The Cowboy Imports a Bride

As a nation of immigrants, the American experience is vibrantly defined by the diverse racial, ethnic, cultural, and religious heritage of its people. Perhaps because so many of their ancestors migrated to this country relatively recently, Americans are especially concerned with their family trees, carving out personal histories by combing through documents such as wills and estate records, federal and state censuses, and private family papers, and mining the stories and tales handed down to them by their forebears. Since 2007, the Harvard scholar Henry Louis Gates, Jr., has been helping African Americans find long-buried details about their ancestors by researching their family trees and then, when the paper trail ends, by analyzing their DNA and marrying that information to a wealth of historical data. Now, in *Faces of America* Gates explores the family trees of twelve of America's most recognizable and extraordinary citizens, individuals who learn that they are of Asian, English, French, German, Irish, Italian, Jamaican, Jewish, Latino, Native American, Swiss, and Syrian ancestry: Inaugural poet Elizabeth Alexander, chef Mario Batali, comedian and television personality Stephen Colbert, writer Louise Erdrich, writer Malcolm Gladwell, actress Eva Longoria, cellist Yo Yo Ma, writer and director Mike Nichols, former monarch of Jordan Queen Noor, surgeon and author Dr. Mehmet Oz, actress Meryl Streep, and Olympic gold medalist and figure skater Kristi Yamaguchi. In addition, each of the subjects in *Faces of America* underwent dense genotyping to trace their genetic ancestry on their father's line, their mother's line, and their percentages of European, Asian, Native American, and African ancestry. *Faces of America* unfolds as a riveting journey into our country's complex ancestral past. Readers will share in the surprise and delight, the shock and sadness of these twelve individuals themselves as Gates unveils their rich family stories, traced back to their arrival on America's shores, and beyond, deep into the history of their ancestors' countries of origin. America, as Gates shows us, is a nation of many historical threads, interwoven and united in the present moment. In this compelling book, Gates demonstrates that where we come from profoundly and fundamentally informs who we are today.

Half-Scrap Quilts

From Nicole Helm, the author of the national bestselling Stone Cold, Navy Seal Cowboys, and Big Sky Cowboys series! In Colorado's glorious big-sky country, everything is done with cowboy flair—even boot-stomping, hat-tipping cowboy weddings . . . As the middle Tyler brother, Gavin doesn't always have much say in ranch decisions, but when it comes to his heart, he's the only authority. He's loved Louisa "Lou" Fairchild for longer than he can remember, even though they've

never been more than friends. But with Lou stuck between the proverbial rock and hard place, Gavin is going to help the way any true friend would—with a proposal of a strictly business-like, in-name-only marriage . . . at least to start. Lou can't believe her beloved grandmother has backed her up against the wall. The choice between finding a man to marry and letting her no-good father back into the family to run the ranch isn't a choice at all! But when her sister counters with an even less savory idea, Lou knows what she must do—say yes to the only man she's ever trusted. But somehow pretending to be in love with good-natured Gavin suddenly begins to feel alarmingly real—and she downright likes it. Can a sham marriage become the truest kind of love? Praise for Nicole Helm's previous romances "Perfect for fans of Susan Mallery and Jill Shalvis."—Kirkus Reviews "A deeply moving contemporary. . . . The protagonists are refreshingly willing to be up front about their feelings and listen to each other, and readers will want to revisit their story often." —Publishers Weekly

Drawn from the Pied Piper tale, this exciting new trilogy by the author of *Powerless* is brimming with adventure, mystery, and rats! It is said that in the thirteenth century, in a village called Hamelin, a piper lured all of the children away with his magical flute, and none of them were ever seen again. Today though, pink-haired Max and her little brother, Carter, are stuck in modern-day Hamelin with their father . . . until they are also led away by the Piper to a place called the Summer Isle. There they meet the original stolen children, who haven't aged a day and who have formed their own village, vigilantly guarded from the many nightmarish beings that roam the land. No one knows why the Piper stole them, but Max and Carter's appearance may be the key to returning the lost children of Hamelin—and to going home themselves. But to discover the secrets of the Piper, Max and Carter will have to set out on a mysterious quest down the dangerous Peddler's Road.

