From the host of the Travel Channel's "The Wild Within." A hunt for the American buffalo—an adventurous, fascinating examination of an animal that has haunted the American imagination. In 2005, Steven Rinella won a lottery permit to hunt for a wild buffalo, or American bison, in the Alaskan wilderness. Despite the odds—there's only a 2 percent chance of drawing the permit, and fewer than 20 percent of those hunters are successful—Rinella managed to kill a buffalo on a snow-covered mountainside and then raft the meat back to civilization while being trailed by grizzly bears and suffering from hypothermia. Throughout these adventures, Rinella found himself contemplating his own place among the 14,000 years' worth of buffalo hunters in North America, as well as the buffalo's place in the American experience. At the time of the Revolutionary War, North America was home to approximately 40 million buffalo, the largest herd of big mammals on the planet, but by the mid-1890s only a few hundred remained. Now that the buffalo is on the verge of a dramatic ecological recovery across the West, Americans are faced with the challenge of how, and if, we can dare to share our land with a beast that is the embodiment of the American wilderness. *American Buffalo* is a narrative tale of Rinella's hunt. But beyond that, it is the story of the many ways in which the buffalo has shaped our national identity. Rinella takes us across the continent in search of the buffalo's past, present, and future: to the Bering Land Bridge, where scientists search for buffalo bones amid artifacts of the New World's earliest human inhabitants; to buffalo jumps where Native Americans once ran buffalo over cliffs by the thousands; to the Detroit Carbon works, a "bone charcoal" plant that made fortunes in the late 1800s by turning millions of tons of buffalo bones into bone meal, black dye, and fine china; and even to an abattoir turned fashion mecca in Manhattan's Meatpacking District, where a depressed buffalo named Black Diamond met his fate after serving as the model for the American nickel. Rinella's erudition and exuberance, combined with his gift for storytelling, make him the perfect guide for a book that combines outdoor adventure with a quirky blend of facts and observations about history, biology, and the natural world. Both a captivating narrative and a book of environmental and historical significance, *American Buffalo* tells us as much about ourselves as Americans as it does about the creature who perhaps best of all embodies the American ethos.

As thrilling as any novel, as taut and exciting as any adventure story, Peter Hathaway Capstick's *Death in the Long Grass* takes us deep into the heart of darkness to view Africa through the eyes of one of the most renowned professional hunters. Few men can say they have known Africa as Capstick has known it—leading safaris through lion country; tracking man-eating leopards along tangled jungle paths; running for cover as fear-maddened elephants stampede in all directions. And of the few who have known this dangerous way of life, fewer still can recount their adventures with the flair of this former professional hunter-

turned-writer. Based on Capstick's own experiences and the personal accounts of his colleagues, *Death in the Long Grass* portrays the great killers of the African bush—not only the lion, leopard, and elephant, but the primitive rhino and the crocodile waiting for its unsuspecting prey, the titanic hippo and the Cape buffalo charging like an express train out of control. Capstick was a born raconteur whose colorful descriptions and eye for exciting, authentic detail bring us face to face with some of the most ferocious killers in the world—underrated killers like the surprisingly brave and cunning hyena, silent killers such as the lightning-fast black mamba snake, collective killers like the wild dog. Readers can lean back in a chair, sip a tall, iced drink, and revel in the kinds of hunting stories Hemingway and Ruark used to hear in hotel bars from Nairobi to Johannesburg, as veteran hunters would tell of what they heard beyond the campfire and saw through the sights of an express rifle.

Born at Midnight

Set in the same world as Faith Hunter's New York Times bestselling Jane Yellowrock novels, the fourth Soulwood novel stars Nell Ingram, who channels her power from the earth. Nell can draw magic from the land around her, and lately she's been using it to help the Psy-Law Enforcement Division, which solves paranormal crimes. Joining the team at PsyLED has allowed her to learn more about her powers and the world she always shunned--and to find true friends. Head agent Rick LaFleur shifts into a panther when the moon calls him, but this time, something has gone wrong. Rick calls Nell from a riverbank--he's naked, with no memory of how he came to be there, and there's a dead black cat, sacrificed in a witch circle and killed by black magic, lying next to him. Then more animals turn up dead, and team rushes to investigate. A blood-witch is out to kill. But when it seems as if their leader is involved in the crime, the bonds that hold the team together could shatter at any moment.

