Intimate Relationships

Popular myths about love set us up for a struggle with real life. The inconvenient truth is there's no such thing as a perfect partner, all couples fight, and feelings of love come and go like the weather. But that doesn't mean you can't have a joyful and romantic relationship. Through a simple program based on the revolutionary new mindfulness-based acceptance and commitment therapy (ACT), you can learn to handle painful thoughts and feelings more effectively and engage fully in the process of living and loving together.

Abnormal and clinical psychology courses are offered in psychology programs at universities worldwide, but the most recent major encyclopedia on the topic was published many years ago. Although general psychology handbooks and encyclopedias include essays on abnormal and clinical psychology, such works do not provide students with an accessible reference for understanding the full scope of the field. The SAGE Encyclopedia of Abnormal and Clinical Psychology, a 7-volume, A-Z work (print and electronic formats), will be such an authoritative work. Its more than 1,400 entries will provide information on fundamental approaches and theories, various mental health disorders, assessment tools and psychotherapeutic interventions, and the social, legal, and cultural frameworks that have contributed to debates in abnormal and clinical psychology. How the White Trash Zombie Got Her Groove Back

In *Thrive*, Arianna Huffington makes an impassioned and compelling case for the need to redefine what it means to be successful in today's world. Arianna Huffington's personal wake-up call came in the form of a broken cheekbone and a nasty gash over her eye--the result of a fall brought on by exhaustion and lack of sleep. As the cofounder and editor-in-chief of the Huffington Post Media Group--one of the fastest growing media companies in the world--celebrated as one of the world's most influential women, and gracing the covers of magazines, she was, by any traditional measure, extraordinarily successful. Yet as she found herself going from brain MRI to CAT scan to echocardiogram, to find out if there was any underlying medical problem beyond exhaustion, she wondered is this really what success feels like? As more and more people are coming to realize, there is

far more to living a truly successful life than just earning a bigger salary and capturing a corner office. Our relentless pursuit of the two traditional metrics of success--money and power--has led to an epidemic of burnout and stress-related illnesses, and an erosion in the quality of our relationships, family life, and, ironically, our careers. In being connected to the world 24/7, we're losing our connection to what truly matters. Our current definition of success is, as Thrive shows, literally killing us. We need a new way forward. In a commencement address Arianna gave at Smith College in the spring of 2013, she likened our drive for money and power to two legs of a three-legged stool. They may hold us up temporarily, but sooner or later we're going to topple over. We need a third leg--a third metric for defining success--to truly thrive. That third metric, she writes in Thrive, includes our well-being, our ability to draw on our intuition and inner wisdom, our sense of wonder, and our capacity for compassion and giving. As Arianna points out, our eulogies celebrate our lives very differently from the way society defines success. They don't commemorate our long hours in the office, our promotions, or our sterling PowerPoint presentations as we relentlessly raced to climb up the career ladder. They are not about our resumes--they are about cherished memories, shared adventures, small kindnesses and acts of generosity, lifelong passions, and the things that made us laugh. In this deeply personal book, Arianna talks candidly about her own challenges with managing time and prioritizing the demands of a career and raising two daughters--of juggling business deadlines and family crises, a harried dance that led to her collapse and to her "aha

moment." Drawing on the latest groundbreaking research and scientific findings in the fields of psychology, sports, sleep, and physiology that show the profound and transformative effects of meditation, mindfulness, unplugging, and giving, Arianna shows us the way to a revolution in our culture, our thinking, our workplace, and our lives.

shown by young adults while in the throes of divorce and in the years to follow. These poignant narratives are framed by an analysis of the most recent divorce literature. The book clearly demonstrates the value of storytelling in helping people deal with major loss events in their lives. The authors' hope is that by examining these experiences, we will gain a greater understanding of the effects of divorce and ultimately strengthen relationships in the future. This book challenges the contention that most children will be irretrievably hurt by their parents' divorce. Presenting a mixture of young people's voices demonstrating the great variety of reactions to parental divorce, it shows the strength and resilience many of these young people have learned in surviving the pain surrounding divorce in their families. Emphasis is placed on how hope about the possibilities of having close relationships--as well as a willingness to try to have stronger families in their own adult lives--represent abiding motivations in this sample of young people. Providing an overarching theoretical emphasis on the value of storytelling for people dealing with major losses, the authors hope that this method of stressing the raw input of respondents will make the experiences more vivid and realistic to the reader.

