electronic discovery amendments and addresses significant developments in class-action practice. As has been the practice with all of the past editions, the casebook offers a substantial emphasis on the operation of the Federal Rules of Civil Procedure, but also draws comparisons with state and international practice. Because courses in civil procedure vary greatly as to the hours allotted, we have designed and revised this casebook for maximum flexibility in terms of an individual classroom's coverage, depth, sensibility, and emphasis. The casebook is accompanied by an up-to-date Supplement that includes not only the federal statutes and rules governing procedure, but also comparative state provisions. A number of other materials, such as Advisory Committee notes, proposed rule alternatives, and local court rules, also are included. The Supplement contains, as well, a litigation time chart and an illustrative problem, showing how a case develops in practice and samples of the documents that actually might have formed a portion of the record.

The Legal Environment of Business

Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials

contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well – to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further.

understanding of school law issues and the legal rationale underpinning such law. Broad legal concepts such as due process, equal protection, freedom of expression, the wall separating church and state, and reasonable search are stressed to help professional educators gain a better understanding of the legal landscape in which they operate. The case method of studying school law is emphasized. Selected cases present legal concepts in a real world context, assisting students in making the essential connection between more abstract general principles of law and their operational application in schools. This text is revised every three years to present the most current available information. But because the law changes rapidly, this text also provides students with essential skills and tools necessary for basic legal research, case citation, analyzing judicial decisions, and understanding the operations of state and federal systems of government. Lastly, but most importantly, the text is written in a clear, understandable, and interesting manner, to actively engage students in lively discussion, and debate concerning the application of the law in schools. The author provides notes and questions throughout the book to facilitate better understanding of the law and enable instructors to enrich learning through stimulating class discussions."
