On the Construction of Iron Roofs

Nearly 200 color images present the brilliant weaving tradition of the remote and

isolated Himalayan kingdom of Bhutan. The brief introductory text, written by noted collector Barbara Adams, explains the function and designs of each of the major woven items, making the book of great value to anyone interested in textiles or Himalayan cultures.

The Theological Tractates

A Guide to Rational Living

This new edition of the near-legendary textbook by Schlichting and revised by Gersten presents a comprehensive overview of boundary-layer theory and its application to all areas of fluid mechanics, with particular emphasis on the flow past bodies (e.g. aircraft aerodynamics). The new edition features an updated reference list and over 100 additional changes throughout the book, reflecting the latest advances on the subject.

Thinking Through Faith

Within these pages a younger generation of Orthodox scholars in America takes up the perennial task of transmitting the meaning of Christianity to a particular time

and culture. This collection of twelve essays, as the title Thinking Through Faith implies, is the result of six years of reflective conversation and collaboration regarding core beliefs of the Orthodox faith, tenets that the authors present from fresh perspectives that appeal to reason and spiritual sensibilities alike. Subjects covered include: The Kingdom of God, The Foundations of Noetic Prayer, The Discipline of Theology, Understanding Pastoral Care in the Early Church, Orthodox Theologies of Women and Ordained Ministry, Reading the Lives of the Saints, The Meaning and Place of Death in an Orthodox Ethical Framework, Confession, Desire and Emotions, International Religious Freedom and the Challenge of Proselytism, "Typologies" of Orthopraxy, Byzantine Liturgy as God's Family at Prayer, and the Orthodox Church in the Twentieth-Century.

The Watchman

On the life of Prophet Muhammad, d. 632.

Hack Your Anxiety

What if the way we're thinking about anxiety is off base? What if there's something about anxiety that can be used for you instead of against you? In this revolutionary new book, Dr. Alicia H. Clark recognizes anxiety as an unsung hero in the path to

success and well-being. Anxiety is a powerful motivating force that can be harnessed to create a better you, if you've got the right tools. Hack Your Anxiety provides a road map to approach anxiety in a new —and empowering — light. Weaving together modern neuroscience, case studies, interviews, and personal anecdotes, Hack Your Anxiety demonstrates how anxiety can be reclaimed as a potent force for living our best lives.

The Prophet of Islam

Discovering Computers 2004: A Gateway to Information is the perfect blend of cutting-edge technology and core computer concepts, making learning about computers interesting and easy. This best seller from the Shelly Cashman Series has been completely revised to reflect only the latest in technology, keeping your students informed on the most up-to-date computer information!

; 0x40 assembly riddles "xchg rax,rax" is a collection of assembly gems and riddles I found over many years of reversing and writing assembly code.The book contains 0x40 short assembly snippets, each built to teach you one concept about assembly, math or life in general. Be warned - This book is not for beginners. It doesn't contain anything besides assembly code, and therefore some x86_64 assembly knowledge is required. How to use this book? Get an assembler (Yasm or Nasm is recommended), and obtain the x86_64 instruction set. Then for every snippet, try to understand what it does. Try to run it with different inputs if you don't understand it in the beginning. Look up for instructions you don't fully know in the Instruction sets PDF. Start from the beginning. The order has meaning. As a final note, the full contents of the book could be viewed for free on my website (Just google "xchg rax,rax").

Indian Unrest

Provides an introduction to the subject of ethics and values in the business

environment. Set firmly in a European context, the book spans the range of subjects in business ethics, including: theories of ethics; capitalism and free enterprise; marketing; employment; and the greening of business.

ACI 347R-14, Guide to Formwork for Concrete

A future with billions of connected "things" includes monumental security concerns. This practical book explores how malicious attackers can abuse popular IoT-based devices, including wireless LED lightbulbs, electronic door locks, baby monitors, smart TVs, and connected cars. If you're part of a team creating applications for Internet-connected devices, this guide will help you explore security solutions. You'll not only learn how to uncover vulnerabilities in existing IoT devices, but also gain deeper insight into an attacker's tactics. Analyze the design, architecture, and security issues of wireless lighting systems Understand how to breach electronic door locks and their wireless mechanisms Examine security design flaws in remote-controlled baby monitors Evaluate the security design of a suite of IoT-connected home products Scrutinize security vulnerabilities in smart TVs Explore research into security weaknesses in smart cars Delve into prototyping techniques that address security in initial designs Learn plausible attacks scenarios based on how people will likely use IoT devices

Organs of Our Time

In later life Coleridge was condescending about his youthful activities as radical and editor. At the time however his political miscellany The Watchman, launched 'that all may know the truth; and that the truth may make us free!', was a brave contribution in the fight for individual liberty and a step in a possible political career. It was subscribed to mainly by Dissenters, and ran for ten issues between March and May 1796. It contains comment, poetry (by Coleridge and by others), reviews and essays, and remains an important witness to Coleridge's sympathies and beliefs in the crucial mid-1790s. Among the poems included of his own is an apocalyptic part of 'Religious Musings', looking forward to the end of the world.

