"The Science of Wine does an outstanding job of integrating 'hard' science about wine with the emotional aspects that make wine appealing."--Patrick J. Mahaney, former senior Vice President for wine quality at Robert Mondavi Winery "Jamie Goode is a rarity in the wine world: a trained scientist who can explain complicated subjects without dumbing them down or coming over like a pointy head. It also helps that he's a terrific writer with a real passion for his subject."--Tim Atkin MW, The Observer

California is the nation's great vineyard, supplying grapes for most of the wine produced in the United States. The state is home to more than 700 wineries, and California's premier wines are recognized throughout the world. But until now there has been no comprehensive guide to California wine and winemaking. Charles L. Sullivan's *A Companion to California Wine* admirably fills that gap—here is the reference work for consumers, wine writers, producers, and scholars. Sullivan's encyclopedic handbook traces the Golden State's wine industry from its mission period and Gold Rush origins down to last year's planting and vintage statistics. All aspects of wine are included, and wine production from vine propagation to

bottling is described in straightforward language. There are entries for some 750 wineries, both historical and contemporary; for more than 100 wine grape varieties, from Aleatico to Zinfandel; and for wine types from claret to vermouth—all given in a historical context. In the book's foreword the doyen of wine writers, Hugh Johnson, tells of his own forty-year appreciation of California wine and its history. "Charles Sullivan's Companion," he adds, "will provide the grist for debate, speculation, and reminiscence from now on. With admirable dispassion he sets before us just what has happened in the plot so far."

### **Amber Revolution**

Winner of the Gourmand Wine Books prize for 'Best Drinks Writing Book' in the UK A fascinating journey through ancient wine country that reveals the drinking habits of early Christians, from Abraham to Jesus. Wine connoisseur Joel Butler teamed up with biblical historian Randall Heskett for a remarkable adventure that travels the biblical wine trail in order to understand what kinds of wines people were drinking 2,000 to 3,500 years ago. Along the way, they discover the origins of wine, unpack the myth of Shiraz, and learn the secrets of how wine infiltrated the biblical world. This fascinating narrative is full of astounding facts that any wine lover can take to their next tasting, including the myths of the Phoenician, Greek, Roman, and Jewish wine gods, the emergence of kosher wine, as well as the use of wine in sacrifices and other rites. It will also take a close a look at contemporary modern

### **Over the Deep**

The Rawlings men have always had a close association with the police force. Those who don't become policemen themselves have always flocked toward related professions. The family is full of forensic psychologists, scene of crime officers and police advisers. And as for those rare Rawlings men who have no interest in maintaining law and order - they can still appreciate a man in uniform, and a finely crafted pair of handcuffs! This volume contains the first four stories in the series: In Handcuffs and Leather, Dr. Rawlings wants nothing more than to help Constable Hadley overcome a traumatic event endured while on the job. Nothing, perhaps, except to teach the younger man what dominance and submission are really about. Hadley's about to find out what it's like to be restrained by a lover rather than a criminal. In Handcuffs and Glory Holes, Sergeant Conrad Rawlings discovers that even hiding behind a glory holes can't stop him coming face to face with a submissive in need. When he catches sight of Willis, as they exit neighboring cubicles, what was supposed to be a fleeting hook up quickly becomes far more. In Handcuffs and Headlocks, undercover police officer Ed Rawlings has become so good at playing pretend he's finding it increasingly difficult to return to reality and remember who he really is. Can martial arts instructor Derby Fitzgerald remind Ed

how good it feels to be himself? In Handcuffs and Trouble, Trent Rawlings has just joined the force. He isn't surprised to find himself being hazed. He's content to play along and take it in good grace. Kieran Osmond, however, is furious to find a newbie stumbling into his undercover operation. He has no choice but to rescue Trent, but he has no idea how much trouble that will lead to.

### **Ecstasy**

Everyone remembers their first love. For me he was the one that swept me off my feet with just a look and showed me just how bad it hurts to have a broken heart. Luke was many years older than me and a player. His idea of a good time was seeing how many women he could get to fall into his bed. Needless to say my heart wasn't the only one broken by him. Years after he drifted out of my life I still ached for him. I'm not even sure you could call what I was doing living after he left. But time continued to move on. I grew up, got a college degree, and moved to the big city to escape my life along with the memories of him. Fates a real bitch though. Just when I thought I could finally forget the lover who'd destroyed my soul, I walked head first into his den. I'm a journalist now, and my first assignment? Covering the opening of Luke's new tattoo parlor. Like I said, fate. One look into his blue eyes and I'm remembering drinking strawberry wine and falling into his bed ready to forget how easily he walked out of my life. My only sanity? My best friend and roommate, Jake. He's that guy that you can always depend on, the one you

## Online Library Authentic Wine Toward Natural And Sustainable Winemaking By Jamie Goode Sep 15 2011

have to call your friend because he's just too sweet to be anything else. There was no doubt I was going to end up sleeping with Luke, the only question was could Jake save me from myself when he broke my heart again. Love wasn't really what I felt for Luke. Obsession would be closer to the real truth. I know he's the worst thing that could ever happen in my life but he was like chocolate. Once you get a taste you don't care how bad it is for you, you've got to indulge.

