The Greenwich Weight Loss and Diabetes Diet

This book includes information on smallmouth distribution, smallmouths' favorite forage, their habitat preferences, the necessary equipment for fishing smallmouth bass, techniques for finding and catching smallmouths, and much more.

RNA and Cancer

Includes special sessions.

Courting Failure

This book constitutes the proceedings of the 7th International Conference on Wireless and Satellite Services, WiSATS 2015, held in Bradford, UK, in July 2015. The conference was formerly known as the International Conference on Personal Satellite Services (PSATS) mainly covering topics in the satellite domain. As the scope of the conference widened to include wireless systems, the conference was renamed to WiSATS. The 29 revised papers were presented at the conference in three technical sessions and one special session on "Network Coding for Satellites". WiSATS 2015 also hosted two workshops along with the main conference: The first workshop, Communication Applications in Smart Grid (CASG 2015), focused on the merging area of using communication technology within the electricity power grid for smart monitoring and control. The second workshop, Advanced Next-Generation Broadband Satellite Systems (BSS 2015), focused on the use of satellite systems for providing next-generation broadband services.

Drug Discovery and Development, Third Edition

So many wire antenna designs have proven to be first class performers! Here are two volumes devoted to wire antennas, from the simple to the complex. Includes

articles on dipoles, loops, rhombics, wire beams and receive antennas--and some time-proven classics! An ideal book for Field Day planners or the next wire antenna project at your home station.

Box Boats

Vols. for May 1929-Dec. 1958 include the Journal of the American Society of Heating and Air-Conditioning Engineers (called in 1929-54 American Society of Heating and Ventilating Engineers) in "Journal section."

Mr. Hogarth's will

The latest edition of this classic is updated with new problem sets and material The Second Edition of this fundamental textbook maintains the book's tradition of clear, thought-provoking instruction. Readers are provided once again with an instructive mix of mathematics, physics, statistics, and information theory. All the essential topics in information theory are covered in detail, including entropy, data compression, channel capacity, rate distortion, network information theory, and hypothesis testing. The authors provide readers with a solid understanding of the underlying theory and applications. Problem sets and a telegraphic summary at the end of each chapter further assist readers. The historical notes that follow each chapter recap the main points. The Second Edition features: * Chapters reorganized to improve teaching * 200 new problems * New material on source coding, portfolio theory, and feedback capacity * Updated references Now current and enhanced, the Second Edition of Elements of Information Theory remains the ideal textbook for upper-level undergraduate and graduate courses in electrical engineering, statistics, and telecommunications.

Ice Fishing

If you have type 2 diabetes and want to lose weight and better control your diabetes, this book is for you! It is based on the work of a cognitive behavioral psychologist who specializes in weight loss, diabetes, and nutrition. However, it is unique in that it is written from a patient's perspective. It debunks the false notion that losing weight is all about "willpower," and it dispels the common belief that the inability to lose weight and keep it off is a "character fault." You'll learn how this hunger-busting approach to eating and blood sugar control decreases your appetite so you don't have to ignore hunger, feel deprived, or leave the table unsatisfied. You will also get practical, sound psychological guidance to help you rely less upon food to lift your spirits and feel good. You can be happier, healthier, and more satisfied with your life—as well as lose weight!

Boating

A detailed description of the three-month defense of Bataan, the siege of Corregidor, the soldier's life in the crowded intimacy of Malinta Tunnel, MacArthur's evacuation, and the surrender of 78,000 American and Allied troops.

The Ultimate Guide to Dropshipping

Smallmouth Strategies

Teaching the Spoken Language is about teaching the spoken language. It presents in a highly accessible form the results of the author's important research on teaching and assessing effective spoken communication. The authors examine the nature of spoken language and how it differs from written language both in form and purpose. A large part of it is concerned with principles and techniques for teaching spoken production and listening comprehension. An important chapter deals with how to assess spoken language. The principles and techniques described apply to the teaching of English as a foreign and second language, and are also highly relevant to the teaching of the mother tongue.

