Aquinas on Mind

This book focuses on participatory capacity-building in ways that address the practical needs and strategic interests of the disadvantaged and disempowered - it examines how differences in class, ethnicity, race, caste, religion, age and gender lead to the 'politics of exclusion'. It offers innovative, accessible tools to enable facilitators from both inside and outside communities to empower those who are frequently omitted from decision-making processes. The style and approach are interactive, stimulating reflection and involvement by all parties. Power, Process and Participation aims to enable facilitators from inside and outside communities to involve and empower those commonly excluded in decision making processes. It provides a balanced overview of how 'participation' has been used in this context and raises the questions that all those involved in this type of activity should ask themselves. There are three distinct sections: Part 1: Definitions, history and issues - which provides an overview of some of the broad issues underlying the themes addressed in this book. A useful brief history is given of well known participatory methodologies and key questions are asked on the use and misuse of 'participation': whose ends does it serve, who is involved and what are the power relations, appropriate time frames and scale and how should it proceed in order to best serve the interests of the people involved? Part 2: Methods and ethics in our research and our use of the media N251pp - Whose expertise counts? How is it acknowledged? These are explored in the context of contributors' experience of undertaking research with women in Zimbabwe. Questions of ownership and consent as well as other issues are discussed further in the context of the use of video in participatory communication. Part 3: Tools for environmental and social change - The longest section in the book gives 35 tools and how to use them in facilitating participation. An introductory session explains how to use the section. Tools are cross referenced and for each the purpose, materials, process and estimated time is provided. For a number of the tools, examples of how they have been used in practice are included. Power, Process and Participation describes itself as a manual and although it does not immediately look like one, it is readable, logically arranged and combines instructions on how tools can be used with

examples of how they have been used in practice. There are notes on how to use the book and how to choose from the tools offered. This book would be useful to anyone looking for both an overview of participation and how it can be used and misused; and guidance on facilitating the process.

Python One-Liners

Interprocess Communications in Linux explains exactly how to use Linux processes and interprocess communications to build robust, high-performance systems. Coverage includes: named/unnamed pipes, message queues, semaphores, shared memory, RPC and the rpcgen compiler, sockets-based communication, the /proc file system, LinuxThreads POSIX support, multithreading, and much more. Includes detailed exercises, plus dozens of downloadable program examples compiled with GNU C/C++ 2.96 & 3.2 and tested with Red Hat Linux 7.3 & 8.0.

Sexualising Society

Spider from Mars

Now a major motion picture nominated for nine Academy Awards. Narrative of Solomon Northup, a Citizen of New-York, Kidnapped in Washington City in 1841, and Rescued in 1853. Twelve Years a Slave by Solomon Northup is a memoir of a black man who was born free in New York state but kidnapped, sold into slavery and kept in bondage for 12 years in Louisiana before the American Civil War. He provided details of slave markets in Washington, DC, as well as describing at length cotton cultivation on major plantations in Louisiana.

The Godfathers of Sex Abuse, Book I

Are rooms of your house uncomfortable or unusable at different times of the year? Is your home drafty in winter? Do you get hit with a wave of heat walking upstairs in summer? Are mold or pests frequent problems in your home? Do you get big icicles in winter? Do you suspect your home is making you sick? Do you sleep better out of your house? Do you have a damp, dank basement? How about air quality problems like dust or odors? Are you ready to solve those problems? Then this book is for you. Before you can solve a problem, you need to understand what is causing the problem. This book explains how your home actually works so you can address root causes, not symptoms. We've seen far too many folks waste thousands of dollars addressing the wrong problem. Armed with this book, you can find the right pros to solve problems, understand if the work was done right, and even DIY many things yourself. This is the book I wish I had when I

entered the Home Performance field. It connects theory to action and shows real world examples of work being done and the results achieved. It assumes you're a building science novice as well as smart and willing to learn. You'll learn about how your home works, what to look for in a new heating and cooling (HVAC) system, what kinds of insulation work best and why, how to choose and install the right bath fan, and more. Everything in this book is backed up by field experience, data, and an overwhelming passion to do things right the first time.

