

## Compendium Of Human Histology

Boston Medical and Surgical Journal  
The American Medical Monthly  
Catalogue of the Mercantile Library of Brooklyn: D-M  
Essentials of Anatomy  
Nervous and Mental Diseases  
Atlas and Principles of Bacteriology and Text-book of Special Bacteriologic  
Diagnosis: Text  
Atlas of the Nervous System  
American year-book of medicine and surgery. v.6, 1901  
Atlas of the External Diseases of the Eye  
Compendium of Histology  
Essentials of Refraction and of Diseases of the Eye  
Pacific Medical and Surgical Journal and Western Lancet  
Atlas and Epitome of Special Pathologic Histology  
The Boston Medical and Surgical Journal  
A Laboratory Hand-book of Urine Analysis and Physiological Chemistry  
A Text-book of histology  
Essentials of Gynecology  
Essentials of Obstetrics  
Encyclopedia of Practical Medicine  
A Text-book of Obstetrics  
American Medical Monthly and New York Review  
The American Journal of the Medical Sciences  
Journal of Psychological Medicine and Mental Pathology  
American year-book of medicine and surgery. v.7 pt.2, 1902  
A Text-book of the Practice of Medicine  
Compendium of Human Histology  
The Journal of Psychological Medicine and Mental Pathology  
Compendium of Human Histology  
An Atlas of Histology  
Hand-book of Surgical Operations  
A Text-book of Human Physiology Including Histology and Microscopical Anatomy  
Catalogue of the Books and Pamphlets in the Medical Department of the Grosvenor Public Library, Buffalo, N.Y.  
Compendium of Histology  
A Manual of the Practice of Medicine  
Variola, Vaccination, Varicella, Cholera, Erysipelas, Whooping Cough, Hay Fever  
Reflex

Paralysis: its pathological anatomy, and relation to the sympathetic nervous system  
Human Physiology  
Essentials of Bacteriology: Being a Concise and Systematic Introduction to the Study of Microorganisms for the Use of Students and Practitioners  
American Year-book of Medicine and Surgery  
The Medical and Surgical Reporter

## **Compendium of Human Histology**

Bridging the gap between textbook diagrams and the complex reality of histological preparations, this magnificent atlas of human microanatomy is designed to help students understand the complex structures encountered when viewing microscopic sections of tissues. Instead of simply depicting an individual section, each drawing is a compilation of the key structures and features seen in many preparations from similar tissues or organs. Invaluable to students in a range of life science and medical disciplines including human and veterinary medicine, dentistry, mammalian biology, pharmacy, and nursing.

## **An Atlas of Histology**

This book has been designed to help medical students succeed with their histology classes, while using less time on studying the curriculum. The book can both be

used on its own or as a supplement to the classical full-curriculum textbooks normally used by the students for their histology classes. Covering the same curriculum as the classical textbooks, from basic tissue histology to the histology of specific organs, this book is formatted and organized in a much simpler and intuitive way. Almost all text is formatted in bullets or put into structured tables. This makes it quick and easy to digest, helping the student get a good overview of the curriculum. It is easy to locate specific information in the text, such as the size of cellular structures etc. Additionally, each chapter includes simplified illustrations of various histological features. The aim of the book is to be used to quickly brush up on the curriculum, e.g. before a class or an exam. Additionally, the book includes guides to distinguish between the different histological tissues and organs that can be presented to students microscopically, e.g. during a histology spot test. This guide lists the specific characteristics of the different histological specimens and also describes how to distinguish a specimen from other similar specimens. For each histological specimen, a simplified drawing and a photomicrograph of the specimen, is presented to help the student recognize the important characteristics in the microscope. Lastly, the book contains multiple “memo boxes” in which parts of the curriculum are presented as easy-to-remember mnemonics.

### **Hand-book of Surgical Operations**

**A Text-book of Human Physiology Including Histology and Microscopical Anatomy**

**Catalogue of the Books and Pamphlets in the Medical Department of the Grosvenor Public Library, Buffalo, N.Y.**

**Compendium of Histology**
