Excerpt from The Queensland Criminal Reports: Being a Reprint of All Criminal Cases Reported in the Supreme Court Reports, Vols; 1 to 5 (1860-1881), The Queensland Law Journal and Notes of Cases, Vols; I. To XI. (1881 to 1901), And the Queensland State Reports and Weekly Notes (1902 to 1907) This volume of reprinted reports of Criminal Cases has been compiled in order to have in a handy form, both for Court work and for reference purposes, the cases decided on this branch of the law in Queensland prior to the publication of The Queensland Justice of the Peace, to which it is a companion volume. Difficulty has been experienced, especially by new practitioners, in obtaining complete sets of the reports

(particularly the earlier volumes), from which these cases have been reprinted, and in addition to such difficulty, the price of the reports 'is a serious consideration. Numerous requests have been made during recent years for such a volume, and it is hoped it will prove of service, not only to members of the Profession, but also to Magistrates, Clerks of Petty Sessions, and members of the Police Force. A Subject Index is included in order to facilitate quick reference to cases. The Editor desires to express his thanks to Mr. T. B. Hunter, Solicitor, who has personally attended to the reading of the proofs and the checking of. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. This volume focuses on new trends in monitoring biodiversity in the Asia-Pacific region, one of the most rapidly changing areas in the world. It provides reviews of the challenges in studying the spatial variability of biodiversity across various ecosystems. This book also describes newly developed concepts and methods for biodiversity observation including ubiquitous genotyping, systematic conservation, monitoring of the functions and services of ecosystems and biodiversity informatics. These contributions will lead to establishing integrative observations

and assessments of biodiversity, essential for reporting the current status and for the effective conservation and sustainable use of biodiversity. This work will interest biodiversity researchers not only in the Asia-Pacific region but also across the entire globe.

#### **Queensland statutes (1962 reprint).**

Solves the problem of Restricted Least Squares by developing a new estimator that collapses RLS in cases where the restrictions are observation invariant.

Evidence from Earth Observation Satellites is an edited collection analysing emerging legal issues surrounding the use of satellite data as evidence. It considers whether data from satellite technologies can be a legally reliable,