Differential Item Functioning

At the southernmost tip of New Jersey lie the resort town of Cape May and its sparkling sandy beaches, sheltering the Delaware Bay. Formed by melting glaciers thousands of years past, the Delaware River flows from its headwaters to spill into the Delaware Bay. And for thousands of years, fragments of quartz rock have ridden the river, plucked from the mountains lining its banks. Polished and buffed as they tumble along, these rock particles dazzle like gemstones when tossed onto Cape May's sandy shores. Beloved by beachcombers, these "diamonds" are the daughters of the river, linking the state's past and present. Delving into the natural beauty of New Jersey's famous coastline, storyteller Trinkia Hakes Noble has crafted a wondrous tale explaining the origin of the Cape May Diamond. Trinkia Hakes Noble's award-winning picture books include *The Last Brother*, *The Scarlet Stockings Spy* (an IRA Teachers' Choice, 2005), and the popular *Jimmy's Boa* series. Her awards include ALA Notable Children's Book, IRA-CBC Children's Choice, and several Junior Literary Guild Selections. She lives in Bernardsville, New Jersey. E.B. Lewis is the acclaimed illustrator of numerous award-winning picture books, including the 2005 Caldecott Honor Book, *Coming On Home Soon*. He teaches illustration at the University of the Arts in Philadelphia and is a member of the Society of Illustrators in New York City. He lives in Folsom, New Jersey.

The Legend of the Cape May Diamond

Haunters

Python programmers will improve their computer science skills with these useful one-liners. Python One-Liners will teach you how to read and write "one-liners": concise statements of useful functionality packed into a single line of code. You'll learn how to systematically unpack and understand any line of Python code, and write eloquent, powerfully compressed Python like an expert. The book's five chapters cover tips and tricks, regular expressions, machine learning, core data science topics, and useful algorithms. Detailed explanations of one-liners introduce key computer science concepts and boost your coding and analytical skills. You'll learn about advanced Python features such as list comprehension, slicing, lambda functions, regular expressions, map and reduce functions, and slice assignments. You'll also learn how to: •

Leverage data structures to solve real-world problems, like using Boolean indexing to find cities with above-average pollution • Use NumPy basics such as array, shape, axis, type, broadcasting, advanced indexing, slicing, sorting, searching, aggregating, and statistics • Calculate basic statistics of multidimensional data arrays and the K-Means algorithms for unsupervised learning • Create more advanced regular expressions using grouping and named groups, negative lookaheads, escaped characters, whitespaces, character sets (and negative character sets), and greedy/nongreedy operators • Understand a wide range of computer science topics, including anagrams, palindromes, supersets, permutations, factorials, prime numbers, Fibonacci numbers, obfuscation, searching, and algorithmic sorting By the end of the book, you'll know how to write Python at its most refined, and create concise, beautiful pieces of "Python art" in merely a single line.

The Home Comfort Book

This is a story of a boy named Benjamin who loves being in nature and develops a relationship with a very unusual tree. Each day he would walk to the forest to listen to the birds and smell the fresh air, Then one time he noticed a rickety old tree that was different than the others and wondered how it became this way. He would sit with the tree each day till a bond began to grow and the tree was able to share his story of how he became so bent and crooked. Benjamin's newly awakened connection with trees, nature and mother earth will be far reaching for years to come.

Benjamin's Tree

"If you're just beginning to dive into the world of 3D, this is the book for you." —Animation Magazine Alias' Academy Award winning Maya 3D animation and effects software leads the industry in technological innovation. Film and video artists, computer game developers, and design professionals rely on Maya to create brilliant digital imagery, animation, and visual effects. Now you can enter this exciting, imaginative world and learn to build, render, and animate your own digital characters and scenes. Brought to you by Maya Press, a publishing partnership between Sybex and Alias, Introducing Maya 6: 3D for Beginners is the ideal initiation to 3D and Maya. Written explicitly for the Maya novice, the easy-to-grasp text offers a practical and fun approach to learning Maya's core features. Clear-cut, engaging lessons let you try out these features using working files provided on the CD. You'll also find an abundance of instructional and inspirational art on the CD and full-color insert. Enter a New Dimension Get a solid grasp of the core Maya and 3D Learn to navigate the new Maya 6 interface Experiment with Maya modeling Explore the basics of NURBS, polygons, and subdivision surfaces Discover the nuances of shading and texturing Try your hand at animation Get a feel for Maya lighting, rendering, and dynamics Find out how to use Maya and Photoshop in unison Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

The Man in Asbestos

This book shows how the mature writings of Thomas Aquinas though written in the thirteenth century have much to offer the human mind and the relationship between intellect and will, body and soul.

Biological Methylation and Drug Design

Frogs

In "The Courage to be Profitable", small business financial expert Ruth King shows business owners the easy steps to really understanding the financial part of their businesses. Written in English rather than accounting babble, profit and loss statements, balance sheets, proper pricing, and cash flow come alive and are easily understood. Anyone can follow this simple, three step process to avoid being another failure statistic. "The Courage to be Profitable" shows business owners how to get and stay profitable.

