First Earth Battalion Operations Manual

Bedside Critical Care Manual

In 1999, the Federal Emergency Management Agency (FEMA) and the Association of State Dam Safety Officials (ASDSO) jointly conducted research and a workshop to shed light on the national problem of animal intrusion damage to earthen dams and the resulting safety issues. The FEMA/ASDSO survey and workshop united dam owners, engineers, state and federal regulators, wildlife managers, foresters, and academia to form an educated and experienced front against the growing problem of earthen dam damage and failures due to animal intrusion. The information generated by roundtable discussions and survey answers indicates that while most states recognize animal intrusion as a problem, only a handful know of guidance on dams and wildlife management practices available to the dam professionals and owners. Based on input from the dam communities, FEMA/ASDSO's mission to develop a guidance manual on the proper management of nuisance wildlife in the earthen dam environment became clear. To determine the information needs of the dam community—and therefore the most appropriate focus of this manual—FEMA/ASDSO issued a survey in 1999 and used the survey input from the 48 state dam safety officials representatives and 11 federal agencies representing the Interagency Committee on Dam Safety (ICODS). Additionally, a second survey was issued in 2003 to identify the current needs of each state, determine what nuisance wildlife and damages the states encounter, and understand which mitigation methods are being used with success or failure. This manual provides technical guidance to dam specialists (including dam owners, operators,

inspectors, state dam officials, and consulting engineers) in areas of focus identified through the two survey efforts and workshop. The purposes of this manual are to: Assist dam specialists in understanding the impacts wildlife can have on earthen dams; Provide dam specialists with basic information on habitat, range, description, and behavior of common nuisance wildlife to aid in their proper identification at the dam; Describe state-of-practice methods to prevent and mitigate adverse wildlife impacts on earthen dams. Provide state-of-practice design guidance for repair and preventive design associated with nuisance wildlife intrusion. It is envisioned that the entire dam specialist community will use this manual to augment their routine duties in earthen dam management. This manual is presented as a process toward dam inspection and management that includes wildlife damage identification and control. This manual provides technical information and guidance on: How wildlife damage adversely affects the safe operation of earthen dams; specifically, hydraulic alteration, internal and external erosion, and structural integrity losses (Chapter 2.0); Dam inspections that incorporate a biological component to sensitize dam specialists to the aspects of their dams that attract wildlife and to understand where nuisance wildlife are likely to occur on the dam (Chapter 3.0); Biological data for specific nuisance wildlife to assist the dam specialist in identifying which nuisance wildlife inhabits the dam. Biological data will also assist in controlling nuisance wildlife (e.g., listed food sources can be removed to encourage the animal to leave the area) (Chapter 4.0); Dam design specifications and methods that can

be incorporated into repair of existing dams or new dam designs to prevent wildlife intrusions (Chapter 5.0); Guidelines to determine when wildlife management should occur at a dam (beyond dam repair and prevention actions) and wildlife management methods that can be implemented when control of specific nuisance wild-life populations is deemed necessary. Specific methods discussed include habitat modification, use of toxicants and fumigants, trapping, and shooting (Chapter 6.0); The fiscal issues related to appropriate and timely wildlife management at earthen dams (Chapter 7.0).

Studying Ayurveda: a Manual in Progress is a 12-module guide designed to support students in becoming proficient in Ayurvedic worldview and practice. It's a required text for all students of Matthew Remski's Ayurveda courses consisting of more than one day, and a recommended supplement to shorter courses as well. Those who are not enrolled in a course can also find these notes very helpful, but should be aware that the manual's content is enriched by in-person or online lecture presentations and discussion, slides and online quizzes. Notes are presented in bullet-point form. The modules are: 1.

Ayurveda Basics 2. Elements, Gunas, Samkhya Correlations 3. The Dhatus/Doshas as Psychosomatic Forces 4. How the Dhatus Influence Individual Identity 5. Agni, the Root of Digestion 6. Ayurvedic Diet 7. Tissues, Wastes, and Essential Vitality 8. The Five Functions of Prana 9. Optimizing the Breath 10. Daily Routine 11. Cleansing-Daily, Seasonal, Lifetime 12. The Life Cycle

The manual includes the full bibliography of the rich sources that have heavily influenced this material: works by Frawley, Johari, Kacera, Lad, Pole, Tiwari, Ranade, Sharma, Svoboda, Verma, and dozens of other practitioners and scholars. Also included are edited versions of three ground-breaking essays from 2013-2014: "Recovering the Era of Water Medicine" "Ayurveda Is a Political Practice, Part one: Economic justice" "Ayurveda and the Accusation of Pseudoscience" Past students of Matthew's trainings and seminars have said the following: Matthew Remski's approach to Ayurveda is simultaneously pragmatic, poetic, reverent, critical, and honestly quite brave. He is willing to question dogma while cherishing the spirit of Ayurvedic inquiry, and his teaching emboldens me to do the same. - Nick Beem E-RYT500, Phoenix Rising Yoga Therapist & Group Facilitator

