Moto-journalist Clement Salvadori has been riding motorcycles since the age of 15 and traveling all of his life, accumulating well over a million miles in the saddle across more than 70 countries on six continents. No Thru Road covers 30 different trips he has taken, to places like Afghanistan and Zimbabwe, since his first ride through western Europe in 1957. The stories are all original, though the subject may have appeared as a magazine article in a very different rendition. The book will appeal to adventure-travel enthusiasts and to motorcyclists and travelers of all persuasions. Adventurous riders will thoroughly appreciate the book, as in the description of kick-starting a 500cc single - never easy to do - at 17,200 feet in the Tibetan Himalayas. Or going up to Cape Tribulation in Australia's Queensland in 1974 when the only access was via a once-a-week ferry across the Daintree River. Or riding a bike to Pamplona, Spain, in 1960 in order to run with the bulls. Activists who want to get on their motorcycles and ride down into Mexico's Copper Canyon will enjoy the book, as will the arm-chair traveler who is happy reading about traveling from Peru's Great Ica Desert over the Andes Mountains to the Amazon basin. Clement's adventures are arranged so the reader can open the book to any chapter, be it India, Nepal, the Sahara, New Zealand or Viet Nam, and not have to worry about following a thread. Lots of adventures, lots of good reading, lots of photos and illustrations. This book promises excellent entertainment and a glimpse into life as a moto-journalist.

BMW 2-Valve Twins 1970-1996

Traces the author's Pacific Coast motorcycle trek from Alaska to the far end of Argentina, a journey during which she shared whimsical misadventures with a series of fellow bikers, bribed her way through Central America, and spent a night in a Mexican brothel. 20,000 first printing.

From the bestselling author of *The Radical Leap* and *Greater Than Yourself* comes the first book to directly address love as a hard-core business principle that generates measurable results. It's time to toss aside the touchy-feely notions of love in business and acknowledge the real power that it holds. Love is not only appropriate in the context of business, it's the foundation of great leadership. To put it bluntly: love is just damn good business. That's the simple but profound truth that leadership consultant Steve Farber has discovered in his extensive work with Fortune 100 companies and other successful businesses. His game-changing approach to love as a practical business strategy will help you to:

- Identify your passions—and share them with others
- Create a culture of love at work—and spark innovation, productivity, and joy
- Serve your customers, so they love how you treat them—and have them coming back for more
- Invest time in making personal connections—that are mutually rewarding
- Focus on serving the needs of others—they're going to love it
- Do what you love—and make it your business, so others love it, too

The proven principles you'll find in this book will help you lay the groundwork for a thriving, competitive enterprise. When love is part of your organization's framework and operationalized in its culture, employees and customers feel genuinely valued. Employees who are passionate about the work that they do are more loyal, innovative, creative, and inspired, and that translates to great customer experience. They don't serve others out of obligation, but

because of a genuine desire to improve people's lives. And when customers reciprocate by loving your products, your services, and your people, that's when something great happens. That's when you get loyalty. That's when you get raving fans. It's a refreshingly human way of doing business. In addition to Farber's field-tested strategies, you'll find inspiring case studies from a wide range of industries and leaders, revealing self-assessment quizzes, and practical pointers on how to build a corporate culture based on love, the ultimate competitive advantage. At the end of the day, it's just damn good business.

Active volcanoes, glaciers, rivers without bridges and killer sheep - Iceland offers the kind of riding that motorcycle adventure dreams are made of. Ignoring the lack of off road skills in one half of the partnership, Patrick and Sherrie set off on a 6 week journey from Germany to Iceland and back in the summer of 2010. Riding their two BMW F 650 GS (Betty and Wilma) they fell in love with the island and its stunning scenery. Surviving hospitalization, sand, sunk bikes and perhaps most frightening of all, lack of good affordable food, Iceland stole a piece of both their

"A witty, engaging narrative style...[Robb's] approach is particularly engrossing."
—New York Times Book Review A narrative of exploration—full of strange landscapes and even stranger inhabitants—that explains the enduring fascination of France. While Gustave Eiffel was changing the skyline of Paris, large parts of France were still terra incognita. Even in the age of railways and newspapers, France was a land of ancient tribal divisions, prehistoric communication networks, and pre-Christian beliefs. French itself was a minority language. Graham Robb

describes that unknown world in arresting narrative detail. He recounts the epic journeys of mapmakers, scientists, soldiers, administrators, and intrepid tourists, of itinerant workers, pilgrims, and herdsman with their millions of migratory domestic animals. We learn how France was explored, charted, and colonized, and how the imperial influence of Paris was gradually extended throughout a kingdom of isolated towns and villages. The Discovery of France explains how the modern nation came to be and how poorly understood that nation still is today. Above all, it shows how much of France—past and present—remains to be discovered. A New York Times Notable Book, Publishers Weekly Best Book, Slate Best Book, and Booklist Editor's Choice.