Discovering Computers 2004

"Mommy, mommy, call him. Tell him to come here right away. I have so many things to tell him!" I had a ton of things to tell him. I wanted him to find a solution to all the shortages of clothes; of meat, so it would again be distributed through the ration books. I also wanted to ask him to give our Christmas back. And to come live with us. I wanted to let him know how much we really needed him Fidel didn't answer my letter. I kept writing him letters from a sweet and well-behaved child, a brave but sad girl. Letters resembling those of a secret, spurned lover As a girl

growing up in Cuba, Alina Fernandez found nothing abnormal in the fact that Fidel Castro would occasionally visit her house bearing gifts just for her. At the age of ten, her mother finally told her the truth: she was Castro's Daughter.

Handbook on Peace Education

The Truth of the Christian Religion in Six Books

Italian philosopher Julius Evola pares away centuries of adaptations to reveal Buddhist practice in its original context. Most surprisingly, he argues that the widespread belief in reincarnation is not an original Buddhist tenet. Evola presents actual practices of concentration and visualization, and places them in the larger metaphysical context of the Buddhist model of mind and universe.

Boundary-Layer Theory

Elizabeth Murray's enchanting photographs capture all of the charm and vivid color

of Monet's inspiring gardens at Giverny, sometimes referred to as his 'living canvas.' Murray had the unique experience of living at Giverny for a year, working in the gardens in exchange for her room and board. She returns to the gardens annually to capture Giverny's many palettes with her camera. Here are forty of her favorites. Our deluxe address books are hardbound with a hidden spiral binding that allows them to lie absolutely flat. Forty full-color reproductions complement information pages with room for 480 names, addresses, home and business telephone numbers, cell/pager, and e-mail addresses. A lovely gift. Shipped individually shrink-wrapped for safety. Size; 7 x 8 1/4"

Traditional Bhutanese Textiles

Because Dr. Diana Russell believes that seeing pornography is the most powerful evidence of the woman-hatred inherent in it, she reprinted over 100 examples of pornographic photographs in this book. She chose to risk being sued for publishing these pictures because she was unwilling to obtain permission from the pornographers. "Against Pornography" also contains a succinct summary of some of the major scientific research on this subject, and an explication of her original and convincing theory of how pornography causes rape.

Radio & TV Servicing

Ultrasound in Liquid and Solid Metals focuses on the effect of intensive ultrasound on metals, including the analysis of the development of cavitation and acoustic flows in melts, mechanism of metals' spraying and crystallization, the formation of dislocation structure in crystals, diffusion, phase transformation, and plastic deformation. Physical fundamentals of intensive ultrasound effects are covered, and detailed discussions are presented on the engineering principles of equipment and material design for the practical use of ultrasound in the refining of melts, crystallization of ingots and molds, pulverization, plating, pressure working of metals, surface strengthening, and other processes.

Castro's Daughter

In a probing analysis of the oldest Buddhist texts, Julius Evola places the doctrine of liberation in its original context. The early teachings, he suggests, offer the foremost example of an active spirituality that is opposed to the more passive, modern forms of theistic religions. This sophisticated, highly readable analysis of the theory and practice of Buddhist asceticism, first published in Italian in 1943 , elucidates the central truths of the eightfold path and clears away the later accretions of Buddhist doctrine. Evola describes the techniques for conscious liberation from the world of maya and for achieving the state of transcendence beyond dualistic thinking. Most surprisingly, he argues that the widespread belief in reincarnation is not an original Buddhist tenet. Evola presents actual practices of

concentration and visualization, and places them in the larger metaphysical context of the Buddhist model of mind and universe. The Doctrine of the Awakening is a provocative study of the teachings of the Buddha by one of Europe's most stimulating thinkers.

The Good and the Economical

Real World Adobe Illustrator CS4 is the definitive reference to Adobe's industry-standard vector graphics software and is now in 4-color. With an easy, engaging style, author and past Illustrator product manager Mordy Golding takes readers through all of the features of the program, explaining not only how to use the multitude of features but also why and when to use them. This edition has been thoroughly updated for Illustrator CS4 and includes techniques on using the new multiple artboards for quicker Illustrator work across a variety of designs, demonstrations of the new Blob Brush tool and transparency in gradients, overviews of the new cross-product feature support with InDesign, Flash, and Flex (opening up new opportunities for collaborations between developers and designers), and coverage on a whirlwind of other new useful features. Along with tips, sidebars, and expert commentary, there are also numerous 4-color illustrations and screen shots from contributing artists included to offer readers the most complete coverage on this extraordinary application. Designers from all fields--illustrators, animators, package designers, graphic designers, web

designers, and more--will find Real World Adobe Illustrator CS4 their one-stop guide to creating powerful designs in Illustrator.

The Doctrine of Awakening

"The instruments here presented chronologically give an overview of the tonal and visual designs of Johannes Klais Orgelbau K.G., 53 Bonn, Kölnstrasse 148, West Germany. In general the organs have slider chests, tracker key action, and electric stop action. Most of the case designs are by the Klais firm, those of the last decade or so being largely the work of Josef Schäfer."--Foreword, p. 7.

