## **Night Pleasures**

Good books on the indeterminate stage of chess between openings and endings are rare. Ambitious players wanting a practical guide to the middle game will find that Ludek Pachman's great trilogy, which is completed with this volume, stands in a class of its own. In each of these books the need for understanding is emphasized: there are too many variations for any memory to store. The player must understand the basic principles involved and the typical positions or maneuvers that can arise. Ludek Pachman's examples will augment his experience and should facilitate finer judgments as to the types of position to aim for, how to plan for them and in the allocation of priorities. But games also need to be viewed as an entity, and for this reason the author has concentrated on teaching by means of whole games. Ludek Pachman, the West German and former Czechoslovak Grandmaster, has taken part in international chess since 1945. The present work is a substantial revision of a series of books that first appeared in

Czech. It has been translated from the German by the English International Master, John Littlewood.

This comes out in the writing style but in a way that also maintains the rigor of the content and uses the most recent understandings in the field"Mark J. SzymanskiPacific University "This text creates an integrated and engaging narrative that adeptly weaves theories and concepts of learning, motivation, and development into classroom teaching. . . .Not only is the text a pleasure to read, but it is also a pleasure to teach using this text. . . .This format is sensitive to the length of semesters, and frees instructors from rushing from one chapter to the next or covering multiple chapters in a single week. As

such, instructors have greater flexibility to explore the topics with students." Cecil RobinsonThe University of Alabama "Other texts present information that is often bogged down with dry descriptions of research and abstract concepts. Ormrod has an outstanding ability to make content accessible to and interesting for undergraduate students. . . .Also, examples and suggestions are clearly related to chapter content and helpful for tying content to actual classroom practice. We recommend that students keep this textbook because it will be a useful reference for them when they actually begin teaching."Rhoda CummingsUniversity of Nevada, Reno "I have found no other textbook author who prepares adolescent behavior and development, child behavior and development, or beginning educational psychology textsas clearly as Ormrod."William M. ## **Speak with Distinction**

Networks of relationships help determine the careers that people choose, the jobs they obtain, the products they buy, and how they vote. The many aspects of our lives that are governed by social networks make it critical to understand how they impact behavior, which network structures are likely to emerge in a society, and why we organize ourselves as we do. In *Social and Economic Networks*, Matthew Jackson offers a comprehensive introduction to social and economic networks, drawing on the latest findings in economics, sociology, computer science, physics, and mathematics. He provides empirical background on networks and the regularities that they exhibit, and discusses random graph-based models and strategic models of network formation. He helps readers to understand behavior in networked societies, with a detailed analysis of learning and diffusion in networks, decision making by individuals who are influenced by their social neighbors, game theory and markets on networks, and a host of related subjects. Jackson also describes the varied statistical and modeling techniques used to analyze social networks. Each chapter includes exercises to aid students in their analysis of how networks function. This book is an indispensable resource for students and researchers in economics, mathematics, physics, sociology, and business.

## **Essentials of Educational Psychology**

Dear Reader, Life is great for me. I have my chicory coffee, my warm beignets, and my best friend on the cell phone. Once the sun goes down, I am the baddest thing prowling the night: I command the elements, and I know no fear. For centuries, I've protected the innocent and watched over the mankind, making sure they are safe in a world where nothing is ever certain. All I want in return is a hot babe in a red dress, who wants nothing more from me then one night. Instead, I get a runaway Mardi Gras float that tries to turn me into roadkill and a beautiful woman who saves my life but can't remember where she put my pants. Flamboyant and extravagant, Sunshine Runningwolf should be the perfect woman for me. She wants nothing past tonight, no ties, no long-term commitments. But every time I look at her, I start yearning for dreams that I buried centuries ago. With her unconventional ways and ability to baffle me, Sunshine is the one person I find myself needing. But for me to love her would mean her death. I am cursed never to know peace or happiness-not so long as my enemy waits in the night to destroy us both. --Talon of the Morigantes

### **Christianity Before Christ**

Two young management graduates, with nothing similar in family backgrounds and temperament, join the New York International Bank on the same day and take two entirely different routes to success. Both rise up the ranks at breakneck speed: the fast and aggressive Sundeep, who will stoop to anything to get ahead, and the mature and sensible Swami, with a high regard for good old ethics. The racy narrative set in the high-pressure milieu of competitive banking carries the undercurrent of a clash of values, in the intermeshed realms of the personal and the professional. This is a story peppered with ambition and frustration, deceit and malevolence, love and lust, and the desperate struggle for status and power. And, above all, there is a top-notch banker who plays the benevolent God whenever crises loom over the young guns. An insider's fictionalised account of how Indian professionals experience the world of foreign banks, the story spans three continents.
