Louis A. Arena University of Delaware Newark, DE This monograph contains select, revised, and invited papers which deal
with the topic, Language Proficiency: Defining, Teaching, and Testing. This topic was the theme of the eighth annual

symposium held at the University of Delaware. The papers contained in this volume are invited papers or were originally scheduled for presentation and/or presented at the eighth annual Delaware Symposium on Language Studies. The papers combine research conducted in the areas of teaching, testing, and defining second language proficiency within the profession of applied linguistics. They are divided into three principal sections: "Applied Linguistics and Language Proficiency", "Language Proficiency in Reading and Writing", and "Testing for Language Proficiency". In Part I, Paul Angelis' "Applied Linguistics: Realities and Projections re the Teaching Profession"; sketches a historical portrait of Applied Linguistics, its definition, presence, and role in the profession that teaches second language proficiency. Angelis concludes that Applied Linguistics is still a young discipline in terms of substance, organization, and strategy, and that these three components will determine the prospects for the future of applied linguistics re the teaching profession. The next six papers address the issue of second language proficiency from various points of view. Kensaku Yoshida's essay "Knowing vs Believing vs Feeling: Studies on Japanese Bilinguals" concludes that some Japanese bilinguals are actually not necessarily bilingual because they very often face problems requiring other kinds of proficiency, i. e.

Communication Skills in Pharmacy Practice

Communication Skills in Pharmacy Practice helps pharmacy and pharmacy technician students learn the principles, skills, and practices that are the foundation for clear communication and the essential development of trust with future patients. This text's logical organization guides students from theory and basic principles to practical skills development to the application of those skills in everyday encounters. Sample dialogues show students how to effectively communicate, and practical exercises fine tune their communication skills in dealing with a variety of sensitive situations that arise in pharmacy practice.

This popular, comprehensive theory-to-practice text is designed to help teachers understand the task of writing, L2 writers, the different pedagogical models used in current composition teaching, and reading-writing connections. Moving from general themes to specific pedagogical concerns, it includes practice-oriented chapters on the role of genre, task construction, course and lesson design, writing assessment, feedback, error treatment, and classroom language (grammar, vocabulary, style) instruction. Although all topics are firmly grounded in relevant research, a distinguishing feature of the text is the array of hands-on, practical examples, materials, and tasks that pre- and in-service teachers can use to develop the complex skills involved in teaching second language writing. Each chapter includes Questions for Reflection, Further Reading and Resources, Reflection and Review, and Application Activities. An ideal text for L2 teacher preparation courses, courses that include both L1 and L2 students, and workshops for instructors of L2 writers in academic (secondary and

postsecondary) settings, the accessible synthesis of theory and research enables readers to see the relevance of the field's knowledge base to their own present or future classroom settings and student writers.

Language and Language Behavior Abstracts

The language of young people is central in sociolinguistic research, as it is seen to be innovative and a primary source of knowledge about linguistic change and the role of language. This volume brings together a team of leading scholars to explore and compare linguistic practices of young people in multilingual urban spaces, with analyses ranging from grammar to ideology. It includes fascinating examples from cities in Europe, Africa, Canada and the US to demonstrate how young people express their identities through language, for example in hip-hop lyrics and new social media. This is the first book to cover the topic from a globally diverse perspective, and it investigates how linguistic practices across different communities intersect with age, ethnicity, gender and class. In doing so it shows commonalities and differences in how young people experience, act and relate to the contemporary social, cultural and linguistic complexity of the twenty-first century.

Principles and Practice of Declarative Programming

The Common Core State Standards (CCSS) for English Language Arts (ELA) require students to engage higher level thinking skills and language use to activate their understanding of content/text. They are designed to be academically rigorous for all students, and are especially so for students who are English language learners (ELL). In ELLs: Thinking Skills and CCSS, Dr. Estee Lopez provides evidence-based instructional approaches as well as best practices for helping ELLs meet the CCSS for ELA. The six-page (tri-fold) guide is structured around the six shifts embodied in the CCSS for English Language Arts: 1. Increasing reading of informational text/balancing informational and literary texts 2. Knowledge in the disciplines 3. Staircase of complexity 4. Text-based answers 5. Writing from sources 6. Academic language The guide explains each shift, its implications for ELLs, and what is required of teachers. For each shift, the author lists best practices, examples of scaffolding for ELLs, and things that teachers and administrators must do to create conditions that ensure that ELLs succeed.

Building Vocabulary provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more syllables are of Greek or Latin origin. Instead of learning words and

definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. Building Vocabulary: Foundations for grades 1-2, empowers beginning readers to learn words by identifying word parts or word families that share common sounds. Students will build vocabulary through the use of poetry, word endings, and simple roots. Building Vocabulary: Foundations: Level 1 kit includes: Teacher's Guide; Student Guided Practice Book (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); Assessments to support data-driven instruction; and Digital resources including modeled lessons, 50 bonus activities, and more.

Fundamental Skills for Patient Care in Pharmacy Practice enables students and new pharmacists to master the skills associated with clinical care in either the inpatient or outpatient setting. In accessible steps, this valuable resource provides the tools for gaining medication histories from patients and counseling them on the most effective and safe manner to take medications. Each chapter explores the background and practice of a critical skill, tools that aid in its development and mastery, and tips for success. Students and pharmacists will come away with the knowledge to identify drug-related problems and formulate plans for solutions to these problems. Fundamental Skills for Patient Care in Pharmacy Practice prepares future pharmacists to communicate effectively in verbal and written formats with health professionals and special patient populations as they prepare and present SOAP notes, patient cases, and discharge counseling.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

ELLs: Thinking Skills and CCSS, Focus on the Six Shifts

Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs—who account for more than 9 percent of enrollment in grades K-12 in U.S. schools—are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

After a series of low-paying jobs, Chico Santana, PI, is living in his tiny office on 149th Street in the Bronx. He's in an absolutely foul mood when Pablo Sanchez and his mother drop in, seeking help for one of Chico's old childhood pals----the handsome and charismatic Joey Ventura. Chico has not seen Joey since Joey disappeared from St. Mary's Home for Boys, headed for Tahiti. He ended up, instead, on the island of TSP---The Superman Project. The Superman Project peddles German philosophy, Hinduism, and American comic book mythology as a method toward self-improvement, but its members are hiding more than a few secrets. The leader of TSP is a man named Father Ravi. One of his daughters, Gabby, who is also Joey's wife, is missing. Joey was accused by the TSP leaders of killing Gabby and has fled the police. Pablo and his mother insist he is innocent. Compelled to believe in his old friend, and by the promised payment of a very valuable Superman comic, Chico investigates the competing interests in the organization, falling for a beautiful suspect and trying to look out for a friend's troubled niece in the process. A. E. Roman brings New York City and its eccentric characters to life in this second in the original and energetic Chico Santana series.
