is compelling discusses its application where women question its relevance to them and where the practitioner's expertise leads them to challenge it gives background and context before discussing the research to date includes questions for reflection and practice recommendations generated from the evidence. Using research data, Evidence-based Care for Normal Labour and Birth critiques institutionalised, scientifically managed birth and endorses a more humane midwifery-led model. Packed with up-to-date and relevant information, this controversial book will help all students, practising midwives and doulas keep abreast of the evidence surrounding normal birth and ensure their practice takes full advantage of it.

"This work illustrates how domestic competition law policies intersect with the realities of international business. The first part of the book provides country reports explaining the extraterritorial reach of national laws; the countries covered are: Australia, Brazil, Canada, China, the EC, Israel, Japan, Singapore, and the United States. The second part of the book offers several proposals for effectively managing these overlapping competition policy regimes--by the publisher."

This collection of research papers is dedicated to the memory of the distinguished algebraist Robert B. Warfield, Jr. Focusing on abelian group theory and noncommutative ring theory, the book covers a wide range of topics reflecting Warfield's interests and includes two articles surveying his contributions to mathematics. Because the articles have been refereed to high standards and will not appear elsewhere, this volume is indispensable to any researcher in noncommutative ring theory or abelian group theory. With papers by some of the major leaders in the field, this book will also be important to anyone interested in these areas, as it provides an overview of current research directions.

The images literally jump out at you and give the impression that the people of Afghanistan are long-suffering and stoic, but also cautiously optimistic about their future. The book also touches on the interaction of U.S. Marines with Afghan people and includes some focus on the Marine advisory mission to assist the Afghan National Army (ANA) in becoming a self-sufficient military force. As the photographs demonstrate, this particular mission continues to be a difficult task. Nonetheless, like their "cautiously optimistic" counterparts in the ANA, it is also evident that the Marines believe that their mission will ultimately succeed in Afghanistan and the day will eventually come when U.S. forces can leave the region and Afghanistan will be free from the terror of a violent enemy. Lieutenant Colonel Benhoff is an intelligence officer and deployed to Afghanistan while serving with us as a field historian for the Marine Corps History Division.

Great Food Without Fuss

The beginning of the eighteenth century opened Spain to an influx of people, books and ideas and gave the country its own brief age of Enlightenment. At this time of momentous change, the three authors represented in this volume contributed to the Europe-wide debate over the nature of women and their position in society. Benito Jerónimo Feijoo was an admired scholar and a prolific author. One of his most controversial essays was *Defence of Women*, which argued that women were men's intellectual equals. This sparked a pamphlet war that continued for twenty-five years. Josefa Amar y Borbón was a writer and translator who submitted her own spirited argument, the *Defence of the Talents of Women*, to a debate on whether women should be admitted to the new Economic Societies. She also demanded in her *Discourse on the Education of Women* that women should be given the opportunity to study and learn. At the very end of the century, Inés Joyes y Blake published an *Apology for Women*, arguing that women should develop self-respect, support each other and refuse to be manipulated by insincere lovers and domineering husbands. All three writers wrote with verve and imagination about one of the most important social questions of their day