Euripides Bacchantes

Hacking Secret Ciphers with Python

In January 2016, the unexpected death of David Bowie rocked the globe. For millions of people, he was an icon celebrated for his music, his film and theatrical roles, and his trendsetting influence on fashion and gender norms. But no one from her inner circle has told the story of how David Jones—a young folksinger, dancer, and aspiring mime—became one of the most influential artists of our time. Drummer Woody Woodmansey is the last surviving member of Bowie's band The Spiders from Mars which helped launch his Ziggy Stardust persona and made David Bowie a sensation. In this first memoir to follow Bowie's passing, Spider from Mars reveals what it was like to be at the white-hot center of a star's self-creation. With never-before-told stories and never-before-seen photographs, Woodmansey offers details of the album sessions for The Man Who Sold the World, Hunky Dory, The Rise and Fall of Ziggy Stardust and the Spiders from Mars, and Aladdin Sane: the four albums that made Bowie a cult figure. And, as fame beckoned by eventually consumed Bowie, Woodmansey recalls the wild tours, eccentric characters, and rock 'n' roll excess that eventually drove the band apart. A vivid and unique evocation of a transformative musical era and the enigmatic, visionary musician at the center of it, with a foreword by legendary music producer Tony Visconti and an afterword from Def Leppard's Joe Elliot, Spider from Mars is for everyone who values David

Bowie, by one of the people who knew him best. " those interested in rock history won't want to miss this slice of music history." - Publishers Weekly

Power, Process and Participation

Does history have a ghost of a chance? Eddie, Adam, David. Three boys, three generations, one gift: the ability to travel through time. Through a portal of dreams, they can appear as ghosts, wherever and whenever they want. The first boy, Eddie, is the genius who has sworn to protect the past and carry on the dreamwalker's code. The second, Adam, is a haunter, a dream-terrorist, dead-set on changing history for his own nefarious ends. The third, David, is the neophyte who must fight for the future by keeping the other two apart! Can he surf the time warps, back and forth between 1940s London and today, to save the present from oblivion?

Domestic and Commercial Oil Burners

Hacking Secret Ciphers with Python not only teaches you how to write in secret ciphers with paper and pencil. This book teaches you how to write your own cipher programs and also the hacking programs that can break the encrypted messages from these ciphers. Unfortunately, the programs in this book won't get the reader in trouble with the law (or rather, fortunately) but it is a guide on the basics of both cryptography and the Python programming language. Instead of presenting a dull laundry list of concepts, this book provides the source code to several fun programming projects for adults and young adults.

What Social Classes Owe to Each Other

This new edition presents an up-to-date description of differential item functioning. It describes varying procedures for addressing DIF in practical testing contexts. The authors present useful examples and studies of DIF that readers may employ as a guide in their own work. They also cover major statistical packages that can be employed in DIF analysis (e.g., SPSS, SAS, M+, Minitab, and Systat). This text is ideal for the measurement professional or advanced student who deals with educational or psychological assessment. Learn more about "The Little Green Book" - QASS Series! The Courage to be Profitable

Are you confused by all the advice you hear and see daily on how to "go green"? Do you want to incorporate earth-friendly practices into your life, but you don't know where to start? Don't stress! Green guru Sophie Uliano has sorted through all the

eco-info out there and put everything you need to know about living a green lifestyle right at your fingertips. In *Gorgeously Green*, Sophie offers a simple eight-step program that is an easy and fun way to begin living an earth-friendly life. Each chapter covers topics from beauty to fitness, shopping to your kitchen—even your transportation. Whether it's finding the right lipstick, making dinner, buying gifts, or picking out a hot new outfit, finally, there is a book that tackles your daily eco-challenges with a take-charge plan. Just consider Sophie your go-to girl with all the eco-solutions. Find out how to: Green your entire beauty regime Detoxify your home Indulge in guilt-free shopping Adopt a home fitness routine Prepare eco-licious treats Give your kitchen a green makeover Become more aware of your impact on the earth The book's dozens and dozens of eco-friendly tips, products, and practices combine to form a treasure trove of practical advice for every possible way to become stylishly green. Your questions about dressing, makeup, eating, shopping, cleaning, travel, and more are all answered right here. Adopting a green lifestyle is among the most positive, forward-thinking, and personally fulfilling choices that anyone can make—and *Gorgeously Green* shows that it doesn't have to be tedious, time-consuming, or glamourless!