From our first online course, I knew I had found a teacher worth "tuning in" to. Matthew Remski's online course is perfect if you'd like to move beyond the surface and eradicate confusion. While I have studied with Ayurvedic physicians and consultants over the years, Matthew Remski expresses a fresh voice on ancient wisdom. His teaching is clear, accessible, and approachable for modern day body/minds. If you are considering an online course, I highly recommend that you block the

time and participate "live" rather than review the recording later. Be prepared to be challenged and fully dive into the homework and quizzes. Your presence, focused attention, and skillfully applied effort will be rewarded with a fuller appreciation and understanding of Ayurveda. The best outcome will be your ease of application of Ayurveda's wisdom in your daily life. - Lisa Long E-RYT 500 In a world that too often emphasizes busy work schedules, imbalance and disconnection, I found that Everyday Nectar offered concrete and practical ways to retune my awareness towards health and wholeness. I think it would be impossible to be unchanged by the course learning. There are opportunities to make the simple adjustments in your day-to-day experience that may have significant health benefits. Matthew is a caring, knowledgeable teacher that creates space for a warm, nourishing inquiry into how ayurveda can positively support our human experience. - Kelly Anderson, MD Matthew brings a rare intelligence and poetic sensibility to his teaching of Ayurveda. Always attentive to modern applications and contemporary context, his classes encompass a riveting dialogue between different times, places and ways of knowing. He makes Ayurveda feel at once intuitive and familiar, while at the same time, offering it as a way think about and experience the the world in radical new ways. - Katherine Friesen

If you want to understand, and be a part of, the creative revolution in materials design, then *Designing with Smart Textiles* is the complete toolkit you need to get started. Beginning by introducing the terminology and key applications, the book goes on to examine the key design processes needed to develop interactive textile design concepts, with detailed projects and examples to help you apply these approaches in your own practice. Case studies and

interviews with innovative designers introduce you to different artistic and technological practices, and demonstrate how world-leading researchers are creating new technologies, yarns, fabrics, and applications. Practitioners share unique insights into their processes, and “Tech Tips” so you can build on their research in your own work. Featured designers include: Yemi Awosile, Joanna Berzowska, Lauren Bowker, Marina Castan, Cute Circuit, Felecia Davis, Debbie Davies, Delia Dumitrescu, Martha Glazzard, Ramyah Gowrishankar, Intelligent Textiles Ltd., Sara Keith, Ebru Kurbak and Irene Posch, Barbara Layne, Eef Lubbers, Anna Persson, Mette Ramsgaard Thomsen, Rose Sinclair, Mike Starbuck, Lynn Tandler, Paola Tognazzi, Sarah Walker and Linda Worbin

Evolving Issues Surrounding Technoethics and Society in the Digital Age

Evolutionary Tactics, A Blueprint for Action, The Real Light at the end of the tunnel from the Vietnam era. Sometimes it takes the perspective of history to unmask the true genius of a person, a book or a point of view. Perhaps even more telling, the first attempt to deal with the subject of Jim Channon's First Earth Battalion was through the vehicle of comedy. The Men Who Stare at Goats, the movie starring George Clooney did not treat the ideas at the core of the First Earth Battalion with anywhere near the attention they deserve. In fact one could say that the movie trivialized the concept through humor, and marginalized the principals as addled characters. The

true nature of the First Earth Battalion can begin to be appreciated by reading the Operations Manual. A hand illustrated work of art highlighting a new direction for not just the military but the planet as well. The fact that Jim felt the army could take the lead in this matter speaks to his own brand of practical idealism that untold numbers of corporate leaders took advantage of on his retirement from the Army. See: <http://cyber.mpnodes.info/archives/509> for the "Goats Declassified" featurette from the DVD to get the real backstory of what transpired and continues to this day.

For decades, traditional medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases. Today, medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression. Unfortunately, these medications come with their own health- and life-threatening side effects. And sometimes, they just stop working. "Fighting the Dragon: How I Beat Multiple Sclerosis" is the story of one woman's thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living

facility within a few years. The book contains detailed descriptions of what worked and what did not, where she got the help she needed (and how the reader can locate these resources within his/her own community), and the logic behind the non-conventional therapies. "Fighting the Dragon" is a narrative of courage—courage driven by desperation, a story written by a patient who decided, when her neurologist told her, "You will never walk normally again," that she would dance. "Fighting the Dragon" is also a book the MS patient can take to his/her physician . . . it contains well-researched, easy-to-follow guidelines for what to do and how. The information is also applicable to a wide range of other autoimmune conditions, cancers, and AIDS. * * * * *

* * * * * Excerpt: . . . if your car kept breaking down and the mechanic you took it to kept doing the same thing to fix it—but it did not stay fixed, you would question the mechanic's competence. Maybe the mechanic pulled out a technical manual. "See. I fixed it exactly as the manual said. This is the industry-approved way to solve this problem." When the car broke down again a week later, would you be satisfied? Probably not. You might decide it is time to replace the car. But that might be too expensive. So, what to do? If you were smart, you would probably try to find a new mechanic. You might ask your friends who they would recommend. You might search on the Internet to see if other people had the same experience with their cars . . . and what caused the problem. You might telephone some repair shops to get some idea of what they thought the problem might be. If you found a new mechanic and that mechanic looked over the car and said, "I have a

solution that is not in any industry-approved repair manuals, but it is safe and it works,”—would you walk away and go back to the first mechanic who never got it right? Why is your health worth any less than your car?

