Handbook of Evidence-Based Practice in Clinical Psychology, Child and Adolescent Disorders

Practical information and evidence-based findings on the most effective and current prevention interventions for children and adolescents The Handbook of Preventive Interventions for Children and Adolescents is the first book that thoroughly covers the various types of prevention interventions available for children and adolescents encountering emotional, health, and social problems. Using Gordon's primary prevention model, each chapter offers an introductory summary of the problem, then moves on to discuss trends; incidence; risk factors; interventions available on a universal, selective, and targeted level; and future directions. Featuring an interdisciplinary list of expert contributors, this guide covers preventive interventions addressing child and adolescent problems including: Unresolved grief Teenage suicide Birth defects Substance abuse

Teenage pregnancies Sexually transmitted diseases HIV/AIDS Eating disorders School violence School dropout And more An exceptional resource for practitioners, researchers, policy makers, and students alike, the Handbook of Preventive Interventions for Children and Adolescents is important reading for anyone who works with young people in a variety of settings.

Advances in School-based Mental Health Interventions

"Mental Health Practice in Today's Schools: Issues and Interventions provides a comprehensive guide to the mental health issues of students in our schools and practical school-wide prevention and intervention strategies to address these challenges. This text will likely serve as an essential resource for mental health practitioners and educators working in the schools for years to come." --Michael A. Keim, NCC, Columbus State University, The Professional Counselor In today's schools, the variety and consequences of mental health problems are growing and receiving greater public attention. Moreover, dwindling resources add to the difficulties of providing adequate mental health services. This practice-oriented, evidence-based resource addresses the key mental health issues and challenges facing school-based professionals and helps to facilitate effective and focused mental health consultation, training, and counseling within the school setting. Grounded in a tiered intervention approach to school psychological practices, this text focuses on preventive and proactive services that are integrated at the school-wide and classroom levels, as well as more intensive mental health services for the most vulnerable students. In addition to addressing core issues such as screening for at-risk students, Response to Intervention (RTI) and mental health, culturally sensitive practices, community services and supports, law and ethics, and the role of micro-skills in daily practice, this text also covers critical topics such as bullying and cyber-bullying, physical and sexual abuse, suicide prevention and intervention, school crisis response, threat assessment, and substance abuse. Chapters feature illustrative case examples as well as summaries of key concepts. Facilitating knowledge and awareness of evidence-based mental health practices in schools for practitioners at every level of service, this textbook is also an essential resource for graduate students in school psychology, school guidance and counseling, school social work, and educational leadership. KEY FEATURES: Emphasizes mental health practice from school-wide prevention to student-specific intervention Highlights the essential service connection of RTI to student mental health needs and issues Expands graduate students' and practitioners' knowledge and skill sets regarding high need issues and challenges Describes state-of-the-art, evidence-based mental health programs, services, and approaches Includes case examples within chapters and extensive capstone case studies

Blueprints for Violence Prevention: Functional family therapy

Handbook of Evidence-Based Practice in Clinical Psychology, Volume 1 covers the evidence-based practices now identified for treating children and adolescents with a wide range of DSM disorders. Topics include fundamental issues, developmental disorders, behavior and habit disorders, anxiety and mood disorders, and eating disorders. Each chapter provides a comprehensive review of the evidence-based practice literature for each disorder and then covers several different treatment types for clinical implementation. Edited by the renowned Peter Sturmey and

Michel Hersen and featuring contributions from experts in the field, this reference is ideal for academics, researchers, and libraries.

Counseling and Psychotherapy with Children and Adolescents

Multisystemic therapy (MST) has grown dramatically since the initial publication of this comprehensive manual. Today, over 400 MST programs operate in more than 30 states and 10 countries, supported by a strong empirical evidence base. This book explains the principles of MST and provides clear guidelines for clinical assessment and intervention with delinquent youth and their families. Practitioners are guided to implement proven strategies for engaging clients and helping them to address the root causes of antisocial behavior, improve family functioning and peer relationships, enhance school performance, and build meaningful social supports. New to This Edition *Includes the latest MST data and clinical refinements. *Revised to be even more user-friendly, with many new examples added. *A chapter on treating youth and caregiver substance abuse. *Expanded coverage of safety concerns, enhancing vocational outcomes, and MST adaptations for other clinical problems. *A chapter detailing the MST system for sustaining high-quality programs.

