"The twentieth century loved machines and the speed they made possible. Speeding cars, trains, and planes promised to conquer space and time; their aerodynamic styling and metal skins embodied a new and modern beauty, one that especially enchanted American designers from the late 1920s through the 1950s. Streamlining became the popular American style for all sorts of objects: from toy scooters to typewriters, from power tools to teakettles." "This book celebrates this beauty as epitomized by the work of Raymond Loewy, Kem Weber, Henry Dreyfuss, Norman Bel Geddes, as well as in works by many lesser-known industrial designers whose products are presented here for the first time. The book also demonstrates the resurgence of interest in streamlining among international vanguard designers from the 1980s to the present." "This volume is illustrated with patent drawings and period photographs showing how these dynamically styled objects were used. The one hundred eighty objects presented here, drawn from the Eric Brill Collection (recently donated to the American Friends of Canada) and supplemented by pieces from the Stewart Collection at the Montreal Museum of Fine Arts, were photographed for this book. A full bibliography, biographies of the designers, and index complete the study."--BOOK JACKET.

A final thematic unit, Food: A Casebook, illustrates all of these modes. The readings represent diverse voices and views from some of the most respected professional essayists working in the English language, and include short stories. Essays in this edition serve as structural models for students to emulate in their writing and as sources of content for classroom discussion and paper topics.
