### **Ecology**

The increasingly rapid destruction of the ecological systems that support life is calling into question some of the fundamental stories that we live by: stories of unlimited economic growth, of consumerism, progress, individualism, success, and the human domination of nature. Ecology shows how linguistic analysis can help reveal the stories we live by, open them up to question, and contribute to the search for new stories. Bringing together the latest ecological studies with new theoretical insights and practical analyses, this book charts a new course for ecology as an engaged form of critical enquiry. Featuring: A framework for understanding the theory of ecology and applying it practically in real life; Exploration of diverse topics from consumerism in lifestyle magazines to Japanese nature haiku; A comprehensive glossary giving concise descriptions of the linguistic terms used in the book; Discourse analysis of a wide range of texts including newspapers, magazines, advertisements, films, nonfiction books, and visual images. This is essential reading for undergraduates, postgraduates and researchers working in the areas of Discourse Analysis and Language and Ecology.