The Two Faces of Islam

Introduction Sales is first and foremost the art of persuasion. A salesperson persuades someone to part with his or her money in exchange for a product or service. This is done by convincing the customer that he wants the product or service more than he wants his own money. Often this is a formidable task because the goods and services offered by professional salespeople usually cost a lot of money. The good news for the salesperson is that the approach used can significantly improve the odds of success. Like any profession, a sales job becomes a lot easier once you learn the tricks of your trade. I believe that how well a salesperson learns the tricks of the trade can have a big effect on his success, income and career. The degree of success can also affect the salespersons happiness, family life and sense of self-worth. I am convinced that learning these tricks can be financially rewarding and prudent for any salespersons career. Perhaps Wesley Autrey, a New York construction worker, understood achievement best when he simply said; Good things happen when you do good. This book is designed to help you do a good job at selling people things. It describes, explains, and provides examples of the best tricks of the trade I have used in the real world for over twenty-five-years in my sales career. Several (but not all) tricks of the trade require specific rhetorical techniques. In those cases, I will explain the recommended rhetorical procedure as well. When needed, I will explain what questions a salesperson should ask, when to ask these questions, and why we ask these particular questions. I will explain not only the tricks of the trade but I will explain when and why we use specific tricks. I will also do my best to explain how and why these tricks actually work. All the tricks will work for most products and services sales professional typically are asked to sell. They work for inside salespeople as well as outside sales representatives. I have years of experience in both types of sales and the tricks in this book are important and valuable regardless of your sales environment. My own career attests to how well these tricks of the trade can succeed. Because I have used them while working for some of the largest corporations in America, I have frequently won incentive trips to wonderful resorts in the United States as well as those in Cancun, the Bahamas and even Europe. My goal in this book is to suggest ways in which salespeople at any stage of their careers can improve their techniques, hone their strategies, and ultimately, succeed more fully in sales. Vernon Law once warned: Experience is the worst teacher; it gives the test before presenting the lesson. In this book I am going to try to change the natural order of things. This book is designed to give you the lessons first, thereby leveling the playing field between rookies and experienced salespeople. The way I am going to do that is by letting out the secrets I have learned in the real world to everybody in this book. Over the course of my career, I have been to several conferences set up to train the beginning salesperson. This book takes what I have learned in those classes to a more advanced level with concrete suggestions based on my years of actual sales experience. As a result, this book is designed to benefit both novice and experienced salespeople. While each chapter focuses on a different fundamental principle of selling, I also give a very practical spin to what else---in addition to fundamentals---salespeople should understand. This book explains not only how to make a great presentation but all the other things you need to know to be an effective salesperson. Let me give you an example of the type of insight you can expect to gain by reading this

book. Usually the first thing a new salesperson receives is training on how to explain what eventually he is supposed to be selling. This includes a detail

Her books *Pieced Hexies*, *Ring Around the Hexies*, and *Pieced Hexies Deux* served as door openers to this latest book filled with half-scrappy, traditional pieced patterns. After all, it is Mickey's saying that there is enough fabric in the studio to make both art and traditional quilts.

Turners: 1, Coopers: 1 Lance Cooper knows he shouldn't try to escape his present problems by focusing on the past, but running Chance Creek's Fourth of July Revolutionary War re-enactment is far easier than sorting out his family's long-running feud with the Turners. At least it was until Maya Turner joins the historical society and upsets all his plans. Maya Turner loves history, but Chance Creek's re-enactments are boring—and far too predictable. Everyone knows who won the Revolutionary War, after all. Why shouldn't they inject some drama—and sexy intrigue—into the annual event? It's bad enough Maya's ideas are catching on with the rest of the re-enactment committee. It's worse Lance's heart is betraying him, too. How can he fall for her knowing how her family destroyed his? This book is about one man's fight to turn the tide of low expectations. When Chris Sarra arrived as the first Aboriginal

principal of Cherbourg State School in 1998, it was a time of high hopes but low expectations in Indigenous education. Over the next six years, he transformed the school into a national success story, but not without controversy along the way. From his childhood as the youngest in a large Italian-Aboriginal family, Chris was taught to be proud of who he was and where he came from. But he only began to understand that not every Aboriginal child grew up with this sense of worth when he started working as a teacher. He became determined to defy expectations of being Aboriginal and, in doing so, to change them for others. His role at Cherbourg finally gave him a chance to put his philosophy into practice. Along the way, he battled the media, the education system and a culture of complacency.

Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

The Cowboy's Christmas Baby

This volume in the JPS Series is intended to help crystallize the emergence of a new field, "Developmental Social Cognitive Neuroscience," aimed at elucidating the neural correlates of the development of socio-emotional experience and behavior. No one any longer doubts that infants are born with a biologically based head start in accomplishing their important life tasks—genetic resources, if you will, that are exploited differently in different contexts. Nevertheless, it is also true that socially relevant neural functions develop slowly during childhood and that this development is owed to complex interactions among genes, social and cultural environments, and children's own behavior. A key challenge lies in finding appropriate ways of describing these complex interactions and the way in which they unfold in real developmental time. This is the challenge that motivates research in developmental social cognitive neuroscience. The chapters in this book highlight the latest and best research in this emerging field, and they cover a range of topics, including the typical and atypical development of imitation, impulsivity, novelty seeking, risk taking, self and social awareness, emotion regulation, moral reasoning, and executive function. Also addressed are the potential limitations of a neuroscientific approach to the development of social cognition. Intended for researchers and advanced students in neuroscience and developmental, cognitive, and social psychology, this book is appropriate for graduate seminars and upper-level undergraduate courses on social cognitive neuroscience, developmental neuroscience, social development, and cognitive development.

How to Marry a Cowboy

COULD HE BE HER HERO? Hope, Montana, is no longer home to Andy Granger, who sold his piece of the family ranch to developers. He's only back to run a cattle drive in his brother's stead. And now the developers have cut off water her neighboring ranch desperately needs. She's only on the ride for a paycheck—not to turn her back on her community. The Dead Gentleman

This eye-opening, insightful exploration of Sufism, the spiritual tradition that has supported Islam for more than a thousand years, shows why it offers a promising foundation for reconciliation between the Western and Muslim worlds. Many Americans today identify Islam with maniacal hatred of the West. The Other Islam transforms this image and opens the way to finding common ground in our troubled times. Sufism, a blend of the mystical and rational tendencies within Islam, emerged soon after the revelation of Muhammad. A reforming movement against the increasing worldliness of Muslim society, it focuses on Islam's spiritual dimension. Described as "Islam of the Heart," Sufism has attracted adherents among both Sunni and Shi'a Muslims, as well as Jews, Christians, Hindus, and Buddhists. In *The Other Islam*, Stephen Schwartz traces the origins and history of Sufism, elucidates its teachings, and illustrates its links to the other religions. He comments on such celebrated Sufi poets and philosophers as Rumi and Al-Ghazali, and narrates their influence on the Kabbalah, on the descendants of the Jewish philosopher Maimonides, and on Christian mystics like Saint John of the Cross and Saint Teresa of Ávila as well as the American transcendentalists. Furthermore, Schwartz presents a fresh survey of Sufism in today's Islamic world, anticipating an intellectual renaissance of the faith and alternatives to fundamentalism and tyranny

in Iraq, Saudi Arabia, Turkey, and Iran.

Oracle PL/SQL Language Pocket Reference

In this book, Steven Feuerstein, widely recognized as one of the world's experts on the Oracle PL/SQL language, distills his many years of programming, writing, and teaching about PL/SQL into a set of PL/SQL language "best practices"--rules for writing code that is readable, maintainable, and efficient. Too often, developers focus on simply writing programs that run without errors--and ignore the impact of poorly written code upon both system performance and their ability (and their colleagues' ability) to maintain that code over time. Oracle PL/SQL Best Practices is a concise, easy-to-use reference to Feuerstein's recommendations for excellent PL/SQL coding. It answers the kinds of questions PL/SQL developers most frequently ask about their code: How should I format my code? What naming conventions, if any, should I use? How can I write my packages so they can be more easily maintained? What is the most efficient way to query information from the database? How can I get all the developers on my team to handle errors the same way? The book contains 120 best practices, divided by topic area. It's full of advice on the program development process, coding style, writing SQL in PL/SQL, data structures, control structures, exception handling, program and package construction, and built-in packages. It also contains a handy, pull-out quick reference card. As a helpful supplement to the text, code examples demonstrating each of the best practices are available on the O'Reilly web site. Oracle PL/SQL Best Practices is intended as a companion to O'Reilly's larger Oracle PL/SQL books. It's a compact, readable reference that you'll turn to again and again--a book that no serious developer can afford to be without.