Handbook of Preventive Interventions for Children and Adolescents

The standard reference in the field, this acclaimed work synthesizes findings from hundreds of carefully selected studies of mental health treatments for children and adolescents. Chapters on frequently encountered clinical problems systematically review the available data, identify gaps in what is known, and spell out recommendations for evidence-based practice. The authors draw on extensive clinical experience as well as research expertise. Showcasing the most effective psychosocial and pharmacological interventions for young patients, they also address challenges in translating research into real-world clinical practice. New to This Edition *Incorporates over a decade of research advances and evolving models of evidence-based care. *New chapter topic: child maltreatment. *Separate chapters on self-injurious behavior, eating disorders, and substance use disorders (previously covered in a single chapter on self-harming disorders). *Expanded chapters on depression, anxiety, and conduct disorder. *Includes reviews of the burgeoning range of manualized psychosocial "treatment packages" for children.

Risk Reduction

This program targets specific factors in each youth's and family's environment (family, peer, school, neighborhood) that contribute to antisocial behavior. The goal of the intervention is to help parents deal effectively with their youth's behavior problems, including deviant peers and poor school performance.

Handbook of Serious Emotional Disturbance in Children and Adolescents

Multisystemic Therapy and Neighborhood Partnerships

Learn to tackle the very challenging behavior problems of children and adolescents that you commonly see in your family therapy practice. This practical book provides the practicing clinician with an overview of structural-strategic approaches for treating child and adolescent behavior problems. It is unique in specifying successful approaches for a range of behavior problems, with all approaches based on the same concept--the Structural-Strategic model of family therapy. Behavior problems are the most common reason for referral of children and adolescents for therapy. In addition, behavior problems are major impediments to educational progress and full benefit from medical care. Multi-Systemic Structural-Strategic Interventions for Child and Adolescent Behavior Problems focuses on the major types of behavior problems: antisocial and delinquent behavior, drug abuse, eating disorders, sex-related problems, school behavioral problems, and problems with compliance with pediatric medical care. Chapters by Editor Patrick H. Tolan and an impressive group of contributing authors will expand your knowledge and the utility of structural-strategic family therapy by emphasizing the role of responsibility and accountability of family members. This volume is the first to use this view to specifically address the treatment of a variety of behavior problems. Techniques for applying structural-strategic approaches in working with other systems, including schools, are also presented. Aimed at the practicing clinician, especially those who consider themselves primarily family therapists, Multi-Systemic Structural-Strategic Interventions for Child and Adolescent Behavior Problems is of interest to any professional treating children and adolescents. A useful text for trainers of interns and residents and faculty of independent family therapy training programs, this major book is also an important addition to specialized courses in family therapy, child therapy, and SS therapy, and graduate courses in social work, psychology, and nursing programs.

Foundations of Couples, Marriage, and Family Counseling

- Presented into two clear and understandable sections: theoretical/empirical and intervention programs - Both authors have immense experience dealing with disaster and mass trauma, both in Israel and in the United States - Serves as both a reference tool and as a toolkit that can be used by all important players involved, which include mental health personnel, teachers, and parents

Evidence-based Practices in Mental Health Care

Remediating deficits and managing disabilities has been a central preoccupation for clinical psychologists for much of the past 50 years. Positive psychology, in contrast, is concerned with the enhancement of happiness and well-being, involving the scientific study of the role of personal strengths and positive social systems in the promotion of optimal well-being. The central themes of positive psychology, including happiness, hope, creativity, and wisdom, are all investigated in this book in the context of their possible applications in clinical practice. (Midwest).

What Works for Whom?, Second Edition

The papers in this collection discuss correctional practices and programs for high-risk offenders, reaffirming that rehabilitation can work even for difficult populations such as sex offenders, wife batterers, psychopaths, and violent teenagers.

Mental Health Practice in Today's Schools

This book has been replaced by *Adolescents at Risk: Home-Based Family Therapy and School-Based Intervention*, ISBN 978-1-4625-3653-5.

Handbook of Evidence-based Psychotherapies

Currently, school psychiatrists are having to work more and more frequently with students with health problems and chronic illnesses; there is a strong need, therefore, for them to be adequately trained in the knowledge and impact of pediatric health disorders on children's academic, social, and emotional progress and performance, all of which are critical components in the education system.

Reaching Out in Family Therapy

At a time when evidence is everything, the comprehensive *Handbook of Evidence-Based Psychotherapies* handbook provides a unique, up-to-date overview of the current evidence-base for psychological therapies and major psychological disorders. The editors take a pluralistic approach, covering cognitive and behavioural therapies as well as counselling and humanistic approaches. Internationally-renowned expert contributors guide readers through the latest research, taking a critical overview of each practice's strengths and weaknesses. A final chapter provides an overview for the future.