The Conjugal Dictatorship of Ferdinand and Imelda Marcos

Provides an overview of the American legal system and offers a series of essays explaining the law on topics including civil rights, consumer issues, the First Amendment, taxes, and estate planning.

Heating, Piping, and Air Conditioning

A number of interdisciplinary fields related to Plant Cell Biotechnology are discussed. The two main directions are: Plant cell culture in agricultural applications for the improvement of crops and industrial applications in the production of secondary metabolites. A number of areas such as physiological and biochemical aspects of autotrophic cells, gene characterization in higher plants, transformation of plant cells, genetic stability in plant cell cultures, somatic hybridization and somatic embryogenesis are treated. Recent knowledge on somaclonal and gametoclonal variation as well as on the obtainment of protoplasts and their use for the isolation and culture of heterocaryons as tools for plant breeding are considered. Furthermore, the knowledge on biomass production in fermentor conditions and the role of immobilization for increased production and scale-up of plant cells are discussed.

Big Data in Complex Systems

★★★★The Perfect Fishing Accessory ★★ This 6 x 9 little perfect-bound journal is filled with 110 pages of very nice 55 lb paper and is a great size keep stashed in a tackle box. This book allows a fisherman to keep records of not only what they caught but also the how, when and where of the days fishing. This can be an impressive tool that will help the fisherman to learn from past successes as well as failures. The book allows you to record the number of fish and species caught, the bait used, the best times to fish, set up, etc. It also allows room for notes and diagrams.

Gale Encyclopedia of Everyday Law: First amendment law to travel

This new volume in the Current topics in Developmental Biology series concentrates on MicroRNAs in Development. It includes chapters on such topics as miRNA networks in neuronal development, let-7 in development, and Hox networks and miRNA. With an international team of authors, this volume is a must-have addition for researchers and students alike. Concentrates on microRNAs in development Includes chapters on such topics as miRNA networks in neuronal development, let-7 in development, and Hox networks and miRNA With an international team of authors, this volume is a must-have addition for researchers and students alike

At the Mercy of Tiberius

Primitivo "Tibo" Mijares was Ferdinand Marcos's prized "media czar" and chief propagandist until his defection in 1975. In 1972, Tibo moved to the Marcos-controlled Daily Express and assumed the presidency of the National Press Club of the Philippines and chairperson of the Media Advisory Council, effectively becoming--in his own words--"the sole conduit between the military government and the practicing media." In 1975, Tibo defected. He knew too much and so informed a Congressional Committee in the United States, in June 1975. Despite Marcos's efforts to stop its publication, The Conjugal Dictatorship was published in 1976. A year after the publication of the book, Tibo was never heard from again and was declared legally dead years later. Tibo's youngest son, Luis Manuel, was abducted, tortured, and later found murdered and mutilated in 1977, as a result of the publication of The Conjugal Dictatorship. He was 16 years old.

Crypto Anarchy, Cyberstates, and Pirate Utopias

Accumulating evidence supports the role of defects in post-transcriptional gene regulation in the development of cancer. RNA and Cancer examines the recent advances in our understanding of post-transcriptional gene regulation, especially RNA processing and its role in cancer development and treatment. A particular focus is mRNA splicing, but other topics such as microRNAs, mRNA stability, the perinucleolar compartment, and oligonucleotide therapeutics are also covered in detail. All chapters have been written by internationally renowned experts. The book is intended for all with an interest in gene regulation and cancer biology, and especially for those not directly working on RNA biology, including clinicians and medical students. It is hoped that it will stimulate further innovative research collaborations between RNA biologists and cancer researchers to the benefit of patients.

Wireless and Satellite Systems

America Without the Death Penalty

A wide-ranging collection of writings on emerging political structures in cyberspace.