The Conduct of the Understanding

New Reflections on the Revolution of Our Time

Economics makes the incommensurable commensurable by money prices. On the other hand, there are varieties of goodness like the ethical that seem not to fit into the scale of prices of economics, but cannot be neglected in economizing. Ways of integrating ethics into economics must therefore be found. The aim of this book is the integration of the ethical discourse into the economic discourse about the economical and efficient. It investi§ gates into the structure of goodness. The contribution of this volume to the current debate in economic ethics and business ethics lies in its analysis of the different meanings of the good and in its reflection on the possibilities of implementing ethical goods into the practice of the economist and the manager of the firm. Its essays investigate the role of ethics in social and individual choice. They examine and compare the cultural determinants of the Western and the Japanese economies, their ethical and cultural foundations.

They look into the principles of good management. How can the management incorporate human goods and consider the virtues of impartiality and of due consideration to the particular in its business practice? The book develops the idea of an ethical economizing in economics and of an ethical managing in business administration. The business of business is ethical business.

An Introduction to Business Ethics

Unity and Variety in Muslim Civilization

Essential reading for business leaders and policymakers, an in-depth investigation of red teaming, the practice of inhabiting the perspective of potential competitors to gain a strategic advantage Red teaming. The concept is as old as the Devil's Advocate, the eleventh-century Vatican official charged with discrediting candidates for sainthood. Today, red teams are used widely in both the public and the private sector by those seeking to better understand the interests, intentions, and capabilities of institutional rivals. In the right circumstances, red teams can yield impressive results, giving businesses an edge over their competition, poking holes in vital intelligence estimates, and troubleshooting dangerous military missions long before boots are on the ground. But not all red teams are created

equal; indeed, some cause more damage than they prevent. Drawing on a fascinating range of case studies, Red Team shows not only how to create and empower red teams, but also what to do with the information they produce. In this vivid, deeply-informed account, national security expert Micah Zenko provides the definitive book on this important strategy -- full of vital insights for decision makers of all kinds.

A world of "smart" devices means the Internet can kill people. We need to act. Now. Everything is a computer. Ovens are computers that make things hot; refrigerators are computers that keep things cold. These computers—from home thermostats to chemical plants—are all online. The Internet, once a virtual abstraction, can now sense and touch the physical world. As we open our lives to this future, often called the Internet of Things, we are beginning to see its enormous potential in ideas like driverless cars, smart cities, and personal agents equipped with their own behavioral algorithms. But every knife cuts two ways. All computers can be hacked. And Internet-connected computers are the most

vulnerable. Forget data theft: cutting-edge digital attackers can now crash your car, your pacemaker, and the nation's power grid. In Click Here to Kill Everybody, renowned expert and best-selling author Bruce Schneier examines the hidden risks of this new reality. After exploring the full implications of a world populated by hyperconnected devices, Schneier reveals the hidden web of technical, political, and market forces that underpin the pervasive insecurities of today. He then offers common-sense choices for companies, governments, and individuals that can allow us to enjoy the benefits of this omnipotent age without falling prey to its vulnerabilities. From principles for a more resilient Internet of Things, to a recipe for sane government regulation and oversight, to a better way to understand a truly new environment, Schneier's vision is required reading for anyone invested in human flourishing.

Abusing the Internet of Things

Brian D. Clark PADC Environmental Impact Assessment and Planning Unit Project Director Events throughout the world substantiate the view that planning and decision-making systems need a better integration of environ mental, economic and social considerations. Many organizations are showing considerable interest in Environmental Impact Assessment (EIA) and its role in project planning and policy evaluation and as an aid to decision-making. Consequently, it was decided to hold a NATO Advanced Study Institute on EIA for the following reasons. First there is evidence of uncertainty, particularly amongst many scientists and decision-makers, as to the nature, scope and object ives of EIA. Secondly, there is much confusion over the objectives and utility of certain EIA methods. Third, there appears to be a gulf developing between decision-makers and what they require from EIA, and the ability of the scientist to provide information which is scientifically rigorous. Finally, there appears to be little concern as to the relationship between "impact prediction" and the actual consequences ofa development activity, suggesting that if EIA is not to become both politically and scientifically disreput able greater emphasis should be placed on prediction, monitoring and post-audit studies. As will be seen from the contents of this volume the ASI attempted to address all of the above topics and indeed many more. It was perhaps inevitable that the ASI raised more questions than were answered but this is indicative of the vigorous debate that is now taking place about the role and utility of EIA.

Against Pornography

No Marketing Blurb

The Doctrine of Awakening

This handbook encompasses a range of disciplines that underlie the field of peace education and provides the rationales for the ways it is actually carried out . The discipline is a composite of contributions from a variety of disciplines ranging from social psychology to philosophy and from communication to political science. That is, peace education is an applied subject which is practiced in differing ways, but must always be firmly based on a range of established empirical disciplines. The volume is structured around contributions from expert scholars in various fields that underpin peace education, plus contributions from experts in applying peace education in a range of settings, all complemented by chapters which deal with issues related to research and evaluation of peace education.