Youth Violence

This text applies Cognitive Behavior Therapy (CBT) to use in school settings, presenting the first comprehensive integration of theory with specific intervention strategies and techniques designed for work in school. An essential reference text for mental health professionals working closely with school officials, it is also useful as a resource for school psychologists, guidance counselors, pupil personnel support staff, school social workers and clinical psychologists. Chapters are organized around topics such as anxiety, depression, eating disorders, peer aggression and bullying, ADHD, and parent consultation, and include assessment tools, tips and strategies, intervention techniques, and case studies. Including contributions from a renowned group of scholars and practitioners, this collection represents a standard upon which future progress can be built.

School-Based Multisystemic Interventions For Mass Trauma

Multi-systemic Structural-strategic Interventions for Child and Adolescent Behavior Problems

This book covers new multisystem interventions that work on all levels, from school to family to community agencies to the policy level. Five sections and 45 chapters explore strategies for areas of current challenge, including: Curbing aggressive behaviour in childhood; Improving attendance in at-risk children in elementary school; Empowering families through co-operative pre-school education; Working with teenagers with ADHD; Preventing youth suicide; Participating in a traumatic event debriefing; Preventing substance abuse in middle school; and many more. In addition, Multisystem Skills and Interventions, gives examples of larger system and policy interventions, in chapters that include HIV/AIDS policy development and reform, Medicaid managed care and urban poor people, and more. Written by and for frontline practitioners, Multisystem Skills and Interventions is ideal for courses in school social work; juvenile justice; family, children, and youths; child welfare; and children's mental health specialisation's.

Psychiatric Mental Health Nursing Research Digest

This multidisciplinary, multisystemic handbook presents current theory, research, practice, and policy concerning Serious Emotional Disturbance (SED) and highlights opportunities for practitioners to serve this sensitive and vulnerable population. SED is an umbrella term describing severe and persistent mental disorders in children and adolescents, including ADHD, schizophrenia, bipolar disorder, major depressive disorder, and other severe anxiety disorders.

Multisystem Skills and Interventions in School Social Work Practice

"This is an excellent reference and guide to intervention for academics, clinicians, and educators concerned with understanding and decreasing violence."--Choice: Current Reviews for Academic Libraries In the U.S., youth violence is the second leading cause of death for young people between the ages of 10 and 24. This volume, authored by a noted psychotherapist with more than 30 years of experience in family violence, examines recent violent episodes perpetrated by young offenders in order to understand their root causes and to disseminate current prevention and treatment methods through a multidisciplinary lens. The book addresses the theoretical underpinnings of youth violence from the perspectives of psychology and neurobiology, describes different types of violence, includes the latest research on "what works" in prevention and treatment, and examines connections between substance abuse, familial and community violence, and school failure in promoting violence in adolescents. Youth Violence is a comprehensive yet highly readable volume for mental health and social service professionals who work with youth and families, and violence researchers. Key Features: Provides real life case studies from Virginia Tech, Columbine, and other recent violent incidents perpetrated by young people Written by an author with over 30 years of experience in youth violence and creator of the premier risk assessment test in use today Offers the latest findings on "what works" in prevention and treatment

Pediatric School Psychology

As the first attempt to synthesize the movement toward widespread implementation of evidence-based mental health practices, this groundbreaking collection articulates the basic tenets of evidence-based medicine and shows how practices proven effective by clinical services research could improve the lives of many people. Intended to stimulate much-needed public discussion, these remarkable contributions cover both general issues, such as - Implementing practices in routine mental health settings, including strategies for disseminating evidence-based practices to staff members- Ensuring that efforts to implement such practices are informed by the knowledge and experience of administrators, clinicians, patients, and advocates- Integrating evidence-based practices with the recovery model and focusing on guidelines and algorithms for pharmacologic treatment of people with severe mental illness- Identifying the policy implications of the movement, particularly in public-sector settings, and describing eight courses of action for addressing the gap between science and practice and specific practices, such as - Describing critical components of practices for which substantial evidence exists, such as supported employment, dual diagnosis services, and assertive community treatment- Developing an evidence base for particular populations, such as children and adolescents and geriatric patients; and for clinical subgroups, such as patients with severe mental illness and posttraumatic stress disorder-and implementing a range of practices for each population Debate in public forums is critical to explaining the benefits of evidence-based care and allaying the fears of patients, practitioners, administrators, policy makers, and vested interest groups that evidence-based care excludes them from the decision-making process. Patients need to know that their individual characteristics, preferences, and autonomy are highly valued and won't be discounted by rigid adherence to the particular treatments. Practitioners need to know about the credibility of the evidence base and about new techniques and responsibilities and to understand that their favorite practices won't necessarily be excluded during initial attempts to implement evidence-based practices. Administrators and policy makers need to know about financing, organizing, implementing, and sustaining new practices. Finally, vested interest groups need to know that the introduction of evidence-based practices doesn't mean that what they do now is ineffective. This unique and densely informative volume will be welcomed by mental health care professionals and by lawmakers, planners, administrators, and others who are charged with the responsibility of providing effective care to vulnerable populations.