Acts of Faith

The British horn player Dennis Brain (1921-1957) is commonly described by such statements as "the greatest horn player of the 20th Century," "a genius," and "a legend." He was both a prodigy and popularizer, famously performing a concerto on a garden hose in perfect pitch. On his usual concert instrument his tone was of unsurpassed beauty and clarity, complemented by a flawless technique. The recordings he made with Herbert von Karajan of Mozart's horn concerti are considered the definitive interpretations. Brain enlisted in the English armed forces during World War II for seven years, joining the National Symphony Orchestra in wartime in 1942. After the war he filled the principal horn positions in both the Philharmonia and Royal Philharmonic Orchestras. He later formed his own wind quintet and began conducting. Composers including Benjamin Britten and Paul Hindemith lined up to write music for him. Even fifty years after his tragic death at the age of 36 in an auto accident in 1957, Peter Maxwell Davies was commissioned to write a piece in his honor. Stephen Gamble and William Lynch have conducted numerous interviews with family, friends, and colleagues and uncovered information in the BBC archives and other lesser known sources about recordings that were previously unknown. This volume describes Brain's life and analyzes in depth his musical career. Its appendices of information on performances will appeal to music historians, and its details on Brain's instruments and equipment will be useful to horn players.

It was the war that lasted ten thousand days. The war that inspired scores of songs. The war that sparked dozens of riots. And in this stirring chronicle, Pulitzer Prize-winning journalist Philip Caputo writes about our country's most controversial war -- the Vietnam War -- for young readers. From the first stirrings of unrest in Vietnam under French colonial rule, to American intervention, to the battle at Hamburger Hill, to the Tet Offensive, to the fall of Saigon, *10,000 Days of Thunder* explores the war that changed the lives of a generation of Americans and that still reverberates with us today. Included within *10,000 Days of Thunder* are personal anecdotes from soldiers and civilians, as well as profiles and accounts of the actions of many historical luminaries, both American and Vietnamese, involved in the Vietnam War, such as Richard M. Nixon, General William C. Westmoreland, Ho Chi Minh, Joe Galloway, Dr. Martin Luther King Jr., Lyndon B. Johnson, and General Vo Nguyen Giap. Caputo also explores the rise of Communism in Vietnam, the roles that women played on the battlefield, the antiwar movement at home, the participation of Vietnamese villagers in the war, as well as the far-reaching impact of the war's aftermath. Caputo's dynamic narrative is highlighted by stunning photographs and key campaign and battlefield maps, making *10,000 Days of Thunder* THE consummate book on the Vietnam War for kids.

inch.this work is likely to become a standart work very quickly and is to be recommended to all schools where recorder studies are undertaken inch. (Oliver James, Contact Magazine) A novel and comprehensive approach to transferring from the C to F instrument. 430 music examples include folk and national songs (some in two parts), country dance tunes and excerpts from the standard treble repertoire ofBach, Barsanti, Corelli, Handel, Telemann, etc. An outstanding feature of the book has proved to be Brian Bonsor's brilliantly simple but highly effective

practice circles and recognition squares designed to give, in only a few minutes, concentrated practice on the more usual leaps to and from each new note and instant recognition of random notes. Quickly emulating the outstanding success of the descant tutors, these books are very popular even with those who normally use tutors other than the Enjoy the Recorder series.

School of Music, Theatre & Dance (University of Michigan) Publications

First to be published in the series was *The Art of French Horn Playing* by Philip Farkas, now Distinguished Professor Emeritus of Music at Indiana University. In 1956, when Summy-Birchard published Farkas's book, he was a solo horn player for the Chicago Symphony and had held similar positions with other orchestras, including the Boston Symphony, Cleveland Orchestra, and Kansas City Conservatory, DePaul University, Northwestern University, and Roosevelt University in Chicago. *The Art of French Horn Playing* set the pattern, and other books in the series soon followed, offering help to students in learning to master their instruments and achieve their goals.

Acheron

Determined to solve an ancient mystery, a woman undertakes a forbidden quest that pits her against the Dark-Hunter leader and proud god Acheron, with whom she joins forces when ancient guardians and old enemies threaten both of them. Reprint.

American Buffalo

Humanity has blown horns and trumpets of various makes and models, lengths and diameters since prehistoric times. In *Horns and Trumpets of the World*, the eminent scholar Jeremy Montagu surveys the vast range in time and type of this instrument that has accompanied everything in human history from the war cry to the formal symphony, from the hunting call to the modern jazz performance. No work on this topic offers as much detail or so many illustrations—over 150, in fact—of this remarkable instrument. Montagu's examination looks at horns constructed from seaweed, cane, bamboo, shell, wood, ivory, and metal and encompasses instruments of the Bible, from the Bronze and Iron Ages, the

Medieval, Renaissance, Baroque, and Classical periods, and, following the Industrial Revolution, the modern era.
