

## Naval Ships Technical Manual Chapter 505

Naval research reviews  
Report to the Legislature on the Control of Visible Emissions from Ships with Steam Boilers  
U. S. Navy Diving Manual  
Mess management specialist  
3Radioman 1 and CSeaman  
U. S. Navy Diving Manual  
Seamanship  
Marine Refrigeration and Air-conditioning  
Fire Safety Analysis of the USCGC Vindicator (WMEC 3)  
U.S. Navy Towing Manual  
Practical Shipbuilding Standards for Surface Preparation and Coatings  
Naval Ships Technical Manual  
Naval Engineers Journal  
U.S. Navy Gas Turbine Systems Technician Manual  
Basic Navigation  
Safetyline  
Manuals Combined: U.S. Navy FIRE CONTROLMAN Volumes 01 - 06 & FIREMAN Transactions - The Society of Naval Architects and Marine Engineers  
Corrosion control manual for LST-1179 class  
Enlisted Qualifications Manual  
Blue Water Navy Vietnam Veterans and Agent Orange Exposure  
Drydock Extension  
Good painting practice  
Machinists' Mate 1 & C  
Naval Ship Systems Command Technical News  
Naval Mine Warfare  
Small Cutter Fire Protection Project  
Marine Engineering  
Shipboard Electronics Material Officer  
Engineman 1 & C  
International Workshop on Underwater Welding of Marine Structures  
Naval Ship Systems Command Technical News  
Military Requirements for Chief Petty Officer  
Materials Protection  
U.S. Navy Medicine  
Fire Safety Analysis of the 180' WLB Seagoing Buoy Tender  
Network-Centric Naval Forces  
West's federal reporter : cases argued and determined in the United States courts of appeals and Temporary Emergency Court of Appeals  
Electrician's Mate 3 and 2

### **Mess management specialist 3**

Over 3 million U.S. military personnel were sent to Southeast Asia to fight in the Vietnam War. Since the end of the Vietnam War, veterans have reported numerous health effects. Herbicides used in Vietnam, in particular Agent Orange have been associated with a variety of cancers and other long term health problems from Parkinson's disease and type 2 diabetes to heart disease. Prior to 1997 laws safeguarded all service men and women deployed to Vietnam including members of the Blue Navy. Since then, the Department of Veteran Affairs (VA) has established that Vietnam veterans are automatically eligible for disability benefits should they develop any disease associated with Agent Orange exposure, however,

veterans who served on deep sea vessels in Vietnam are not included. These "Blue Water Navy" veterans must prove they were exposed to Agent Orange before they can claim benefits. At the request of the VA, the Institute of Medicine (IOM) examined whether Blue Water Navy veterans had similar exposures to Agent Orange as other Vietnam veterans. Blue Water Navy Vietnam Veterans and Agent Orange Exposure comprehensively examines whether Vietnam veterans in the Blue Water Navy experienced exposures to herbicides and their contaminants by reviewing historical reports, relevant legislation, key personnel insights, and chemical analysis to resolve current debate on this issue.

Due to a strong industry need, many academies and technical schools now offer courses on refrigeration and air-conditioning. Marine Refrigeration and Air Conditioning introduces this complicated subject in a detailed, straightforward manner. Mechanical refrigeration is used onboard in many ways, including refrigerated ship's stores, air-conditioning, and refrigerated cargo storage areas. Although reciprocating compressors have been the standard for decades, systems using rotary and centrifugal compressors are quickly becoming the norm. Author James A. Harbach addresses both systems and discusses the changes step-by-step. Since the 1990s, environmental concerns have had a major effect on refrigeration and air-conditioning systems. Today's students are required to learn

how to retrofit existing systems and replace entire units. These tasks are explained fully in this title. AUTHOR:

Network-Centric Naval Forces: A Transition Strategy for Enhancing Operational Capabilities is a study to advise the Department of the Navy regarding its transition strategy to achieve a network-centric naval force through technology application. This report discusses the technical underpinnings needed for a transition to networkcentric forces and capabilities.

"This edition of Marine Engineering presents more than twenty years of evolutionary changes in the maritime industry. The book provides a complete review of marine engineering, encompassing both naval and merchant practices and incorporating the broad range of technological developments that evolved during the last decades. Also included is material presenting the principles associated with pollution control, design for production, integrated logistic support and noise control, as well as expanded coverage of propulsion shafting and piping. Long-time SNAME member Roy L. Harrington, now retired from Newport News Shipbuilding, edited this landmark volume."--Publisher's website

Presents comprehensive information on air diving operations. It contains data and information from all groups within the Navy diving community, and reflects state-of-the-art diving capabilities of the U.S. Navy. New equipments appearing for the first time include the Underwater Breathing Apparatus (UBA) MK 20 MOD 0, UBA MK 21 MOD 1, the Light Weight Diving System (LWDS) MK 3 MOD 0, and the Transportable Recompression Chamber System (TRCS). Appendices: changes in

the deployment of standby divers in ships husbandry diving, changes in treatment tables and new correction factors and guidance relating to the use of pneumofathometers.

Sea mines have been important in naval warfare throughout history and continue to be so today. They have caused major damage to naval forces, slowed or stopped naval actions and commercial shipping, and forced the alteration of strategic and tactical plans. The threat posed by sea mines continues, and is

## Read Book Naval Ships Technical Manual Chapter 505

increasing, in today's world of inexpensive advanced electronics, nanotechnology, and multiple potential enemies, some of which are difficult to identify. This report assesses the Department of the Navy's capabilities for conducting naval mining and countermining sea operations.
