A FINANCIAL TIMES BOOK OF THE MONTH FROM THE WALL STREET JOURNAL: "Nothing Mr. Gilder says or writes is ever delivered at anything less than the fullest philosophical decibel Mr. Gilder sounds less like a tech guru than a poet, and his words tumble out in a romantic cascade." "Google's algorithms assume the world's future is nothing more than the next moment in a random process. George Gilder shows how deep this assumption goes, what motivates people to make it, and why it's wrong: the future depends on human

action.” — Peter Thiel, founder of PayPal and Palantir Technologies and author of *Zero to One: Notes on Startups, or How to Build the Future The Age of Google*, built on big data and machine intelligence, has been an awesome era. But it’s coming to an end. In *Life after Google*, George Gilder—the peerless visionary of technology and culture—explains why Silicon Valley is suffering a nervous breakdown and what to expect as the post-Google age dawns. Google’s astonishing ability to “search and sort” attracts the entire world to its search engine and countless other goodies—videos, maps, email, calendars....And everything it offers is free, or so it seems. Instead of paying directly, users submit to advertising. The system of “aggregate and advertise” works—for a while—if you control an empire of data centers, but a market without prices strangles entrepreneurship and turns the Internet into a wasteland of ads. The crisis is not just economic. Even as advances in artificial intelligence induce delusions of omnipotence and transcendence, Silicon Valley has pretty much given up on security. The Internet firewalls supposedly protecting all those passwords and personal information have proved hopelessly permeable. The crisis cannot be solved within the current computer and network architecture. The future lies with the “cryptocosm”—the new architecture of the blockchain and its derivatives. Enabling cryptocurrencies such as bitcoin and ether, NEO and Hashgraph, it will provide the Internet a secure global payments system, ending the aggregate-and-advertise Age of Google. Silicon Valley, long dominated by a few giants, faces a “great unbundling,” which will disperse computer power and

commerce and transform the economy and the Internet. Life after Google is almost here. For fans of "Wealth and Poverty," "Knowledge and Power," and "The Scandal of Money."

Inspired by the Simple Sabotage Field Manual released by the Office of Strategic Services in 1944 to train European resistors, this is the essential handbook to help stamp out unintentional sabotage in any working group, from major corporations to volunteer PTA committees. In 1944, the Office of Strategic Services (OSS)—the predecessor of today's CIA—issued the Simple Sabotage Field Manual that detailed sabotage techniques designed to demoralize the enemy. One section focused on eight incredibly subtle—and devastatingly destructive—tactics for sabotaging the decision-making processes of organizations. While the manual was written decades ago, these sabotage tactics thrive undetected in organizations today: Insist on doing everything through channels. Make speeches. Talk as frequently as possible and at great length. Refer all matters to committees. Bring up irrelevant issues as frequently as possible. Haggle over precise wordings of communications. Refer back to matters already decided upon and attempt to question the advisability of that decision. Advocate caution and urge fellow-conferrees to avoid haste that might result in embarrassments or difficulties later on. Be worried about the propriety of any decision. Everyone has been faced with someone who has used these tactics, even when they have meant well. Filled with proven strategies and techniques, this brief, clever book

outlines the counter-sabotage measures to detect and reduce the impact of these eight classic sabotage tactics to improve productivity, spur creativity, and engender better collegial relationships.

Hydrogen Fuel Cells for Road Vehicles addresses the main issues related to the application of hydrogen fuel cell technology in the road transportation sector. A preliminary treatment is given on fuel resources and atmospheric pollution concerns which are closely related to the current technology (internal combustion engine) used for moving people and goods. The authors deal, in particular, with the problems that can hinder a widespread hydrogen market (production, storage and distribution), as well as giving an analysis of fuel cell technologies available for utilization of this energy carrier in the automotive field. Hydrogen Fuel Cells for Road Vehicles also examines the concerns faced during the design and realization of a PEM fuel cell system with optimal size and efficiency, evidencing the impact of the individual auxiliary components on energy losses and dynamic stack performance. The book ends with the analysis of two practical case studies on fuel cell propulsion systems. Hydrogen Fuel Cells for Road Vehicles is a useful text for researchers, professionals and advanced students in the fields of automotive and environmental engineering.

