Fortune Favours the Bold is the true story of Comair Ltd, one of aviation's greatest successes in the most demanding but exciting marketplaces. By mastering "the art of bonding brand promise and delivery", Comair's 63 unbroken years of profit are exceptional in an industry plagued with volatility and troubles. This book traces its role in African air commerce and beyond, ultimately operating the first British Airways franchise outside Europe. The book has its share of bizarre and amusing moments too. It debunks a number of myths and mysteries. It is heavily illustrated and interspersed with capsule commentaries on life in southern Africa over the past 65 years, often coinciding with some of the region's most tumultuous and significant periods. It covers events from World War II campaigns in East and North Africa through post-war development, rising political movements, international isolation, regional conflict and cooperation to evolving democracy. Through it all, Comair's history reflects the diversity of African experience. This book is one of the best records of an aviation group ever produced. It will be of interest to aviation and military historians, students of business, commercial law and political science, owners and operators of aircraft and anyone drawn to Africa's mystique. The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been overcome in some part by the development of air transportation. Hundreds of carriers--both small and large, government owned and private--have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African airports.

As an addition to the European postgraduate training system for young neurosurgeons we began to publish in 1974 this series devoted to Advances and Technical Standards in Neurosurgery which was later sponsored by the European Association of Neurosurgical Societies. The fact that the English language is well on the way to becoming the international medium at European scientific conferences is a great asset in terms of mutual understanding. Therefore we have decided to publish all contributions in English, regardless of the native language of the authors. All contributions are submitted to the entire editorial board before publication of any volume. Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals. Our intention is, rather, to present fields of neurosurgery and related areas in which

important recent advances have been made. The contributions are written by specialists in the given fields and constitute the first part of each volume. In the second part of each volume, we publish detailed descriptions Of standard operative procedures, furnished by experienced clinicians; in these articles the authors describe the techniques they employ and explain the advantages, difficulties and risks involved in the various procedures. This part is intended primarily to assist young neurosurgeons in their post graduate training. However, we are convinced that it will also be useful to experienced, fully trained neurosurgeons.

Newsweek

This book is based upon a journal Jim Schreiner kept during his deployment to the Persian Gulf region for Operations DESERT SHIELD and DESERT STORM. Building upon that record and the recollections of other F-4G Wild Weasel aircrew, the authors show a slice of what life and war was like during that time. The pawns in the game, the ones that had to actually do the fighting and dying were the hundreds of thousands of men and women who left their homes and families to live for seemingly endless months in the vast, trackless desert while the world stage-play unfolded. To them, the war was deeply personal. At times, the war was scary; at other times, it was funny as hell. Usually, if you survive the former, it turns into the latter.