### **The Goode Guide to Wine**

You can't truly be in love unless you are emotionally honest with your partner. Your partner may not even know the real you-only the version of you that you use as a shield. "Goode and Harrop are terroirists determined to protect and preserve wine as a unique part of civilized life. Authentic Wine is both stirring manifesto and a reasoned, practical guide. Vive les terroirists!"—Mike Veseth, author of *Wine Wars: The Curse of the Blue Nun, the Miracle of Two Buck Chuck and the Revenge of the Terroirists* "Jamie Goode is a rarity in the wine world: a trained scientist who can explain complicated subjects without dumbing them down or coming over like a pointy head. It also helps that he's a terrific writer with a real passion for his subject."—Tim Atkin MW "It is not surprising that wine often stimulates the flow of bile - often exchanged between highly opinionated groups of wine writers, drinkers and kibbitzers, each with a different aesthetic and ideology. This book by Jamie Goode and Sam Harrop mounts a passionate defense of "natural wine" from an utterly rational perspective. They make the case that we must choose to grow grapes and make wines in a natural way, allowing the wines to achieve the greatest expression of individuality, lest we drown in an a wine-dark (possibly over-extracted) sea of sameness."--Randall Grahm, author of *Been Doon So Long* "Praise for Jamie Goode's *The Science of Wine*": "Mr. Goode has written one of the most enlightening and clearheaded wine books to appear in years. This is a wine book you'll actually read and reread."--Matt Kramer, *New York Sun* "Lively and provocative."--Eric Asimov, *New York Times* "Goode's readable prose makes even the most technical subjects accessible. For anyone interested in more than just drinking wine, this is a must read." *Wine Enthusiast*

## **Fuckery**

A must-have volume for all wine lovers and especially those who love orange wine. Written by renowned orange wine expert and award winning writer Simon J. Woolf, *Amber Revolution* is the world's first book to tell the full, forgotten story of this ancient wine (white wine made like a red wine) and its modern struggle to gain acceptance. It is a tale of lost identity, the fight for survival, and pioneering winemakers from the Caucasus to the Adriatic. White grapes are left in contact with their skins for days, weeks or months during fermentation, creating stunning complexity, unusual aromas and intense flavors. The extended skin contact gives these wines bold amber, russet, or orange tints. The technique is ancient, but the hype is new and fast growing. This book includes profiles of 180 of the best producers from 20 countries worldwide and is crammed full of all the information you need to find the best orange wines worldwide together with tips for how to

buy, enjoy, food-match and age them. Beautifully illustrated with over 150 specially commissioned photos, Amber Revolution is an essential reference work for any wine lover, sommelier, retailer or producer who loves orange wine.

A compass is a very helpful tool-as long as its wielder knows the direction he wants to go. This wasn't often the case in the sixties in America, when many felt directionless, with an unpopular war that had the country's moral compass spinning. "Hope Points North" is a coming-of-age experience that takes place on Long Island during this turbulent period. Of the three boys, Chris McKellar is the conventional one of the group-the glue that binds the troubled Teddy and smart, introverted Charlie together. The story is Chris's adult recollection of the time when he, Teddy, and Charlie decide to travel on their own to Grumman Aerospace Company, the builders of the Lunar Excursion Model-the craft that will eventually deliver man to the moon. Just as the boys embark on their journey, the dark-hearted preacher Lovejoy ambushes them. Teddy's grandpa has amassed a secret fortune, but it's no secret to Lovejoy, who is seducing Teddy's mother and will do anything to get the money. But the boys resist the preacher's attack in a way that leaves him dead in the creek or so they think. In shock, they follow their compass, toward the fraternity of hopes, dreams and, unsuspectingly, manhood.

