J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Stop Discounting! Start Selling! For more than seven decades, David Oreck has been successfully marketing products to the American consumer. He took his little startup vacuum company and turned it into a household name and not by relying on big advertising or slick sales pitches. He understood that

the customer does not want to be 'sold'; they want value! Just like many small business people today, Oreck started his company on a shoestring and a dream but to compete with the national brands and big corporations, he had to get creative. This meant taking his product directly to consumers and bypassing the middlemen. Success was not easy and there were many challenges that could have suffocated his small company - but his persistence and marketing prowess kept the company going - and growing. It is easy to think that times have changed, but the truth is the consumer hasn't and once you really understand your customer you have the key that will solidify your place in the market. This is good news for all the little companies that may be wondering how they could ever compete with the bog box retailers of the world. Through unconventional wisdom that flies in the face of conventional marketing notions, Oreck explains how today's entrepreneur can create their own profitable niche in a very crowded market - no matter the economy. This specific time-tested knowledge can be the key to your business becoming profitable or falling by the wayside this year and offers more than 70 years of priceless real world marketing experience. Don't miss your chance to learn from one of the masters of business!

Did you ever wonder what life is really like in prison? Or, how the legal system operates to put someone there? Do prison guards carry weapons? If not, why not? Are conditions really that bad in prison? Should we execute more people waiting on death row, or should the death penalty be eliminated all together? How does an inmate get out on parole in Pennsylvania? Is there any rehabilitation going on in prison? If so, why do many inmates continue to return to prison after leaving on parole? In most cases, do we really have a choice as to whether we end up in prison or not? If you are not sure or are undecided on the answers to most or all of these and many other questions about prison and prisoners, you need to read this book. Hopefully it will satisfy your curiosity on the subject, and make you think twice about how people end up living there. For those who do live there or have in the past, hopefully it will serve as a reference point and an eye opener. The facts,

statistics, stories, and information in the book were carefully researched and written from inside Pennsylvania's largest maximum security prison.

## **The Lean Body Manual**

Breaking with the exoticizing cast of public discourse and conventional research, *Urban Outcasts* takes the reader inside the black ghetto of Chicago and the deindustrializing banlieue of Paris to discover that urban marginality is not everywhere the same. Drawing on a wealth of original field, survey and historical data, Loïc Wacquant shows that the involution of America's urban core after the 1960s is due not to the emergence of an 'underclass', but to

the joint withdrawal of market and state fostered by public policies of racial separation and urban abandonment. In European cities, by contrast, the spread of districts of 'exclusion' does not herald the formation of ghettos. It stems from the decomposition of working-class territories under the press of mass unemployment, the casualization of work and the ethnic mixing of populations hitherto segregated, spawning urban formations akin to 'anti-ghettos'. Comparing the US 'Black Belt' with the French 'Red Belt' demonstrates that state structures and policies play a decisive role in the articulation of class, race and place on both sides of the Atlantic. It also reveals the crystallization of a new regime of marginality fuelled by the fragmentation of wage labour, the retrenchment of the social state and the concentration of dispossessed categories in stigmatized areas bereft of a collective idiom of identity and claims-making. These defamed districts are not just the residual 'sinkholes' of a bygone economic era, but also the incubators of the precarious proletariat emerging under neoliberal capitalism. *Urban Outcasts* sheds new light on the explosive mix of mounting misery, stupendous affluence and festering street violence resurging in the big cities of the First World. By specifying the different causal paths and experiential forms assumed by relegation in the American and the French metropolis, this book offers indispensable tools for rethinking urban marginality and for reinvigorating the public debate over social inequality and citizenship at century's dawn.
