Emissions From Combustion Processes - An ACS Environmental Chemistry Division Book
The Great American Canals

Blue Collar Resumes

Topics discussed in this book cover all aspects of combustion from the mechanics and formation of toxic pollutants and their transport/fate in the environment to emission abatement and risk assessment. Leading experts in the field have contributed information from studies ranging from fundamental bench-scale investigations to risk assessment of existing large-scale municipal incinerators. This book will be a valuable reference for scientists, engineers, administrators and environmentalists who must deal with the complex issues of waste management and environmental protection.