More Wire Antenna Classics

The books in the Florida and the Caribbean Open Books Series demonstrate the University Press of Florida's long history of publishing Latin American and Caribbean studies titles that connect in and through Florida, highlighting the connections between the Sunshine State and its neighboring islands. Books in this series show how early explorers found and settled Florida and the Caribbean. They tell the tales of early pioneers, both foreign and domestic. They examine topics critical to the area such as travel, migration, economic opportunity, and tourism. They look at the growth of Florida and the Caribbean and the attendant pressures on the environment, culture, urban development, and the movement of peoples, both forced and voluntary. The Florida and the Caribbean Open Books Series gathers the rich data available in these architectural, archaeological, cultural, and historical works, as well as the travelogues and naturalists' sketches of the area prior to the twentieth century, making it accessible for scholars and the general public alike. The Florida and the Caribbean Open Books Series is made possible through a grant from the National Endowment for the Humanities and the Andrew W. Mellon Foundation, under the Humanities Open Books program.

Teaching the Spoken Language

The Ultimate Guide to Dropshipping is a complete guide on how to create and run a successful dropshipping business. "This is by far the best book on dropshipping available. You will learn everything you need to know about finding a product, setting up an online store and growing your business." (Sean Work, Director of Marketing, KISSmetrics) "Andrew and Mark have written a comprehensive, no-BS guide to dropshipping. Essential reading for anyone considering this type of retail." (Chandra Clark, Founder & President, Scribendi) "These guys distill everything you need to know about dropshipping. It's a must read if you want practical advice and a clear blueprint to help you grow your business." (Valerie Khoo, National Director, Australian Writers' Centre) "Holy jeez - I wish these guys had written this 7 years ago. I can say that the advice in this book is spot on."

Planning for Post-disaster Recovery and Reconstruction

Fifty years ago-on April 26, 1956-the freighter Ideal X steamed from Berth 26 in Port Newark, New Jersey. Flying the flag of the Pan-Atlantic Steamship Company, she set out for Houston with an unusual cargo: 58 trailer trucks lashed to her top deck. But they weren't trucks-they were steel containers removed from their running gear, waiting to be lifted onto empty truck beds when Ideal X reached Texas. She docked safely, and a revolution was launched-not only in shipping, but in the way the world trades. Today, the more than 200 million containers shipped every year are the lifeblood of the new global economy. They sit stacked on thousands of box boats that grow more massive every year. In this fascinating book, transportation expert Brian Cudahy provides a vivid, fast-paced account of the container-ship revolution-from the maiden voyage of the Ideal X to the entrepreneurial vision and technological breakthroughs that make it possible to ship more goods more cheaply than ever before. Cudahy tells this complex story easily, starting with Malcom McLean, Pan-Atlantic's owner who first thought about loading his trucks on board. His line grew into the container giant Sea-Land Services, and Cudahy charts its dramatic evolution into Maersk Sealand, the largest

container line in the world. Along the way, he provides a concise, colorful history of world shipping—from freighter types to the fortunes of steamship lines—and explores the spectacular growth of global trade fueled by the mammoth ships and new seaborne lifelines connecting Asia, Europe, and the Americas. Masterful maritime history, *Box Boats* shows how fleets of these ungainly ships make the modern world possible—with both positive and negative effects. It's also a tale of an historic home port, New York, where old piers lie silent while 40-foot steel boxes of toys and televisions come ashore by the thousands, across the bay in New Jersey.

Handbook of Evidence-Based Radiation Oncology

This volume provides challenges and Opportunities with updated, in-depth material on the application of Big data to complex systems in order to find solutions for the challenges and problems facing big data sets applications. Much data today is not natively in structured format; for example, tweets and blogs are weakly structured pieces of text, while images and video are structured for storage and display, but not for semantic content and search. Therefore transforming such content into a structured format for later analysis is a major challenge. Data analysis, organization, retrieval, and modeling are other foundational challenges treated in this book. The material of this book will be useful for researchers and practitioners in the field of big data as well as advanced undergraduate and graduate students. Each of the 17 chapters in the book opens with a chapter abstract and key terms list. The chapters are organized along the lines of problem description, related works, and analysis of the results and comparisons are provided whenever feasible.

