The Work Boat

The following memoirs involve one woman's attempt to expose a family curse bestowed upon them through trickery and deception. This novel is a search for answers, a struggle for truth and integrity. This is an argument for karmic justice for the author and her extended family members' and their birthright. The following pages are one woman's journey through hell. This is a quest to rid herself of the ghosts of her past and reveal her multibillionaire cousin's hidden identity "It's difficult to determine if Kingsnorth's story is one of fiction or perceived truth, since the preface says "novel," but the content reads like a memoir." -Kirkus Review " A Matter of Family: A Cousin's Lament is a memoir of author Gloria Marie Kingsnorth's fictional self, written in letter form to her alleged cousin, billionaire Grant Wilson Billings. The author's writing keeps the reader enthralled. Her narrative bends and refracts the black and white of her protagonist's life into ambiguous gray Motifs similar to those found in the work of Edgar Allen Poe, like incest, murder, and insanity, are expertly infused in this modern Gothic." "Pratt & Whitney engines helped to win World War II by powering much of the U.S. fighter fleet as well as many British planes. They also powered 98 percent of all transport planes used by the military during that war. Since then, they've powered such record-breaking aircraft as the Boeing B-50, the first airplane to fly nonstop around the globe, and the Air Force F-100 Super Sabre becoming the first aircraft to break the speed of sound in horizontal flight. In July 1976, Pratt & Whitney J58 engines powered an SR-71 spy plane to a world altitude record of 84,069 feet (25,624 kilometers) and a second Blackbird to a world speed record of 2,193 miles per hour (3,529 kilometers per hour). These dependable engines are also responsible for powering the first generation of commercial jet transports bringing the world to our front doors - the Boeing 707 and Douglas DC-8. Pratt & Whitney's JT8D, powering the Boeing 727 and 737, as well as the Douglas DC-9, has totaled more than half a billion hours of service with more than 350

operators since its commercial service began. In fact, they've been used in most of the world's civil, commercial and military aircraft. Over the years, Pratt & Whitney has patented hundreds of innovations, from heat-resistant coatings to aerodynamic blades - technologies that make air travel more cost effective, comfortable and dependable. Today Pratt and Whitney engines provide power for everything from land based power stations, business jets and helicopters to large commercial aircraft, fifth generation fighters, and manned & unmanned space vehicles. "The story of Pratt & Whitney" offers broad insight into the history of aviation itself and the people who built the industry."--Résumé de l'éditeur.

Spy Cat is the first exciting adventure in this brand new series by Andy Cope, author of the bestselling Spy Dog and Spy Pups series for young readers of 7+. The purrrfect spy is prowling a neighbourhood near you. There's a new secret agent in town. And this one has whiskers. Shakespeare, the ginger tabby, otherwise known as Agent 009, never officially signed up to protect the Cook children but in the world

famous Spy Dog's absence, he was most definitely the best pet for the job. Shakespeare has some very big (and furry) boots to fill. And with a dangerous criminal on the loose near by to where the Cooks are camping, he may need all nine lives to do it! Praise for Andy Cope: 'An imaginative, creative feast' - Radio Times Andy Cope is the author of the bestselling and multi-award-winning Spy Dog and Spy Pups series. Spy Dog was the winner of the Richard and Judy 7+ developing reader category as well as the prestigious Red House Children's Book Award.