Back in 2010, a new custom motorcycles scene was born in Europe. Hugo Jézégabel and Fred Jourden both decided to quit their salaried lives, Hugo as a landscape designer and Fred as head of marketing for an online company by day and a mechanic by night. Together they created the Paris-based garage 'Blitz Motorcycles', dreaming of building beautiful and unique custom motorcycles only upon commission. This book charts their journey and incarnates their global philosophy. Featuring the most iconic pictures of their adventure, it reveals both the motorcycles they've built and the road trips they've undertaken, amid the backdrop of the most incredible scenery Europe has to offer.

Recent statistics show that approximately 12 percent of motorcycle owners are women and that close to 25 percent of motorcycle riders are women. While it's still a male-dominated field, the number of female bikers has increased by more than 25 percent in just five years, showing that women have a strong presence on two wheels. In *The Women's Guide to Motorcycling*, author Lynda Lahman, herself a motorcycle owner and rider, provides a comprehensive look at motorcycling techniques, street smarts, and safety concerns while addressing female-specific challenges as well as issues that all bikers face from a female point of view. **INSIDE** *The Women's Guide to Motorcycling* Anecdotes from female motorcycle enthusiasts, riders, and owners, including the author's own story Women as a growing presence among riders, including notable names of the past and present Motorcycle skills from basic to advanced, appropriate for bikers of all levels of experience and expertise The physical and mental aspects of riding Considerations for choosing a bike, such as seat height and weight distribution, and female-appropriate gear A primer on proper maintenance and dealing with mechanical problems Different types of riding, such as sport, racing, touring, long distance, and off road Getting more out of the sport through involvement in clubs, forums, charity events, and mentoring new riders

Riding in the Zone

Ever since Max Friz first mounted his innovative M2B32 opposed-twin engine in a motorcycle frame in 1923, the history of BMW motorcycles has been defined by a constant and relentless quest for perfection. In the 95 years that have followed, the company has created the most innovative and technologically advanced motorcycles produced anywhere on earth. BMW has earned a reputation for not doing things the way everyone else does, but its motorcycles aren't different simply for the sake of being different. Each distinctive feature represents a brilliant and elegant solution to a real problem, leading BMW to be the first company to introduce many of the features that were later adopted by other manufacturers. But there's more to a BMW motorcycle than innovation and technology—there's

also art. And as beautiful as the bikes are in their totality, they may be even more so when broken down into their individual details. This book captures the elegance of these amazing machines, both in their details and in the sum of their parts, through the masterful photography of Henry von Wartenberg and writing of author Peter Gantriis. The Art of BMW: Ninety Years of Motorcycling Excellence features the Peter Nettesheim collection, one of the world's premier collections of BMW motorcycles. These wonderfully restored pieces exemplify the design and engineering prowess that have defined the BMW motorcycle tradition for almost a century.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Suspension is probably the most misunderstood aspect of motorcycle performance. kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and was well travelled. But nothing could prepare her for what lay ahead. When she returned to London nearly two and a half years later she was stones lighter and decades wiser. She'd ridden through unforgiving landscapes and countries ravaged by war, witnessed civil uprisings that forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily available and reliable maps, Elspeth achieved something that would still seem remarkable today. Told with honesty and wit, this is the extraordinary and moving story of a unique and life-changing adventure.

Allan looked forks in the road of his life as an opportunity to both follow a life-long dream and pursue his passions. He hopped on his motorcycle and traveled around the world. After three years and 62,000 miles of riding, through 35 countries on five continents, he returned home only to set out on another journey--to share the truths he'd uncovered and the lessons learned during his adventure around the world. Between these pages, Allan shares the discoveries, cultures, and connections he made on this global adventure.
