The First Americans

On the one hand, nobody wants to be a dick. On the other hand, dicks are everywhere! They cut in line, talk behind our backs, recline into our seats, and even have the power to morph into trolls online. Their powers are impressive, but with a little foresight and thoughtfulness, we can take a stand against dickishness today. How Not to Be a Dick is packed with honest and straightforward advice, but it also includes playful illustrations showing two well-meaning (but not always well behaved) young people as they confront moments of potential dickishness in their everyday lives. Sometimes they falter, sometimes they triumph, but they always seek to find a better way. And with their help, you can too.

Prairie Farmer

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, The First Americans is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Yamaha YFZ450 & YFZ450R 2004-2017

We are delighted to welcome readers to the proceedings of the 6th Pacific-Rim Conference on Multimedia (PCM). The first PCM was held in Sydney, Australia, in 2000. Since then, it has been hosted successfully by Beijing, China, in 2001, Hsinchu, Taiwan, in 2002, Singapore in 2003, and Tokyo, Japan, in 2004, and finally Jeju, one of the most beautiful and fantastic islands in Korea. This year, we accepted 181 papers out of 570 submissions including regular and special session papers. The acceptance rate of 32% indicates our commitment to ensuring a very high-quality conference. This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers that provided timely and insightful reviews. We would therefore like to thank the Program Committee and all reviewers. The program of this year reflects the current interests of the PCM's. The accepted papers cover a range of topics, including, all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues. The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track. We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical.

A deep river pit in Natchez, Mississippi, reputed to be the hiding spot for Jean Lafitte's hidden treasure and a dumping ground for numerous murder victims, becomes the site of a dangerous showdown for Penn Cage, in a tale beset by racial tension, betrayals and illicit sex. By the author of Third Degree. Reprint.

New York Game & Fish

This important new book takes a critical view on regional industry clusters, in particular their identification and formation, and the policies which help create and support them.

James Dean

Cycle is a trip, a story in images. Ruth Gwily makes an introspective exploration, building her story in small pieces. Her subjects include: childhood, discovery of the body, love, relationships, solitude. This book invites the reader to share the authors experiences through a visual language filled with metaphors. This autobiographic document is the combination of illustration and theatrical approaches, reminiscent of Comedia del Arte, puppets and dance.

This is the book that restarted the James Dean cult by celebrating him as the cool, defiant visionary of pop culture who made adolescence seem heroic instead of awkward and who defined the style of rock 'n' roll's politics of delinquency. The only book to fully show how deliberately and carefully Dean crafted his own image and performances, and the product of still unequalled research, vivid writing, intimate photographs, and profound meditation, James Dean: The Mutant King has become almost as legendary as its subject.

Frontier Road

Kawasaki Bayou 220/300 & Prairie 300 ATV

Frontier Road uses the history of one road in southern Colombia—known locally as “the trampoline of death”—to demonstrate how state-building processes and practices have depended on the production and maintenance of frontiers as inclusive-exclusive zones, often through violent means. Considers the topic from multiple perspectives, including ethnography of the state, the dynamics of frontiers, and the nature of postcolonial power, space, and violence Draws attention to the political, environmental, and racial dynamics involved in the history and development of transport infrastructure in the Amazon region Examines the violence that has sustained the state through time and space, as well as the ways in which ordinary people have made sense of and contested that violence in everyday life Incorporates a broad range of engaging sources, such as missionary and government archives, travel writing, and oral histories

Books in Print Supplement

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

The "canopy" in the title refers to the tree-lined streets of Rice's Regina neighbourhood but through his piercing specificity we learn more about "place", in the first decade of a new century. Rice's poems speak eloquently of our connection to the natural world, including the forests and landscapes we have created within our cities. With a voice that speaks unflinchingly of its sources Life in the Canopy is a an exploration of the history and bones of a modest city in the center of the continent. With a profound authority and honesty Rice examines how we live with each other and how the place we live in shapes our lives. What is a city ? Is it more than its public realm; the trees, parks and lake, railways and neighbourhoods? Is it more than the slow unrolling of human experience and event? Here are insightful, moving poems that take on difficult ethical and aesthetic questions.
