Launched in 1958, as the successor to the ubiquitous Ferguson TE20, the Masey-Ferguson 35 was a product of the merger of Massey-Harris and Ferguson. It incorporated numerous improvements and new features and became massively popular worldwide. Its companion, the 65 model, was introduced shortly afterwards

and was a larger tractor, offered with the revolutionary Multi Power system that gave 12 forward and four reverse gears. Durable and versatile, these tractors are still a practical proposition today, and even unrestored examples command high prices. Michael Thorne, author of *Ferguson TE20 in Detail*, continues the story as he describes the development of these models, the production versions and their capabilities, options and extras, conversions, implements and their use today. Outstanding surviving examples are featured in some 80 photographs specially taken for this book, and there are approximately 120 accompanying archive illustrations.

The little grey Fergie is Britain's best-loved tractor, the light user-friendly machine that finally replaced the horse on farms. This highly illustrated account covers the full history of Harry Ferguson's tractor products from his pioneering work before the 1930s to the merger with Massey in 1957. The author has had access to fresh archive material and has interviewed many of the surviving men who were associated with Ferguson. The appeal of the Fergie lay in its lightness and utility, and also in the system of mechanized farming of which it was a part. Throughout the book, reference is made to the implements which lay at the heart of the system. Stuart Gibbard has won "Tractor and Machinery" magazine's award for the best British tractor book five years running.

Rethinking the Region argues that regions are not simply bounded spaces on a map. This book uses unique research of England during the 1980s to show how regions are made and unmade by social processes. The book examines how new lines of division both social and geographical were laid down as free-market growth and reconstructed this area as a 'neo-liberal' region. The authors argue that a more balanced form of growth is possible - within and between regions as well as between social groups. This book shows that to grasp the complexities of growth we must rethink 'the region' in time as well as in space.
