### **for Asia and the Pacific**

Daniella Logan, daughter of a film impresario, is stunned to see a group of robed men performing a ritual above the newly-turned earth of her father's grave. Daniella's father and his friends--politicians, newspaper magnates, highly-paid actors, top-flight surgeons, high-ranking police officials, and many more--are bound by an unholy blood pact that calls for the sacrifice of their first born children. Now, the more she learns, the more Daniella makes herself a target. But she must not be silenced, for she is not the only firstborn in danger, only the oldest. Chevrolet never intended the Chevelle to be a groundbreaking car. In fact, they intended it to be anything but a ground-breaking car. It may have been conventional, and it may have used old-fashioned technology, but without a doubt the Chevelle was a very, very good car--one of the best of its era. Its body-on-frame design, though nothing radical, made it the perfect platform for harnessing the energy about to be unleashed in the coming horsepower wars. When the dust from the muscle-car era settled, the Chevelle, in LS6 form, reigned supreme as the fastest American car ever built. Its stout full-perimeter frame ensured that the car would handle all that energy and still last for the long haul. The buying public appreciated the Chevelle's simple virtues and responded by making the car an unqualified sales success. In its first year, Chevrolet sold nearly 400,000 Chevelles, outselling the Ford Falcon by nearly 30 percent. When Chevelles disappeared for good after the 1977 model year, Chevrolet had produced over 7.2 million of them.

The Chevelle was built to hold up to anything their owners could throw at them, and hold up they did. The Chevelle had such a high survival rate that today it is one of the most common cars seen at car shows across the country--and one of the most beloved. Chevy Chevelle: Fifty Years celebrates America's half-century love affair with this iconic muscle car. Licensed with General Motors, this book showcases never-before-seen archival Chevelle photography to which Motorbooks was given unprecedented access.

For Harley-Davidson aficionados, the very name Sportster conjures an image of a fire-breathing mechanical beast scorching the world's tarmac image the Sportster itself often does not live up to. Straight from the factory, in its standard form, the Sportster routinely proves an entry-level motorcycle providing a relatively tame ride. This book aims to change all that and to show every Sportster rider how to free the beast in his or her bike. With expert, detailed advice on the proper mechanical massaging and plenty of helpful diagrams and photos this updated, third edition of Buzz Buzzelli's best-selling handbook shows how the Sportster can be transformed into the superbike of old. Including a history of the Sportster from its birth in 1957 to the recent introduction of a new engine (only the third in its long life), this book has everything it takes to open up the gates of hell and give the Sportster its head.

Rarely, if ever, do companies clearly distinguish between or balance the management of today's business and planning for the future. Derek Abell, internationally renowned for his pioneering work on strategic market planning, once again breaks sharply with conventional wisdom to demonstrate how a company can develop analytic marketing modes for not one but two distinct planning horizons. Managing with dual strategies, Abell argues, calls for new approaches not only to planning, but to organizational structure and management control. He makes specific recommendations on how current operating practices need to be adapted, and shows how leading firms are recognizing the dual nature of management as a new way of organizational life. Planning for the present, Abell shows, requires a vision of how the firm must operate now given its unique competencies and resources. By involving each level within the management team from the CEO to financial planners, to line managers, Abell details how firms can pinpoint market opportunities through careful segmentation and identification of key success factors to "connect" with customers. At the same time, he distinguishes the importance of horizontal relationships for defining and focusing on internal strategies, and vertical relationships for being attuned to changing market realities. Success today, he warns, does not ensure success tomorrow. Abell describes how world-class leaders such as Nestlé, Caterpillar, and Heineken monitor both internal and external forces for market change, successfully mastering the present, and preempting the future. Preparing for the future requires understanding the full range of activities industry-wide, and anticipating

changes in technology, buyer/seller behavior, and product life cycles. Abell explains how companies can develop and implement these co-existing visions and address the real forms of change that vitally affect their future -- today and tomorrow.