Guys Have All the Fun. The movies you watch, the TV shows you adore, the concerts and sporting events you attend—behind the curtain of nearly all of these is an immensely powerful and secretive corporation known as Creative Artists Agency. Started in 1975, when five bright and brash employees of a creaky William Morris office left to open their own, strikingly innovative talent agency, CAA would come to revolutionize the entertainment industry, and over the next several decades its tentacles would spread aggressively throughout the worlds of movies, television, music, advertising, and investment banking. Powerhouse is the fascinating, no-holds-barred saga of that ascent. Drawing on unprecedented and exclusive access to the men and women who built and battled with CAA, as well as financial information never before made public, author James Andrew Miller spins a tale of boundless ambition, ruthless egomania, ceaseless empire building, greed, and personal betrayal. It is also a story of prophetic brilliance, magnificent artistry, singular genius, entrepreneurial courage, strategic daring, foxhole brotherhood, and how one firm utterly transformed the entertainment business. Here are the real Star Wars—complete with a Death Star—told through the voices of those who were there. Packed with scores of stars from movies, television, music, and sports, as well as a tremendously compelling cast of agents, studio executives, network chiefs, league commissioners, private equity partners, tech CEOs, and media tycoons, Powerhouse is itself a Hollywood blockbuster of the most spectacular sort.

How to Love a Jamaican

In *Intimate Relationships in China in the Light of Depth Psychology: A Study of Gender and Integrity*, Huan Wang presents an overview of Jungian ideas as they apply to gender roles and relationships in contemporary Chinese culture. Moving beyond a Western interpretation of key concepts, Wang attempts to understand and deal with the difficulties of contemporary marriages in a rapidly changing society, investigating how young Chinese couples have been affected by traditional values, Westernisation, and the one-child policy. Wang also discusses how depth psychology has developed and been applied in China, highlighting how it differs in Chinese and Western settings and the problems and achievements Chinese people have faced. She concludes that the Chinese psyche today is experiencing a transition from the compliance of collectivism to the awareness of individuation, and that the rediscovery of the notion of integrity will help Chinese therapists to find their way, make young Chinese people independent individuals, and bring a new approach to their marriages. This is the first time such issues have been profoundly and comprehensively discussed in a Chinese context. It will be an invaluable resource for analytical psychologists, psychotherapists, and marriage and family and couple therapists working in China or with Chinese clients. It will also be of great interest to academics and students of Jungian and post-Jungian studies and to anyone interested in the psyche of contemporary China.

This book is a comprehensive survey of our scientific knowledge about human intelligence, written by a researcher who has spent more than 30 years studying the field, receiving a Lifetime Contribution award from the International Society for Intelligence. Human Intelligence takes a non-ideological view of a topic in which, too often, writings are dominated by a single theory or social viewpoint. The book discusses the conceptual status of intelligence as a collection of cognitive skills that include, but also go beyond, those skills evaluated by conventional tests; intelligence tests and their analysis; contemporary theories of intelligence; biological and social causes of intelligence; the importance of intelligence in social, industrial, and educational spheres; the role of intelligence in determining success in life, both inside and outside educational settings; and the nature and causes of variations in intelligence across age, gender, and racial and ethnic groups.

Renowned primatologist Robert Sapolsky offers a completely revised and updated edition of his most popular work, with over 225,000 copies in print. Now in a third edition, Robert M. Sapolsky's acclaimed and successful *Why Zebras Don't Get Ulcers* features new chapters on how stress affects sleep and addiction, as well as new insights into anxiety and personality disorder and the impact of spirituality on managing stress. As Sapolsky explains, most of us do not lie awake at night worrying about whether we have leprosy or malaria. Instead, the diseases we fear—and the ones that plague us now—are illnesses brought on by the slow accumulation of damage, such as heart disease and cancer. When we worry or experience

stress, our body turns on the same physiological responses that an animal's does, but we do not resolve conflict in the same way—through fighting or fleeing. Over time, this activation of a stress response makes us literally sick. Combining cutting-edge research with a healthy dose of good humor and practical advice, *Why Zebras Don't Get Ulcers* explains how prolonged stress causes or intensifies a range of physical and mental afflictions, including depression, ulcers, colitis, heart disease, and more. It also provides essential guidance to controlling our stress responses. This new edition promises to be the most comprehensive and engaging one yet.