The Vengeance Game: Believe in Evil

In the US and UK, saving and borrowing routines have changed radically and become closely bound-up with the capital markets of global finance. As mutual funds have increased in popularity and pension provision has been transformed, many more individuals and households have come to invest in stocks and shares. As consumer borrowing has risen dramatically and mortgage finance has been extended to those deemed sub-prime, so the repayments of credit card holders and mortgagors have provided the basis for the issue and trading of bonds and other market instruments. The Everyday Life of Global Finance explores the unprecedented relationships that now

bind society and the markets, challenging the dominant tendency to simply position recent developments in Wall Street and the City of London at the centre of contemporary finance. Grounded in literature from the sociology of finance and international political economy, drawing on the social theory of Callon, Foucault, and Latour, and informed by extensive empirical research, the book shows how global finance has become mundane and ordinary in Anglo-America. Finance is not 'out there somewhere', but is embedded in the calculative technologies and performances of reconfigured saving and borrowing networks, and is embodied through the assembly of everyday financial identities and self-disciplines. Society's new-found relationships with the financial markets are also shown, however, to be marked by stark inequalities, manifest contradictions, and political dissent. *The Everyday Life of Global Finance* is thus an ambitious and innovative contribution to our understanding of the contemporary financial world.

The Art Of Fixing Things 2

Marriage is hard. Living together in a committed, non-traditional relationship is just as hard, maybe more so. A less than completely satisfying level of happiness and fulfillment within a primary relationship is perhaps the most common human dysfunction in the modern world. So much so that we have come to accept something less than complete bliss in our marriages, partnerships and domestic arrangements as the normal state of things, an

expectation born of human imperfection and the pressing need for constant compromise. We have redefined it as something less than the word bliss actually implies. Coming even mildly close to bliss is considered a rousing success, but even then, whatever sliver of unrest, anxiety and inconsistency remain can flare into a torrent of restlessness that could one day again render you single . In CHASING BLISS, Larry Brooks shows us a path toward bucking that trend through the channeling of our imperfection toward a perfectly functional awareness of how we might be contributing to the problem, while becoming coach and therapist when we're not. While repeatedly reminding the reader that some problems remain the province of professional counselors, CHASING BLISS holds up a mirror to the many ways time and apathy become toxic factors in reducing loving relationships to something less than how they began, with kindness, togetherness, sexual satisfaction and hope the price of growing apart while growing weary of each other. The book is divided into three sections: ten reasons why men might cheat ten reasons why women might leave the nest for a better life and an exploration of eight primary realms of relationship, the mastery of which becomes a tool chest of strategies and solutions that not only mitigate decline, but serve to refuel the chemistry and hope that once brought you together. This goes beyond the theoretical with specific actionable responses and alternatives to some of the most common challenges couples face, while clarifying tough, indisputable truths about the roles we play in our own domestic tragedies. Even if we feel - all the way to divorce court - that it was the other person's fault. This,

promises the author, is the stuff your shrink will goad you into realizing for yourself, but without the weeks and months of therapy it could take to reach that point with clarity and purpose. It's all right here, in your face, unassailable and immediately useful in real life. In her Foreword to the book, Dr. Carrie Rubin says this: the beauty of this book is its power to be a tool for both relationship recovery and healthy relationship maintenance. For those in good shape, its advice will serve as a protective life vest, one that will keep you from sinking into troubled waters." Brooks knows from where he speaks, having been down the road to failure not once, but twice, and is now twenty years happily married to a woman that challenges him to be the best version of himself, with immovable consequences if he is not. "On paper we shouldn't work," he writes, "but we are living in a state I can only describe as bliss, if bliss is defined as inclusive of the trials and challenges that are inevitable and ready to rip you apart. Now we are stronger than the problems life throws our way, not because we are better or smarter than couples who don't make it, but because we are vulnerable to these truths and committed to the principles of interaction and loving partnership that are necessary to make it to the other side." These truths are the heart and soul of CHASING BLISS, a book for people who want to make love work, but fear they aren't up to it. With these principles, you just might become the couple that gets there through an understanding that bliss is not a destination or a finish line, but the road itself. Which, armed with empowered awareness and sensitivity, you can now actually pave with the good intentions that others blame.
