Winner of the Grawemeyer Award in Education "The best book on high school dynamics I have ever read." —Jay Mathews, Washington Post "A hopeful, easy-to-read narrative on what the best teachers do and what deep, engaging learning looks like for students. Grab this text if you're looking for a celebration of what's possible in American schools." —Edutopia "A must-read for anyone interested in the fate of the American high school." —Linda Darling-Hammond, President and CEO, Learning Policy Institute What would it take to transform our high schools into places capable of supporting deep learning for students across a wide range of aptitudes and interests? To find out, Jal Mehta and Sarah Fine spent hundreds of hours observing and talking to teachers and students in and out of the classroom at thirty of the country's most innovative schools. To their dismay, they discovered that deeper learning is more often the exception than the rule. And yet they found

pockets of powerful learning at almost every school, often in extracurriculars but also in a few mold-breaking academic courses. So what must schools do to achieve the integrations that support deep learning: rigor with joy, precision with play, mastery with identity and creativity? In *Search of Deeper Learning* takes a deep dive into the state of our schools and lays out an inspiring new vision for American education.

Keyboard Skills for Music Educators: Score Reading is the first textbook equip future educators with the ability to play from an open score at the keyboard. Score reading can be a daunting prospect for even the most accomplished pianist, but it is a skill required of all choral and instrumental music instructors. Although most music education curricula include requirements to achieve a certain level of proficiency in open score reading, standard textbooks contain very little material devoted to developing this skill. This textbook provides a gradual and graded approach, progressing from two-part reading to four or more parts in a variety of clefs. Each chapter focuses on one grouping of voices and provides many musical examples from a broad sampling of choral and instrumental repertoire ranging from Renaissance to contemporary works.

Clear Speech Teacher's resource book

This antiquarian book contains Alexandre Dumas's work "Vaninka". It was first published as part of his eight-volume series "Celebrated Crimes" (1839-40), and recounts the true story of brutal torture and execution in the city of St. Petersburg. A thrilling and authentic retelling of the notorious case, "Vaninka" is not to be missed by fans of the true-crime genre, and constitutes a must-have for collectors of Dumas's work. Alexandre Dumas (1802-1870) was a famous French writer. He is best remembered for his exciting romantic sagas, including "The Three Musketeers" and "The Count of Monte Cristo". Despite making a great deal of money from his writing, Dumas was almost perpetually penniless thanks to his lavish lifestyle. His novels have been translated into nearly a hundred different languages, and have inspired over 200 motion pictures. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing this antiquarian book in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the author.

With half a million copies in print, How to Read a Book is the best and most successful guide to reading comprehension for the general reader, completely rewritten and updated with new material. A CNN Book of the Week: "Explains not just why we should read books, but how we should read them. It's masterfully done." -Farheed Zakaria Originally published in 1940, this book is a rare phenomenon, a living classic that introduces and elucidates the various levels of reading and how to achieve them—from elementary reading, through systematic

skimming and inspectional reading, to speed reading. Readers will learn when and how to “judge a book by its cover,” and also how to X-ray it, read critically, and extract the author’s message from the text. Also included is instruction in the different techniques that work best for reading particular genres, such as practical books, imaginative literature, plays, poetry, history, science and mathematics, philosophy and social science works. Finally, the authors offer a recommended reading list and supply reading tests you can use measure your own progress in reading skills, comprehension, and speed.

Reading and Vocabulary Focus 1

AI is radically transforming business. Are you ready? Look around you. Artificial intelligence is no longer just a futuristic notion. It's here right now--in software that senses what we need, supply chains that "think" in real time, and robots that respond to changes in their environment. Twenty-first-century pioneer companies are already using AI to innovate and grow fast. The bottom line is this: Businesses that understand how to harness AI can surge ahead. Those that neglect it will fall behind. Which side are you on? In *Human + Machine*, Accenture leaders Paul R. Daugherty and H. James (Jim) Wilson show that the essence of the AI paradigm shift is the transformation of all business processes within an organization--whether related to breakthrough innovation, everyday customer service, or personal productivity habits. As humans and smart machines collaborate ever more closely, work processes become more fluid and adaptive, enabling companies to change them on the fly--or to completely reimagine them. AI is changing all the rules of how companies operate. Based on the authors' experience and research with 1,500 organizations, the book reveals how companies are using the new rules of AI to leap ahead on innovation and profitability, as well as what you can do to achieve similar results. It describes six entirely new types of hybrid human + machine roles that every company must develop, and it includes a "leader's guide" with the five crucial principles required to become an AI-fueled business. *Human + Machine* provides the missing and much-needed management playbook for success in our new age of AI. **BOOK PROCEEDS FOR THE AI GENERATION** The authors' goal in publishing *Human + Machine* is to help executives, workers, students and others navigate the changes that AI is making to business and the economy. They believe AI will bring innovations that truly improve the way the world works and lives. However, AI will cause disruption, and many people will need education, training and support to prepare for the newly created jobs. To support this need, the authors are donating the royalties received from the sale of this book to fund education and retraining programs focused on developing fusion skills for the age of artificial intelligence.

Academic Encounters: The Natural World Student's Book

The internationally bestselling guide to "mind-reading" by influencing those around you via non-verbal communication, from human psychology expert Henrik Fexeus. How would you like to know what the people around you are thinking? Do you want to network like a pro, persuade your boss to give you that promotion, and finally become the life of every party? Now, with Henrik Fexeus's expertise, you can. The Art of Reading Minds teaches you everything you need to know in order to become an expert at mind-reading. Using psychology-based skills such as non-verbal communication, reading body language, and using psychological influence, Fexeus explains how readers can find out what another person thinks and feels- and consequently control that person's thoughts and beliefs. Short, snappy chapters cover subjects such as contradictory signs and what they mean, how people flirt without even knowing it, benevolent methods of suggestion and undetectable influence, how to plant and trigger emotional states, and how to perform impressive mind-reading party tricks. Fexeus gives readers practical (and often fun) examples of how to effectively mind-read others and use this information, benevolently, both in personal and professional settings.