Soul Stories is an exploration of the boundaries of narrative within health and healing in the context of trauma and homelessness. It draws upon scholarly research across a range of disciplines, and is informed by Ensign's thirty years' experience as a nurse providing health care to people marginalized by poverty and homelessness, by her personal journey through homelessness as a young adult, and by her experience of teaching critical reflective practice to health science students. Soul Stories deepens our understanding of homelessness; trauma and resilience; gender-based violence; the role of narrative in health and healing; and ways we can humanize health care for patients, providers, and communities. It contributes to civically and community-engaged scholarship in the health humanities.

“[These stories] vibrate with originality, queerness, sensuality and the strange.”—Roxane Gay “In these formally brilliant and emotionally charged tales, Machado gives literal shape to women’s memories and hunger and desire. I couldn’t put it down.”—Karen Russell In *Her Body and Other Parties*, Carmen Maria Machado blithely demolishes the arbitrary borders between psychological realism and science fiction, comedy and horror, fantasy and fabulism. While her work has earned her comparisons to Karen Russell and Kelly Link, she has a voice that is all her own. In this electric and provocative debut, Machado bends genre to shape startling narratives that map the realities of women’s lives and the violence visited upon their bodies. A wife refuses her husband’s entreaties to remove the green ribbon from around her neck. A woman recounts her sexual encounters as a plague slowly consumes humanity. A salesclerk in a mall makes a horrifying discovery within the seams of the store’s prom dresses. One woman’s surgery-induced weight loss results in an unwanted houseguest. And in the bravura novella “Especially Heinous,” Machado reimagines every episode of *Law & Order: Special Victims Unit*, a show we naïvely assumed had shown it all, generating a phantasmagoric police procedural full of doppelgängers, ghosts, and girls with bells for eyes. Earthy and otherworldly, antic and sexy, queer and caustic, comic and deadly serious, *Her Body and Other Parties* swings from horrific violence to the

most exquisite sentiment. In their explosive originality, these stories enlarge the possibilities of contemporary fiction.

A woman contemplates suicide as her best friend lies dying. A touching graveside ritual keeps love alive. The cracks in a long-time marriage are revealed when the scotch runs out. A young couple experience the ecstasy and agony of first love. A Month of Sundays shines a light on our most vulnerable moments and finds the grace and dignity within. There is beauty in survival, in knowing we can overcome. We suffer unbearable losses, love the wrong people, and make a mess of our lives, but we go on. Some of the most important moments happen when we are raw and exposed. This collection of a dozen stories explores those dark corners that define us, the emotional spaces we prefer to avoid.

American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the

world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instil this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, Made in Korea takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.

Ebony Trade: Homies on the DL

On the surface, John and George Esseff seem to have traveled very different paths in life: George as a successful scientist, entrepreneur, and philanthropist with a wife, children, and grandchildren; John as a celibate priest whose life has been spent mostly with the poor. But from their humble beginnings in Depression-era Wilkes-Barre, PA to this day, the Esseff brothers' lives have been very much intertwined. Their shared story takes us from the poorest places on the planet to the bastions of wealth and power, with these remarkable men touching and changing lives all along the way. Gripping and inspirational, this book is the story of faith made real in the lives of two men who are BROTHERS & FATHERS.

Hi and Lois was created in 1954 by Mort Walker and Dik Browne. This classic American comic strip has been entertaining newspaper readers for over five decades. The stars of the feature -- Hi, Lois, Chip, Dot, Trixie, and Dawg Flagston -- provide a warm, loving portrait of a wholesome family with traditional values and modern-day sensibilities. In today's often dysfunctional world, the Flagstons put the "fun" into functional family. Whether it's busy parents juggling jobs and raising a family, a teen coping with self-image, sibling rivalry among the youngsters, or a toddler learning about her place in the world, Hi and Lois has kept pace with mainstream life. The first Hi and Lois Sunday page was released on October 14, 1956. Mort and Dik always looked on these weekly instalments as an opportunity to showcase their best work. To them, a Sunday page was more than just an expanded daily strip. Mort would challenge Dik with ideas that inspired him to create a graphic masterpiece. Childhood fantasies, nostalgia trips, seasonal strolls, summer vacations, and holiday celebrations were among the many recurrent themes explored in these episodes.