Aversive behaviors have greater influence on social interactions than is generally acknowledged, determining personal satisfaction, interpersonal attraction, choice of partners, and the course of relationships. What motivates aversive behaviors? To what extent do they obtain desired outcomes? In what ways are they unnecessary and destructive? How do other people respond, emotionally and behaviorally? These are just a few of the many interesting questions addressed by the 16 respected researchers who contribute to *Aversive Interpersonal Behaviors*. Nine chapters give this heretofore neglected subject the attention it is due, probing a dark side of interpersonal relationships to understand both its destructive and adaptive nature.

The SAGE Encyclopedia of Abnormal and

David A. Kenny's pioneering contribution takes a social relations approach to basic questions of person perception in social interaction. Enlightening and provocative, this volume provides a comprehensive theoretical overview of "interpersonal perception," a field of research that holds great promise for shedding light on social behavior. Blending meticulous analysis with thoughtful interpretation, the book demonstrates how interpersonal perception enhances the traditional study of person perception by capturing the richness of social behavior. To introduce the topic, Kenny clearly explicates the differences between person perception and interpersonal perception, showing that while the traditional paradigm is guided by descriptions of hypothetical people, interpersonal perception takes into account the bidirectional reality of dyadic interaction. The book addresses three fundamentally different types of perceptions: * How we see other people * How we see ourselves * How we think we are seen by others Nine different questions are based on the relationships among these perceptions. To answer these questions, the author sets forth the Social Relations Model, a research paradigm that posits people as both perceivers and targets. The model is flexible in that it allows for the possibility of meta- and self-perception, and it considers the impact of particular interactions with another on an individual's behavioral changes. The collection, interpretation, analysis, and summary of data are covered here in depth. The main body of the work examines specific theoretical issues within

interpersonal perception. Devoting one chapter to each issue--labeled assimilation, consensus, uniqueness, reciprocity, target accuracy, assumed reciprocity, meta-accuracy, assumed similarity, and self-other agreement--Kenny presents the relevant research evidence for each one. The book concludes with a synthesis of the major issues, an examination of the links between behavior and perception, and a discussion of the insights the available evidence can yield about social relations. This unique volume is invaluable reading for all social scientists interested in person perception. Offering the first available overview of this significant new field of research, *Interpersonal Perception* is also an important text for courses on the subject.

How much control do we have over love? Much less than we like to think. All that mystery, all that poetry, all those complex behaviors surrounding human bonding leading to the most life-changing decisions we'll ever make, are unconsciously driven by a few molecules in our brains. How does love begin? How can two strangers come to the conclusion that it would not only be pleasant to share their lives, but that they must share them? How can a man say he loves his wife, yet still cheat on her? Why do others stay in relationships even after the romance fades? How is it possible to fall in love with the "wrong" person? How do people come to have a "type"? Physical attraction, jealousy, infidelity, mother-infant bonding—all the behaviors that so often leave us befuddled—are now being teased out of the fog of mystery thanks to today's social neuroscience. Larry Young, one of the world's leading experts in the field, and journalist Brian Alexander explain how those findings apply to you. Drawing on real human stories and research from labs around the world, *The Chemistry Between Us* is a bold attempt to create a "grand unified theory" of love. Some of the mind-blowing insights include: Love can get such a grip on us because it is, literally, an addiction. To a woman falling in love, a man is like her baby. Why it's false to say society makes gender, and how it's possible to have the body of one gender and the brain of another. Why some people are more likely to cheat than others. Why we sometimes truly can't resist temptation. Young and Alexander place their revelations into historical, political, and social contexts. In the process, they touch on everything from gay marriage to why single-mother households

This textbook introduces the reader to the new and emerging field of Conservation Psychology, which explores connections between the study of human behavior and the achievement of conservation goals. People are often cast as villains in the story of environmental degradation, seen primarily as a threat to healthy ecosystems and an obstacle to conservation. But humans are inseparable from natural ecosystems. Understanding how people think about, experience, and interact with nature is crucial for promoting environmental sustainability as well as human well-being. The book first summarizes theory and research on human cognitive, emotional, and behavioral responses to nature and goes on to review research on people's experience of nature in wild, managed, and urban settings. Finally, it examines ways to encourage conservation-oriented behavior at both individual and societal levels. Throughout, the authors integrate a wide body of published literature to demonstrate how and why psychology is relevant to promoting a more sustainable relationship between humans and nature.