Proceedings of the Annual Arctic Marine Oilspill Program Technical Seminar

This volume is a collection of the papers presented at the Fifth IRGS in 2005. It reports the latest developments in the field and includes research on breeding, mapping of genes and quantitative trait loci, identification and cloning of candidate genes for biotic and abiotic stresses, gene expression, as well as genomic databases and mutant induction for functional genomics

Smoking Salmon & Steelhead

Drug Discovery and Development, Third Edition presents up-to-date scientific information for maximizing the ability of a multidisciplinary research team to discover and bring new drugs to the marketplace. It explores many scientific advances in new drug discovery and development for areas such as screening technologies, biotechnology approaches, and evaluation of efficacy and safety of drug candidates through preclinical testing. This book also greatly expands the focus on the clinical pharmacology, regulatory, and business aspects of bringing new drugs to the market and offers coverage of essential topics for companies involved in drug development. Historical perspectives and predicted trends are also provided. Features: Highlights emerging scientific fields relevant to drug discovery such as the microbiome, nanotechnology, and cancer immunotherapy; and novel research tools such as CRISPR and DNA-encoded libraries Case study

detailing the discovery of the anti-cancer drug, Iorlatinib
Venture capitalist commentary on trends and best practices in drug discovery and development
Comprehensive review of regulations and their impact on drug development, highlighting special populations, orphan drugs, and pharmaceutical compounding
Multidiscipline functioning of an Academic Research Enterprise, plus a chapter on Ethical Concerns in Research Contributions by 70+ experts from industry and academia
specialists who developed and are practitioners of the science and business

Elements of Information Theory

Explains the basics of current speed, water temperature, and fluctuating water levels in streams and rivers, and provides case studies of fishing in different parts of the United States and Canada

The Fall of the Philippines

A girl is falsely accused of killing her grandfather.

Lakeland Boating

6 x 9 inches, 96 pages, all color

Journal of the House of the Session of the Legislative Assembly

My Fishing Journal

Numerous issues face Pacific states trying to find their way in the early 21st century. Countries are striving to secure the benefits of modernisation. Governance, law and order are needed to reach such a goal, but development cannot be at the price of culture or the environment. The question of how to develop and maintain sound legal systems and legal rules whilst maintaining the unique cultural heritages within the Pacific is a challenge with no easy answer. This interdisciplinary collection locates issues of law and governance within the particular socio-political context of the Pacific island region, presenting sociological, anthropological and political insights alongside jurisprudential analysis. Key issues including corruption, the role of customary law in modern legal systems, the place of human rights in the Pacific, environmental issues and the structure of the state are explored from a variety of perspectives.

Passage of Change

Fishing Rivers and Streams

Boston Whalers are the quintessential American motorboats. Born from innovation, risk, and above all hard work, their reputation for reliability, fun, and safety has changed the way the people go boating. The first Whalers hit the water in 1958,

but the “Unsinkable Legend” was created with a daring launch in 1961, when Boston Whaler founder Richard “Dick” Fisher sawed a boat in half before the cameras of Life magazine -- and then piloted the back half of the hull around Wampatuck Pond in Hanson, Massachusetts. People were shocked and delighted, and the company made its mark on the history of boating by proving that it had created something altogether new and absolutely unsinkable. *Unsinkable: The History of Boston Whaler* is the first book to tell the story of these iconic boats. Published to celebrate the company's 60th anniversary, author Matthew Plunkett relays a fascinating and engaging tale beginning with how Dick Fisher came to create Boston Whaler and then detailing how the company evolved over the decades. From the original 13' hull, unflatteringly known as the “blue bathtub,” to its current flagship, the 420 Outrage, this book covers the whole story of a truly American company. Drawing on dozens of interviews with employees who were there in the plants, at the dealerships, and on the boats, *Unsinkable: The History of Boston Whaler* is filled with previously untold stories as well as never before published images, including photos from the families of Dick Fisher and legendary designer Bob Dougherty, Mr. Unsinkable himself. This intimate look into the creation, culture, and ongoing legacy of Boston Whaler reveals just how influential this company has been both within the industry and for its legions of diehard fans around the world.

