This is a general reference work on all aspects of intellectual property, including international treaties and conventions, analyses of all fields of intellectual property, its administration, enforcement and teaching, technological and legal developments, and WIPO's work in its Member States. It covers issues including electronic commerce, biotechnology, traditional knowledge and management of copyright and related rights and WIPO's vision and approaches to meet new challenges with a widening circle of partners. Can be used as a key reference work by creators, innovators, intellectual property lawyers, government officials, university teachers and students.

Autocar & Motor

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning

resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.
