A mere utterance of the word aYosemitea conjures up images of Half Dome, El Capitan, giant sequoias, and the unmatched beauty this northern California park has to offer. However, the area known today as Yosemite has not always been a place of tranquility. Once the home of Ahwahnee tribe, these Native Americans were forced to surrender their home to armed miners rushing for gold and a California government clutching the philosophy of Manifest Destiny.

Ansel Adams led regular trips into the Yosemite backcountry as part of his efforts to protect this rare instance of untouched nature and, as a result, introduced thousands to its beauty. Following his example, the Yosemite Fund asked five well-

known Yosemite photographers to once again bring the wonders of the wilderness to the general public. For five years, these five photographers spent a part of their summers in Yosemite's wilderness region, which covers more than one thousand square miles of almost indescribable raw beauty, and the camaraderie that developed between them is evident in the reminiscences and musings that accompany their photographs. The result of this uncommon collaboration is a book of glorious prints, each imbued with its creator's distinct style."

"There are few more spectacular drives on Earth than Highway 395 along the foot of the great granite wall of the Sierra Nevada. In Sierra East, Genny Smith and her team of experts tell the story of that amazing terrain, and its fantastic contours, molded by tectonic upthrusts and Pleistocene glaciers; its spectacular weathers; its amazing diversity of plant and animal life; and the human struggles over its life-giving waters."--Harold Gilliam, author of *Weather of the San Francisco Bay Region*

"For those of us who live within the Sierra East territory, this is the 'right' side of California. It is a wondrous place to visit. This book is not a superficial tourist guide to what you may see from the scenic overlooks. It is a real guidebook covering all the natural and unnatural history as well as geology, weather, and water. There are thorough descriptions of plants and animals you may wander across plus information on how they cope with the extreme rigors of the high mountains and harsh deserts."--Sally Gaines, co-founder of the Mono Lake Committee

"This is the first comprehensive natural history of the Eastern Sierra. An outstanding team of authors, with years of experience in the region, meets the challenge of covering their specialties from the Mojave Desert to the tops of 14,000-foot mountains. This diverse material is uniformly accessible in a readable style."--Frank L. Powell, Director, White Mountain Research Station, University of California, San Diego