Proceedings, Seventeenth Arctic and Marine Oilspill Program Technical Seminar

Building on the success of this book's first edition, Dr. Eric Hansen and Dr. Mack Roach have updated, revised, and expanded the *Handbook of Evidence-based Radiation Oncology*, a portable reference that utilizes evidence-based medicine as the basis for practical treatment recommendations and guidelines. Organized by body site, concise clinical chapters provide easy access to critical information. Important “pearls” of epidemiology, anatomy, pathology, and clinical presentation are highlighted. Key facets of the work-up are listed, followed by staging and/or risk classification systems. Treatment recommendations are discussed based on stage, histology, and/or risk classification. Brief summaries of key trials and studies provide rationale for the recommendations. Practical guidelines for radiation techniques are described. Finally, complications and follow-up guidelines are outlined. Updates from the first edition include brand new color figures and color contouring mini-atlases for head and neck, gastrointestinal, prostate, and gynecological tumors; redesigned tables for increased readability; new chapters on management of the neck and unknown primary, clinical radiobiology, and pediatric malignancies and benign conditions; and new appendices including the American College of Radiology guidelines for administration of IV contrast.

The Seminoles of Florida

A guide with more than 200 color photos covers all the key ice-fishing equipment, the best species to go after, how to stay warm and safe, where to find the fish, key fishing strategies and much more. Original.

MicroRNAs in Development

In 2000, Governor George Ryan of Illinois, a Republican and a supporter of the death penalty, declared a moratorium on executions in his state. In 2003 he commuted the death sentences of all Illinois prisoners on death row. Ryan contended that the application of the death penalty in Illinois had been arbitrary and unfair, and he ignited a new round of debate over the appropriateness of execution. Nationwide surveys indicate that the number of Americans who favor the death penalty is declining. As the struggle over capital punishment rages on, twelve states and the District of Columbia have taken bold measures to eliminate the practice. This landmark study is the first to examine the history and motivations of those jurisdictions that abolished capital punishment and have resisted the move to reinstate death penalty statutes.

Boating

Chester White World

Beyond Data Protection

The book deals with data protection issues from practical viewpoints. 40% of the content focus on the Malaysian Personal Data Protection Act (PDPA) 2010 progress, whilst 60% of the content focus on leading comparative practical guidance from Europe. Part of the PDPA provisions is mirrored from European approaches and practices. The approach of this book is straightforward, handy and readable and is supplemented by practical applications, illustrations, tables and diagrams. Practical examples highlighted in this book range from cloud computing, radio frequency identification technology, social media networks and information security to basic related aspects of data protection issues covering strategic leadership, management, governance and audit in businesses, organisations and local authorities. Recommended best practices have been outlined for practical guidance accompanied with future challenges and opportunities for Malaysia and ASEAN. The book is equally suitable for academics, practitioners, governmental officials and regulators dealing with data protection within their sector-specific legislation.

Rice Genetics V

The expert contributors to this volume assess recent court actions in school adequacy lawsuits and their impact on student outcomes. They show that simply throwing more resources at the problem has not brought about a solution and call for changes centered around accountability, incentives, and more informed parents and policymakers.

Plant Cell Biotechnology

Unsinkable

This comprehensive handbook for disaster response and recovery can help community leaders and planners educate their constituencies on how informed decisions and choices can affect the rebuilding process and yield a safer, more sustainable community. It includes a primer in disaster operations, a planner's tool kit for both emergency and long-term measures, a section on hazard identification and risk assessment, and several comprehensive case studies.
