Aspen Plus is one of the most popular process simulation software programs used industrially and academically. Though the software is available at many corporations and universities, there are no textbooks which are dedicated to teaching the step-by-step use of the software. This book is designed to fill that need. The structure of the book is unique in that it emulates a lecture /workshop classroom environment. Each chapter starts with the equivalent of a classroom lecture followed by workshops which provide experience in the chapter's subject matter. The enclosed CD contains solutions, both in Aspen Plus and text formats, to examples imbedded in the text as well as to all the workshops. There are also notes at the end of each chapter designed to aid readers that have difficulty with the workshops. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

In *Too Much Free Speech?*, Randall P. Bezanson takes up an essential and timely inquiry into the Constitutional limits of the Supreme Court's power to create, interpret, and enforce one of the essential rights of American citizens. Analyzing contemporary Supreme Court decisions from the past fifteen years, Bezanson argues that judicial interpretations have fundamentally and drastically expanded the meaning and understanding of "speech." Bezanson focuses on judgments such as the much-discussed *Citizens United* case, which granted the full measure of constitutional protection to speech by corporations, and the *Doe vs. Reed* case in Washington state, which recognized the signing of petitions and voting in elections as acts of free speech. In each case study, he questions whether the meaning of speech has been expanded too far and critically assesses the Supreme Court's methodology in reaching and explaining its expansive conclusions. Bezanson's measured approach and deep insights reveal the complexities of speech in the realms of human behavior and constitutional law. His wide-ranging analysis of relevant Supreme Court cases arms readers with the facts and perspectives necessary to reach independent conclusions about whether the Court's conduct befitted the independent judicial branch and to understand the consequences of its decisions for a representative democracy.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, *Nada*, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

In *The Immorality of Punishment* Michael Zimmerman argues forcefully that not only our current practice but indeed any practice of legal punishment is deeply morally repugnant, no matter how vile the behaviour that is its target. Despite the fact that it may be difficult to imagine a state functioning at all, let alone well, without having recourse to punishing those who break its laws, Zimmerman makes a timely and compelling case for the view that we must seek and put into practice alternative means of preventing crime and promoting social stability.

Theoretically sophisticated: How often has this term been used to distinguish a work of contemporary criticism, and what, exactly, does it mean? In *Strange Gourmets*, Joseph Litvak reclaims sophistication from its negative connotations and turns the spotlight on those who, even as they demonize sophistication, surreptitiously and extensively use it. Though commonly thought of as a kind of worldliness at its best and an elitist snobbery at its worst, sophistication, Litvak reminds us, remains tied to its earlier, if forgotten, meaning of "perversion"--a perversion whose avatars are the homosexual and the

intellectual. Proceeding with his investigations from a specifically gay academic perspective, Litvak presents thoroughly inventive readings of novels by Austen, Thackeray, and Proust, and of theoretical works by Adorno and Barthes, each text epitomizing sophistication in one of its more familiar modes. Among the issues he explores are the ways in which these texts teach sophistication, the embarrassment that sophistication causes the sophisticated, and how the class politics of sophistication are inseparable from its sexual politics. Helping gay, queer, feminist, and other provocative critics to make the most of their bad publicity, Litvak mindfully celebrates sophistication's economy of taste and pleasure.

The Immorality of Punishment

The twelfth volume of The Collected Works of Langston Hughes contains Hughes's collections of biographies for children and young adults - Famous American Negroes, Famous Negro Music Makers, and Famous Negro Heroes of America - gathered together for the first time. In these works, Hughes sought to remedy decades of historical and cultural neglect by telling the stories of African Americans who had made vital contributions to the construction of the American identity. Hughes made clear his commitment to an inclusive and diverse accounting of the achievements of African Americans on American soil, from vernacular expression to high culture, oratory to combat, geographical exploration to intellectual introspection. His lively and dramatic portraits of African Americans such as Crispus Attucks, Frederick Douglass, Jackie Robinson, and Mahalia Jackson, battling against exclusivity and adversity to achieve their full potential, present a captivating portrait of America. This volume is a valuable record of the emerging African American struggle for civil rights and positive self-determination. It also documents Hughes's interests as he entered the fifth decade of his life and can be read fruitfully alongside his writings for adults at the time, reflecting his sociocultural and political thought.

While the popular assortment of sins is not directly from scripture, they have been the subject of many a sermon, lecture, writing and art. In his book *The Seven Deadly Sins: And Why We Love Them*, Steinbacher examines each in detail. He gives examples of how they effect us and how we conduct ourselves in this world. Included in this book is Steinbacher's essay, *An Angel In My Garden*.