Serious Emotional Disturbance in Children and Adolescents

Criminology has experienced tremendous growth over the last few decades, evident, in part, by the widespread popularity and increased enrollment in criminology and criminal justice departments at the undergraduate and graduate

levels across the U.S. and internationally. Evolutionary paradigmatic shift has accompanied this surge in definitional, disciplinary and pragmatic terms. Though long identified as a leading sociological specialty area, criminology has emerged as a stand-alone discipline in its own right, one that continues to grow and is clearly here to stay. Criminology, today, remains inherently theoretical but is also far more applied in focus and thus more connected to the academic and practitioner concerns of criminal justice and related professional service fields. Contemporary criminology is also increasingly interdisciplinary and thus features a broad variety of ideological orientations to and perspectives on the causes, effects and responses to crime. 21st Century Criminology: A Reference Handbook provides straightforward and definitive overviews of 100 key topics comprising traditional criminology and its modern outgrowths. The individual chapters have been designed to serve as a "first-look" reference source for most criminological inquires. Both connected to the sociological origins of criminology (i.e., theory and research methods) and the justice systems' response to crime and related social problems, as well as coverage of major crime types, this two-volume set offers a comprehensive overview of the current state of criminology. From student term papers and masters theses to researchers commencing literature reviews, 21st Century Criminology is a ready source from which to quickly access authoritative knowledge on a range of key issues and topics central to contemporary criminology. This two-volume set in the SAGE 21st Century Reference Series is intended to provide undergraduate majors with an authoritative reference source that will serve their research needs with more detailed information than encyclopedia entries but not so much jargon, detail, or density as a journal article or research handbook chapter. 100 entries or "mini-chapters" highlight the most important topics, issues, questions, and debates any student obtaining a degree in this field ought to have mastered for effectiveness in the 21st century. Curricular-driven, chapters provide students with initial footholds on topics of interest in researching term papers, in preparing for GREs, in consulting to determine directions to take in pursuing a senior thesis, graduate degree, career, etc. Comprehensive in coverage, major sections include The Discipline of Criminology, Correlates of Crime, Theories of Crime & Justice, Measurement & Research, Types of Crime, and Crime & the Justice System. The contributor group is comprised of well-known figures and emerging young scholars who provide authoritative overviews coupled with insightful discussion that will quickly familiarize researchers, students, and general readers alike with fundamental and detailed information for each topic. Uniform chapter structure makes it easy for students to locate key information, with most chapters following a format of Introduction, Theory, Methods, Applications, Comparison, Future Directions, Summary, Bibliography & Suggestions for Further Reading, and Cross References. Availability in print and electronic formats provides students with convenient, easy access wherever they may be.

Social problems.

Multisystemic Therapy for Antisocial Behavior in Children and Adolescents, Second Edition

This volume is the product of a combined effort to find programs of service delivery that demonstrably treat the varieties of mental health problems of children and their families. The Section on Clinical Child Psychology (APA, Clinical Psychology Section I) and the Division of Child, Youth, and Family Services (APA, Division 37) established a task force whose mission was to identify, provide recognition for, and disseminate information on such programs. Their findings are presented here. The opening chapter and each section overview chapter provide orientations to the program descriptions and examine characteristics of exemplary interventions. The targeted problems include: child abuse and neglect, school adjustment problems, social problem-solving problems, autism and developmental disabilities, conduct disorders and severe emotional problems, children affected by disasters and trauma, children whose parents are divorced, children of teenage parents, family dysfunction and parent-child relationships, oppositional defiant disorder, and attention deficit disorder. Settings for interventions in the model programs include: schools, mental health centers and family guidance clinics, hospitals and pediatric practices, group homes and sheltered workshops, community centers, family homes, summer camps, and coordinated systems of care. The 18 programs described demonstrate the rationale for their interventions, their targeted populations, the type of staff and personnel, various programmatic interventions, aspects of the problems, implementation of interventions, and how the programs have been evaluated. The needs for improved mental health services remain strong. The supporting organizations and the members of the Task Force intend for the product of this project to be helpful in providing models for meeting those needs.