Smith, a leading innovator in red wine production techniques, explains how traditional enological education has led many winemakers astray—enabling them to create competent, consistent wines while putting exceptional wines of structure and mystery beyond their grasp. Could cow horns, vortexes, and the words of a prophet named Rudolf Steiner hold the key to producing the most alluring wines in the world--and to saving the planet? In *Voodoo Vintners* wine writer Katherine Cole reveals the mysteries of biodynamic winegrowing and explores its practice on Oregon vineyards. Cole's story of biodynamic winegrowing starts on the back of a motorcycle in Persia and ends on a farm where the work is done by draft horses, chickens, and goats. It is a tradition that can be traced from Paleolithic times to the finest domaines in Burgundy today. At the epicenter of the American biodynamic revolution are the Oregon vintners who believe that this spiritual style of farming results in the truest translations of terroir and the purest pinot noirs possible. Cole introduces these "voodoo vintners" of Oregon, revealing why the need to farm biodynamically courses through their blood and examining their motivations and rationalizations. *Voodoo Vintners* answers the call of oenophiles everywhere for more information about this "beyond organic" style of farming. Cole's engaging narrative is a must-read for anyone interested in wine, sustainable agriculture, or the food movement.

### **Authentic Wine**

When the girl of his dreams appears on Christopher's doorstep, it seems to be the

answer to a prayer; but it is really the beginning of a nightmare. She is in trouble. No doubt. It wouldn't be the first time, but this is something different, something she hasn't been able to smile or talk her way out of, something ugly, something likely to follow. There is a predator out there and she is the prey. When she disappears, Christopher must go looking for her. The search takes him into the catacombs beneath the Capitol where he finds remnants of Washington's most notorious flesh-peddlers and must face his greatest fears, battling the massive man who has taken his love and will do anything to get back what she has taken from him. Beneath this storyline is another level of meaning, both philosophical and scientific. In nature most creatures are phototactic, meaning they move toward or away from the light. The extremes are the moth and the cockroach. One is drawn to the light. The other hides from the light and seeks the deepest part of the night. The structure of this novel is based on the developmental stages of the moth and the comparison of men to moths. Man's distinction, of course, is that we can choose. The second structural element is provided by Virgil's Aeneid. These words are carved on an arch at the entrance to the catacombs beneath the Capitol. *Facilis descensus Averno* - The way down to Hell is easy. While it is not reflected there, the passage continues: *Hoc opus, hic labor est.* - The path out of Hell is hard.

## **Empower the Lion Within**

"Wine is made in the vineyard" is the mantra of many a winemaker. But what does it mean, really? Esteemed winemaker and biodynamic pioneer Nicholas Joly believes a wine that is well-made in the vineyard must express its unique terroir—the character imbued by a vine's particular plot of well-tended earth. In *Biodynamic Wine, Demystified*, Joly shares the core philosophy behind biodynamic viticulture and why such practices result in wines of regional distinction. This process treats the vineyard as a self-perpetuating ecological whole influenced not only by terrestrial forces but those of the sun, moon and cosmos. He explains why the use of foreign substances such as pesticides and fertilizers in the vineyard, and aromatic yeasts and enzymes in the cellar, as well as mechanisms such as electric motors and pumps, disrupt this synergy and are ultimately counterproductive to a wine's best, consistent expression.

Premodern Ecologies in the Modern Literary Imagination explores how the cognitive and physical landscapes in which scholars conduct research, write, and teach have shaped their understandings of medieval and Renaissance English literary "oecologies." The collection strives to practice what Ursula K. Heise calls "eco-cosmopolitanism," a method that imagines forms of local environmentalism as a defense against the interventions of open-market global networks. It also expands the idea's possibilities and identifies its limitations through critical studies of premodern texts, artefacts, and environmental history. The essays connect real environments and their imaginative (re)creations and affirm the urgency of reorienting humanity's responsiveness to, and responsibility for, the historical links between human and non-human existence. The discussion of ways in which meditation on scholarly place and time can deepen ecocritical work offers an innovative and engaging approach that will appeal to both ecocritics generally and to medieval and early modern scholars.

Closing his eyes against the dark, he stretched his mind. He'd done . . . something . . . last . . . night? It didn't matter when. What was it he'd done? He tried again to call it to mind, pressing against the blankness in his thoughts. Breathing was part of it; patterned breathing. Which reminded him that holding his breath wouldn't help. The concept of terroir is one of the most celebrated and controversial subjects in wine today. Most will agree that well-made wine has the capacity to express “somewhereness,” a set of consistent aromatics, flavors, or textures that amount to a signature expression of place. But for every advocate there is a skeptic, and for every writer singing praises related to terroir there is a study or a detractor seeking to debunk terroir as a myth. *Wine and Place* examines terroir using a multitude of voices and multiple points of view—from science to literature, from winemakers to wine critics—seeking not to prove its veracity but to explore its pros, its cons, and its other aspects. This comprehensive anthology lets the reader come to one's own conclusion about terroir.