Fireplace in a Box

"Christina Moore uses her talent for storytelling to create a more narrative-like tale. An attractive offering for listening centers and for young children interested in nature and science." -School Library Journal

Gorgeously Green

This book has been developed from its earlier and far less formal presentment as the proceedings of a symposium entitled *The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design* that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methyl ations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the

design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

Measures for Research and Evaluation in the English Language Arts

A reference you'll warm up to From the background and basics of heating systems to the newest chip-based technology, this first volume of Audel's HVAC Library gives you comprehensive information you need on the job. Whether you're installing, servicing, repairing, or troubleshooting an old or new heating system, you'll find what you're looking for, from wood and coal furnace maintenance to new calculations and the latest environmental technologies and regulations. *

- * Review the basics of installation, wiring, and troubleshooting for different HVAC systems
- * Choose the correct system for the space, climate, and needs
- * Compare the economy and efficiency of various fuel types
- * Install, maintain, and troubleshoot conversion units
- * Find formula cross references, data tables with conversions, and listings of trade organizations and equipment manufacturers

Critical Human Resource Development

A unbelievably, ridiculously, painfully, delightfully true sailing, land and love adventure in Mexico. Imagine Jimmy Buffett as the first mate, Dr. Wayne Dyer as the cook, Ernest Hemingway the helmsman and Jack London as the navigator and you get a pretty good idea about the crew in the author's head who helped shape this adventure. And they all get their share of the story. David owned and operated a real estate brokerage for many years in Northern California. Learning to sail on San Francisco Bay and visiting Mexico he soon discovered it was a combination he could not resist. During a visit to Mazatlan he determined he would chuck his brokerage life in California, bring a sail boat to that beach town and try his hand at the charter business. Sacrificing home and hearth and "security" at the altar of a mid-life Mexican dream cost him his business and marriage. Undeterred, he found a vintage ketch, made it ready for the ocean, and cast off. Come join the odyssey of sailing to Mazatlan -- dealing with Mexican "partners" negotiating tourist ladies, expats, the federales (almost being thrown into a Mexican jail), laughter, lust, love and the adventure of a lifetime.

Home Reference Book

On July 6, 2019, Jeffrey Epstein became a household name as an international sex trafficker of underage girls, serial sex abuser, and confidant of the most famous, rich, and powerful men in the world. Barely a month after his arrest, he was reportedly found dead in his prison cell, supposedly by suicide. Numerous investigations are ongoing, to find out how he really died--but the public has been kept in the dark. In this first of a series of books about the most notorious #MeToo era sexual predators, author and law professor Deana Pollard Sacks offers the most comprehensive look ever at the sordid life

of Jeffrey Epstein. Her research is impeccable and synthesizes news stories, court cases, and interviews--along with her keen observations--to give the reader a full picture of the life and crimes of this twisted sexual pervert. In this scathing indictment, Professor Sacks reveals the gross incompetence and bald corruption of certain government officials who aided and abetted the sex abuser, and exposes the media outlets who enabled Epstein's crimes by withholding the truth from us all. This book is a must-read for any #MeToo survivor or follower, concerned citizen, or individual who is fed up with having one justice system for the rich and another for the rest of us.

Introducing Maya 6

This witty little kit brings hearth to home -- literally! The 32-page book of warm images and sentiments about open-fire living comes with a cute resin model, complete with mantel and a tea light candle to place inside. It's the next best thing to the real thing -- and no firewood to lug!

Audel HVAC Fundamentals, Volume 1

Domestic Central Heating Wiring Systems and Controls

This unique A-Z guide to central heating wiring systems provides a comprehensive reference manual for hundreds of items of heating and control equipment, making it an indispensable handbook for electricians and installers across the country. The book provides comprehensive coverage of wiring and technical specifications, and now includes increased coverage of combination boilers, recently developed control features and SEDBUK (Seasonal Efficiency of Domestic Boilers in the UK) boilers ratings, where known. In addition to providing concise details of nearly 500 different boilers fuelled by electric, gas, oil and solid fuel, and over 400 programmers and time switches, this invaluable resource also features numerous easy-to-understand wiring diagrams with notes on all definitive systems. Brief component descriptions are provided, along with updated contact and website details for most major manufacturers. Ray Ward has spent over 20 years as a specialist in the field of wiring domestic central heating systems and the knowledge he has gained from hands-on experience and staff training is now brought together in this comprehensive handbook.
