Christian County had published a county history in 1841 by Perin and again another by Charles Meachem in 1930. Both of these histories had a limited biography section in them. Late in 1990, Lon had a job started and was not complete therefore the Odd Fellows of Green River Lodge #54 of Hopkinsville and Jewel Rebekah Lodge #14 (the auxiliary of the Odd Fellows) met and voted to compile and have published a continuation of Volume I of the Family Histories to be titled Edition I of Family Histories of Christian County.

The murder of the secretary of state in the executive mansion sparks a mystery with “a superb denouement . . . one wonders if all is fiction” (Time). In a city where the weapon of choice is usually gossip, the strangling of Secretary of State Lansard Blaine in the Lincoln Bedroom is a gruesome first. White House counsel Ron Fairbanks is ordered to investigate. There are persistent rumors that the secretary was an inveterate womanizer with ties to a glamorous call girl. There is also troubling evidence of unofficial connections with international agents. For Fairbanks, who is in love with the president’s daughter, one point is all too clear: only a few highly placed insiders had access to the Lincoln Bedroom that fateful evening, one of whom was the president. Torn between his job, his loyalty, his love, and uncovering the truth, Fairbanks must make gut-wrenching choices that lead to a surprise no one could have foreseen. Murder in the White House is the first book in Margaret Truman’s Capital Crimes series of political thrillers set in and around Washington, DC. Having spent a

good part of her childhood in the White House as the daughter of US President Harry S. Truman, she now takes readers beyond the public halls and into the private corridors of power.

For nearly 80 years, shaft-drive boxer twins have traditionally formed the backbone of the BMW motorcycle line-up. For many enthusiasts of the Bavarian marque the classic BMW twin was the R90S of 1973-76. Over the decades, successive generations of durable machines - including the R100S, fully-faired R100RS, four-cylinder K-series, high-performance R1100RS and an entire family of touring and sporting models ranging from 850 to 1200cc - would ensure the BMW boxer twins a place in the Haynes "Great Bikes" series. This book covers: historical context, racing, the wartime R75 and R69S; the "75" series which enabled BMW to compete with the high-performance Japanese machines; the R90S, the "76" and Superbike performance; the R100RS, the "77" and the touring R100RT; smaller twins, smaller potential; the R89G/S, including a Paris-Dakar version; rationalization of the boxer range, and the new twins that included four-valve heads and electronic engine management; and technical specifications from 1969 to 2003.

Since the industrialization and urbanization of the Western workforce, tanned skin has been perceived increasingly as attractive and fashionable for naturally light-skinned individuals. However, in addition to causing tanning, photo-aging, and other health effects, ultraviolet radiation (UV) is a well-known carcinogen. Despite wide-spread awareness of UV risks, tanning has become increasingly popular in several Western countries including the USA. While millions of individuals tan indoors each day, relatively little is known about this phenomenon. This book fills that gap by providing an overview of indoor tanning, reasons for its popularity, its risks including skin cancers, and the public health context surrounding the behavior. We have invited some of the preeminent experts in the field to summarize the existing scientific literature for each of the chapters. Shedding Light on Indoor Tanning is an up-to-date and comprehensive book that provides a unique and essential overview of the most significant current issues related to indoor tanning for scientists, educators, students, clinicians, and the general public interested in dermatology, aesthetic trends, skin care, and skin cancer.