A colleague recently recounted a conversation she had had with a group of graduate students. For reasons that she cannot recall, the discussion had turned to the topic of "old-fashioned" ideas in psychology—perspectives and beliefs that had once enjoyed widespread support but that are now regarded as quaint curiosities. The students racked their brains to outdo one of the historical trivia of psychology: Le Bon's another with their knowledge fascination with the "group mind," Mesmer's theory of animal magnetism, the short-lived popularity of "moral therapy," Descartes' belief that erections are maintained by air from the lungs, and so on. When it came his turn to contribute to the discussion, one student brought up an enigmatic journal he had seen in the library stacks: the Journal of Abnormal and Social Psychology. He thought that the inclusion of abnormal and social psychology within the covers of a single journal seemed an odd combination, and he wondered aloud what sort of historical quirk had led psychologists of an earlier generation to regard these two fields as somehow related. Our colleague then asked her students if they had any ideas about how such an odd combination had found its way into a single journal.

experimental study of mechanisms by its natural science wing and as a study of cultural interactions by its social science wing. To learn about it, one should visit laboratories, field study settings, and clinics, and one should read widely. If one adds the fourth dimension, time, one should visit the archives too. To survey such a diverse field, it is common to offer an edited book with a resulting loss in integration. This book is coauthored by a social personality psychologist with historical interests (DFB: Parts I, II, and IV) in collaboration with two social clinical psychologists (CRS and JEM: Parts III and V). We frequently cross-reference between chapters to aid integration without duplication. To achieve the kind of diversity our subject matter represents, we build each chapter anew to reflect the emphasis of its content area. Some chapters are more historical, some more theoretical, some more empirical, and some more applied. All the chapters reflect the following positions.

The fifth edition of Segal, Gerdes, and Steiner's AN INTRODUCTION TO THE PROFESSION OF SOCIAL WORK provides a balanced introduction to the social work profession and helps students to understand the role that the profession plays in the social welfare system. The authors' supportive tone and experiential approach inspires interest in and enthusiasm toward future careers in social work. Case studies, personal stories, and exercises help students apply the concepts and truly understand what it means to be a social worker. The book is designed to encourage both knowledge building and self-exploration-skills that are essential in developing good social work practice. Part of the Brooks/Cole Empowerment Series, the fifth edition is completely up to date and thoroughly integrates the core competencies and recommended practice behaviors outlined in the most recent Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE). Intimate Relationships

“In these kaleidoscopic stories of Jamaica and its diaspora we hear many voices at once: some cultivated, some simple, some wickedly funny, some deeply melancholic. All of them shine.”—Zadie Smith Named one of Entertainment Weekly’s “Hot Summer Reads of 2018” and BuzzFeed’s “Summer Books to Get Excited About” Tenderness and cruelty, loyalty and betrayal, ambition and regret—Alexia Arthurs navigates these tensions to extraordinary effect in her debut collection about Jamaican immigrants and their families back home. Sweeping from close-knit island communities to the streets of New York City and midwestern university towns, these eleven stories form a portrait of a nation, a people, and a way of life. In “Light-Skinned Girls and Kelly Rowlands,” an NYU student befriends a fellow Jamaican whose privileged West Coast upbringing has blinded her to the hard realities of race. In “Mash Up Love,” a twin’s chance sighting of his estranged brother—the prodigal son of the family—stirs up unresolved feelings of resentment. In “Bad Behavior,” a couple leave their wild teenage daughter with her grandmother in

Jamaica, hoping the old ways will straighten her out. In “Mermaid River,” a Jamaican teenage boy is reunited with his mother in New York after eight years apart. In “The Ghost of Jia Yi,” a recently murdered student haunts a despairing Jamaican athlete recruited to an Iowa college. And in “Shirley from a Small Place,” a world-famous pop star retreats to her mother’s big new house in Jamaica, which still holds the power to restore something vital. Alexia Arthurs emerges in this vibrant, lyrical, intimate collection as one of fiction’s most dynamic and essential authors. Advance praise for *How to Love a Jamaican* “Arthurs’s debut collection of short stories is an impressive, fully realized work that grapples with Jamaican womanhood. . . . Arthurs offers a compassionate response with these tender portraits of hard women, lost girls, and the people who love them.”—The Village Voice “In vibrant, evocative prose, Arthurs brings these characters, and their varied experiences of a shared home, to life.”—BuzzFeed “Alexia Arthurs is a writer of beauty, wit, and precision; these stories will grab you by the heart. This is a boss collection.”—NoViolet Bulawayo, author of *We Need New Names*
