Daring and defiant there's no stopping diver Hawk Ridley as he takes the plunge into a briny world of untold riches and danger. The Caribbean is a fortune hunter's dream, salted with the gold of galleons long ago claimed by the deep. Now Hawk's headed for the Windward Passage of Haiti to stake his claim. But a rival team has also picked up the scent, and they're willing to turn the sea red with blood to get to the gold first. Fighting off ruthless competitors is nothing new to Hawk but fighting off a beautiful woman is a different story. Is she an innocent stowaway or a seductive saboteur? Between the cool millions lying on the bottom of the ocean, and the boiling-hot race to grab it, Hawk's about to find the answer and make a discovery Twenty Fathoms Down that will blow you out of the water. Photographer's Guide to the Nikon Coolpix P520

This book is a complete guide to the operation and features of the Nikon Coolpix P520 compact digital camera. The book explains all shooting modes, menus, functions, and controls of this superzoom camera in clear language, accompanied by more than 300 full-color illustrations and sample photographs. This user's guide shows beginning and intermediate photographers not only how to capture still images and videos with the Coolpix P520, but when and why to use the camera's many shooting options to get the results they want. The book does not assume specialized knowledge by the reader as it explains topics such as autofocus, manual focus, depth of field, aperture priority, shutter priority, HDR (High Dynamic Range) photography, ISO, memory cards, and flash modes. The book includes a detailed discussion of techniques for using the camera's phenomenal zoom lens, with a maximum focal length of 1000mm, to full advantage. The book also discusses the camera's features for using its built-in GPS tracking to map locations of images and to identify landmarks and other points of interest that can be recorded along with photographs. The book includes examples of the images that can be taken using the many creative settings of the camera, including the Picture Control settings, which let the photographer alter the color processing of images; the Scene and Special Effects shooting modes, with settings that are optimized for various subjects, including landscapes, portraits, pets, sunsets, and action shots; and the camera's strong set of features for continuous (burst) shooting and interval shooting. In addition, the book goes beyond the realm of everyday photography, and provides introductions to more advanced topics such as infrared photography, street photography, and macro photography. The book also includes a full discussion of the video recording abilities of the Coolpix P520, which can shoot high-definition (HD) video with stereo sound, and which has special settings for recording short clips of high-speed video at rates up to 4 times normal speed. In addition, the book provides a detailed explanation of procedures for playing back images and videos in the camera and for using the camera's Filter Effects option to add special effects to images after they

have been captured. In three appendices, the book provides information about accessories that can be used with the Coolpix P520, including cases, external flash units, and the Nikon Wireless Mobile Adapter, which lets the user transfer images wirelessly from the camera to a smartphone. The appendices also include a list of useful web sites and other resources for further information, as well as a section with "quick tips" that help the user take advantage of the camera's features in the most efficient ways possible.

When it comes to photography, it's all about the light. After spending more than thirty years behind the lens—working for National Geographic, Time, Life, and Sports Illustrated—Joe McNally knows about light. He knows how to talk about it, shape it, color it, control it, and direct it. Most importantly, he knows how to create it using small hot shoe flashes. In *The Hot Shoe Diaries*, Joe brings you behind the scenes to candidly share his lighting solutions for a ton of great images. Using Nikon Speedlights, Joe lets you in on his uncensored thought process—often funny, sometimes serious, always fascinating—to demonstrate how he makes his pictures with these small flashes. Whether he's photographing a gymnast on the Great Wall, an alligator in a swamp, or a fire truck careening through Times Square, Joe uses these flashes to create great light that makes his pictures sing.

There are currently thousands of amateur astronomers around the world engaged in astrophotography at a sophisticated level. Their ranks far outnumber professional astronomers doing the same and their contributions both technically and artistically are the dominant drivers of progress in the field today. This book is a unique collaboration of individuals world-renowned in their particular area and covers in detail each of the major sub-disciplines of astrophotography. This approach offers the reader the greatest opportunity to learn the most current information and the latest techniques directly from the foremost innovators in the field today. "Lessons from the Masters" includes a brilliant body of recognized leaders in astronomical imaging, assembled by Robert Gendler, who delivers the most current, sophisticated and useful information on digital enhancement techniques in astrophotography available today. Each chapter focuses on a particular technique, but the book as a whole covers all types of astronomical image processing, including processing of events such as eclipses, using DSLRs, and deep-sky, planetary, widefield, and high resolution astronomical image processing. Recognized contributors include deep-sky experts such as Jay GaBany, Tony Hallas, and Ken Crawford, high-resolution planetary expert Damian Peach, and the founder of TWAN (The World at Night) Babak A. Tafreshi. A large number of illustrations (150, 75 in color) present the challenges and accomplishments involved in the processing of astronomical images by enthusiasts.
