Nitrogen Removal in Cold Regions Trickle Filter Systems

Pacific Seaweed Aquaculture

Pennsylvania State University Soil Characterization Laboratory Methods Manual

Temporal and Spatial Variability of Streamflow Acidification in Vermont

Determination of Anions

Freshwater and Marine Aquarium

Oceanographic Data Reduction Manual I

This new manual is an indispensable working lab guide and reference for water/wastewater quality analysis. Based on procedures from "Standard Methods" and "Methods for Chemical Analysis of Water and Waste (EPA)," and other pertinent references the Water and Wastewater Examination Manual is an excellent complement to these references-that you will want to keep at your fingertips. Written especially for use by water quality laboratory technicians and water/wastewater operators, managers and supervisors-who will use this practical manual every day. Procedures are included for parameters frequently used in water quality analysis.

Laboratory Practice

Water and Wastewater Examination Manual

The Impact of Urbanization on a Flood Plain Aquifer: Bloomington, Indiana

Power Engineering

Journal of the American Society of Sugar Beet Technologists

Trickling filters are found in about 50% of the operating wastewater treatment systems owned by the U.S. Army, and more likely for any new construction. Control of nitrogen, particularly ammonia in wastewater effluents is a growing necessity. Ammonia can be removed in trickling filters but the process is temperature-dependent. This study combined an intensive literature review with data collection at full-scale and pilot-scale systems. These results are presented and evaluated. A liquid temperature of at least 7 C is necessary in the filter bed for effective ammonia removal, and a separate single-purpose filter bed dedicated for nitrification is recommended when significant ammonia removal is required at cold regions locations. Criteria and equations are derived for future cold region system designs. (Author).

Manual for Soil and Water Analysis

Cobalt Sorption Studies on a Bacterium and a Natural Organic Material, And, On-line Beehives

Assessment of Acidic Deposition and Ozone Effects on Conifer Forests in the San Bernardino Mountains: Desert Research Institute

Manual of Procedures

Thomas Scientific Apparatus and Reagents

This book offers a complete and up-to-date compilation of the currently employed methods of chemical analysis of anions. It helps the practitioner to apply these methods fast and reliable in his own laboratory or to build new methods to meet his more specialized needs. More than 200 tables and 100 figures make this volume an invaluable source for the analyst.

Study of the Marine Environment of the Northern Gulf of California

Scientific Apparatus and Reagents

Pennsylvania State University Soil Characterization Laboratory Manual

Manual of Procedures for the Seminar on Clinical Pathology of Cancer of the Endocrine Glands and Target Organs

Journal of the Association of Official Analytical Chemists

Public Works Manual

Handbook of Methods for Acid Deposition Studies

Kinetics and Intraparticle Mass Transfer Limitations in Photocatalytic Systems

Manual of Procedures

Includes the Proceedings of the 30th-57th (1913-40) annual convention of the association. Earlier proceedings were issued as Bulletins of the U.S. Dept. of Agriculture, Bureau of Chemistry.

Power Plant Engineering

American Laboratory

EPA-600/4

Reviews the latest advances in redox/conductive polymers and membranes. Describes new redox polymers useful in miniaturizing biosensors and examines polymers for optical biosensors. Investigates interesting membranes to enhance the performance of biosensors. Features biocompatible polymers useful in implantable sensors. Includes discussions on enzyme immobilization and methods to increase enzyme stability. Describes the chemistry and technology of dry chemistries.

Diagnostic Biosensor Polymers
