The Heroes in Training are entering the Underworld—if Hades can conquer his canine fears, that is. The Underworld usually isn't really meant to be a fun place—but tell that to Hades! He loves the dark and the stinky smell of sulfur. However, there is one thing that Hades is not a fan of: dogs. And when Zeus and his fellow Olympians encounter Cerberus—a snarling, three-headed dog—Hades must conquer his fears and tame the hound so everyone can continue into the Underworld and deposit their Titan prisoner, Oceanus, back where he belongs! But with magical water that causes forgetfulness, hot beds of lava, and another epic battle with two more Titans standing in their way, will Zeus and his heroes make it out of the Underworld with everyone intact?

### **Hestia the Invisible**

One of the more difficult aspects of a designer's training is learning how to create patterns that make full use of the characteristics of individual fabrics. With an ever increasing range of fabrics available to the designer, an understanding of the relationship between fabric, form and pattern shape is now probably the most important skill a designer has to

acquire. This book discusses the factors that need to be taken into consideration and offers a unique and practical method for solving problems. Its approach to design and flat pattern cutting is based on the appraisal of the fabric (according to a scale of five for each of five fabric characteristics - weight, thickness, sheer, drape and stretch) and body shape. The book is lavishly illustrated and makes use of numerous practical examples.

### **Perfect Fusing**

The choice and tailoring of collars, buttonholes, pockets, and mitered back vents are shown to create individuality and flair, while special sections provide information about stripes and plaids, men's jackets, finishing touches, and helpful tools and notions.--From publisher description.

### **Victorian and Edwardian Fashions from "La Mode Illustrée"**

The term 'tailored' has changed as methods of

manufacture and the retailing of clothes have evolved. This book demonstrates the wide range of cutting methods used to produce garments which are described as 'tailored' jackets. Although the main focus is on modern methods of producing clothing, a rich and complex cutting tradition is acknowledged and used. It is hoped that the modern garment designer will be inspired to rediscover methods that retain their validity today. The different approaches to 'tailored' cutting are described under three headings: bespoke cutting, engineered cutting and style cutting. The rich heritage of the latter came from the tremendous creativity that was unleashed by women's emancipation at the beginning of the twentieth century and the merging of tailored styles with fashionable clothing. The section on style cutting has therefore derived some of the cutting techniques from that period, thus demonstrating how they can be applied to current methods of production.
