Countdown to Justice

General Information 1997

Every year around the globe, people cross paths with avalanches-some massive, some no deeper than a pizza box-often with deadly results. Avalanche expert Jill Fredston stalks these so-called freaks of nature, forecasting where and when they will strike, deliberately triggering them with explosives, teaching potential victims how to stay alive, and leading rescue efforts when tragedy strikes. Having spent decades trying to keep avalanches and people apart, Fredston brings them together unforgettably in *Snowstruck*. From a rare store of personal experience, she conveys a panorama of perspectives: a skier making what may prove his final decision, a victim buried so tightly that he can't move a finger, rescuers racing both time and weather, forecasters treading the line between reasonable risk and danger. Seamlessly interweaving these accounts, Fredston brings to life the awesome forces of nature that can turn the mountains deadly-and the equally inexorable forces of human nature that lure us time and again into treacherous terrain.

With the 1998 debut of its V92C, Victory Motorcycles became the New American Motorcycle. Victory's innovative, stylish heavyweight cruiser motorcycles attracted a loyal, hard-riding following, but not the market share needed to survive. This richly illustrated book covers the brand's history model-by-model and analyzes why the parent company announced in early 2017 that its Victory division would cease operation. This book also features a full reprint of the collectible first Victory history from 1998, *The Victory Motorcycle*.

(Book). Publishing is one of the most complex and lucrative parts of the music business. Industry expert Randall Wixen covers everything from mechanical, performing and synch rights to sub-publishing, foreign rights, copyright basics, types of publishing deals, advice on representation and more. Get a view from the top, in plain English. This updated and revised edition has been prepared in light of the ever-changing landscape of music publishing, taking into account factors like illegal downloading and recent announcements from the Copyright Royalty Board. With an added "DIY" chapter, the author demonstrates why the playing field has changed for the traditional copyright administrators, and how musicians just starting out can protect their own work until they hit the big time.

Mount Hood, Oregon, is a beautiful, peaceful destination located about forty minutes outside Portland. It stands like a sentinel, looking over its kingdom below. In the warm months, as the sun sets, there is an alpine glow, which makes the mountain appear pink. Skiing is almost 365 days a year. That is, until a murder so appalling is discovered by a hiker and a Forest Service employee. This was not the first murder of its kind, and it won't be the last. Across the mountain, a web of murder and mystery is woven that entangles all that get too close to the . . . Trail Stalker

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Lake Dillon sits at almost 2 miles high in the Rocky Mountains. The dam and reservoir that produced this Summit County resort, along with Dillon Village on its shore and the town of Silverthorne just below it, are collectively one of Colorado's winter-summer fun destinations. Dillon Dam is 5,288 feet long by 231 feet high, creating a large freshwater source for the city of Denver, as well as 25 miles of scenic shoreline. The dam stores 85.5 billion gallons of water from the Snake and Blue Rivers and Ten Mile Creek. On cue, these waters rush eastward to the South Platte River Basin through the Transmontane Project, or Roberts Tunnel--augered hundreds of feet under the Continental Divide in one of the West's most controversial water relocation epics. Today Dillon, Silverthorne, and the Blue River Basin on Colorado's western slope see their share of sailboating, snow and Nordic skiing, windsurfing, and snowboarding.

Two thousand years after the Jewel of Peace ended the devastating Wizard Wars, chaos stalks the land again. The tyrant Broman lusts to take up the Stone and twist the world into his personal plaything. The Wizard Ord desires to find the Spirit that can control the weapon and manipulate it to his will. It falls to the humble mountaineer Geret to take up the mantle of a millenia-old battle and tame the Spirit he unwittingly inherits. As war savages the land anew and pits nation against nation, hope hangs by the thinnest thread; a mountaineer with Spirit against a centuries-old Wizard willing to use the Stone to smash the world asunder.

This fascinating book relates all the excitement, mystery, danger, and adventure of living and traveling in Siberia. It all started back in 1991, when I received an invitation via the Gorbachev government, in conjunction with a mining company working with the Soviet Union, to visit, write about, photograph, and film what the country had to offer American tourists and hunters. This was the era of "Glasnost" and "Perestroika." Gorbachev wanted to bring in American tourists to bolster the sagging economy. That first expedition led to 22 years traveling back and forth to the former Soviet Union - now Russia - where I hung out with the KGB, met numerous dignitaries, and lived in tents and trappers' cabins in Siberia with the local natives. We were attacked by bears, wild boars, and moose! Among those traveling with me were Apollo Astronaut Jim McDivitt, who was stalked by a Russian bear, and a four-star air force general, Earl O'Loughlin, who used to fly spy plane missions over the former Soviet Union. This made for a very interesting confrontation with the KGB. During my time in Siberia, I got to know many of the native people, who relayed numerous sad and harrowing stories of encounters with giant bears. The book is jam-packed with historical perspective of what was happening at this time in Russia, including how the people lived, worked, survived, and what they thought of Americans. While framed by hunting, this book is as much about the people and the culture of Siberia. About the Author Now retired, Michigan native Denny Geurink was previously a teacher and the Midwest editor for Field & Stream magazine. He wrote a weekly newspaper outdoor column for nearly forty years. Publisher's website: <http://sbprabooks.com/DennyGeurink>

Fresh from successfully defending a Texas billionaire, Gabriela Sanchez wants to avoid the media spotlight. Then she is asked to represent Gina Rossi, a determined, driven, cold-as-ice lawyer who refuses to testify in a grand jury bribery investigation of her client and the former Texas governor. Defending a client against the Department of Justice is at best a daunting task, but Gina Rossi makes it even more difficult when she is unwilling to listen to Gabriela's legal advice and refuses to tell her all of the important facts. Rossi claims she cannot testify because of the lawyer-client privilege and she asserts the government will charge her with perjury if she doesn't tell the story they want to hear. Why is Gina willing to go to jail, risk her career and take on the Department of Justice? Gabriela believes Gina knows something that she needs to keep secret. How far is Gina willing to go to keep what she knows secret?
