We all love stories--whether printed, passed down orally from generation to

generation, or made into films. We love stories whether they are fictional, true, mythical, or legendary. Stories are part of our human history, and they help us understand being human. But there is one story that underpins all other stories--the story of why we exist. All great human stories must interact with this story. His Story explores this fundamental story by retelling the story of the Bible. His Story tells the Biblical story of how God has opened up a doorway into our universe and how this impacts the metanarrative of all of our lives. If you want to read the overarching story of the Bible in one short book, then His Story is for you. If you want to know the backstory of your life, His Story is for you. His Story is simply written, but doesn't oversimplify. It is a book for people who might call themselves Christians, but also for all those who are curious about the ultimate story. His Story--the story of why we are here.

In mid-December of 1989, two American journalists arrive in Panama, just three days before U.S. President George Bush ordered a massive American invasion of Panama. During their stay in a secret hideaway known as the Kondor Club, the two journalists interview several old German flyers who have asked them to write a book about their secret mission to Panama 48 years before. This mission, code named Operation Dove, was conceived by none other than Field Marshal Hermann Goering, who had long dreamed of seizing the Panama Canal in the event of war

between Germany and the United States. Just three days after the Japanese attacked Pearl Harbor, four huge Luftwaffe flying boats called the Kondor K-II took off from a secret base in Bavaria. The flying boats were almost as large as the famous American Spruce Goose and each carried 300 German paratrooper commandos known as the Brandenburgers. Their destination: the Panama Locks. Aeronautical engineers, World War II history buffs, and most anyone who likes adventure stories should be fascinated by the mission maps and the detailed drawings of the huge secret Kondor K-II flying boats-all drawn by the author.

In the spring of 2013 the cicadas in the Northeastern United States will yet again emerge from their seventeen-year cycle—the longest gestation period of any animal. Those who experience this great sonic invasion compare their sense of wonder to the arrival of a comet or a solar eclipse. This unending rhythmic cycle is just one unique example of how the pulse and noise of insects has taught humans the meaning of rhythm, from the whirr of a cricket's wings to this unfathomable and exact seventeen-year beat. In listening to cicadas, as well as other humming, clicking, and thrumming insects, *Bug Music* is the first book to consider the radical notion that we humans got our idea of rhythm, synchronization, and dance from the world of insect sounds that surrounded our species over the millions of years over which we evolved. Completing the trilogy he began with *Why Birds Sing* and *Thousand Mile Song*, David Rothenberg explores a unique part of our relationship with nature and sound—the music of insects that has provided a soundtrack for humanity throughout the history of our species. *Bug Music* continues Rothenberg's in-depth research and spirited writing on the relationship between human and

animal music, and it follows him as he explores insect influences in classical and modern music, plays his saxophone with crickets and other insects, and confers with researchers and scientists nationwide. This engaging and thought-provoking book challenges our understanding of our place in nature and our relationship to the creatures surrounding us, and makes a passionate case for the interconnectedness of species.

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

His Story

A thought-provoking, chilling, and eerily prescient look at “prepper” communities around the world that are building bunkers against a possible apocalypse. Currently, 3.7 million Americans call themselves preppers. Millions more prep without knowing it. Bradley Garrett, who began writing this book years before the 2020 Covid-19 pandemic, argues that prepping is a rational response to global, social, and political systems that are failing to produce credible narratives of continued stability. Left with a sense of foreboding fueled by disease outbreaks, increasing government dysfunctionality, eroding critical infrastructure, nuclear brinkmanship, and an accelerating climate crisis, people all over the world are responding predictably—by hunkering down. For this book, Garrett traveled across four continents to meet those who are constructing panic rooms, building underground backyard survival chambers, stockpiling supplies, preparing go bags, hiding inflatable rafts, rigging mobile “bugout” vehicles, and burrowing deep into the earth. He has returned with a brilliant, original and never less than deeply disturbing story from the frontlines of the way we live now: an illuminating reflection on our age of disquiet and dread that brings our times into new and sharper focus. The “bunker,” Garrett shows, is all around us: in malls, airports,