Annual Review of Clinical Psychology

Part of the authoritative four-volume reference that spans the entire field of child development and has set the standard against which all other scholarly references are compared. Updated and revised to reflect the new developments in the field, the Handbook of Child Psychology, Sixth Edition contains new chapters on such topics as spirituality, social understanding, and non-verbal communication. Volume 4: Child Psychology in Practice, edited by K. Ann Renninger, Swarthmore College, and Irving E. Sigel, Educational Testing Service, covers child psychology in clinical and educational practice. New topics addressed include educational assessment and evaluation, character education, learning disabilities, mental retardation, media and popular culture, children's health and parenting.

Multisystemic Therapy

"Practical and authoritative, this volume belongs on the desks of clinical psychologists, psychiatrists, social workers, and other clinicians working with children and families; agency administrators and policy makers; clinical researchers; and students training in the use of evidence-based mental health treatments. It may serve as a text in graduate-level courses and MST training seminars."--BOOK JACKET.

Psychological Interventions in Times of Crisis

This volume provides an up-to-date review of a topic of current and continuing importance - delinquent behaviour. Correlates are examined within a multidimensional framework that considers both the characteristics of adolescents and the key systems - family, peer, school and neighbourhood - in which adolescents are embedded. There are sections devoted to female, sexual and violent offenders, and empirically-based causal models of delinquent behaviour. The authors review the latest treatment approaches which address adolescent correlates and systemic correlates of delinquency, and they suggest directions for future research.

In a succinct Q&A format, the authors provide school counselors and educational leaders with: 101 solutions to common counseling issues across the K-12 spectrum on topics ranging from data-driven counseling to bullying, collaboration, and equity Stories of school counselors and educational leaders who have successfully implemented these solutions Numerous print and digital resources for further exploration

Family Therapy

Advance students, trainees and practitioners of Family Therapy will welcome this comprehensive, critical and integrative textbook which offers a systematic account of the practice of family therapy and also the conceptual approaches which enlighten and guide best practice. Family Therapy: Concepts, Process and Practice offers a critical evaluation of the major schools of family therapy, an integrative model for the practice of marital and family therapy, and examples of how this model may be used with a range of common child-focused and adult-focused problems. Alan Carr examines findings from research on the effectiveness of family therapy and shows the implications for these for evidence-based practice. The author's integrative approach to therapy focuses on both problems and exceptions to problems. It also addresses family behaviour patterns and beliefs systems and narratives, as well as the broader contextual factors, which make family problems, and their treatment, so complex. The book shows how this approach to family therapy may be used to address problems of childhood and adolescence such as child abuse, conduct problems and drug abuse, as well as problems of adulthood such as marital distress, anxiety, depression, alcohol abuse and schizophrenia. Resources and aids for the student and professional are included throughout, including chapter plans and conclusions with a summary of key points, case examples, and suggestions for further reading, and the theoretical chapters include a glossary of new terms. A section on information resources in family therapy is also included. This gives details on training tapes, assessment instruments, ethical guidelines and major journals in the field. "In its comprehensiveness this volume will prove to be a valuable source book for beginners and experienced therapists alike. This book's discussion of different schools of therapy is clear, concise and non-dogmatic. Its elaboration of a model of therapeutic skills development distils the best from a number of approaches and is based on sound common sense. Its discussion of family therapy with particular clinical groups is exceptionally helpful and appropriately pragmatic. The book is very good. It will serve its readers well. Dr Eddy Street, Editor of the Journal of Family Therapy and University of Wales, UK. "Alan Carr's Family Therapy: Concepts, Process, and Practice, is the best and most comprehensive general family therapy text on the market. Its combination of sound academics and clinical material makes it useful as a graduate text, a professional review (for example for licensure), and as a clinical guide. The book provides a sound overall presentation of the history of the field and the theories of family therapy, offers an extremely useful research-based model of family therapy, and applies family therapy to the treatment of most of the common behaviour disorders. This is truly the general family therapy book of the new century". Terry S. Trepper, Ph.D., Editor, Journal of Family Psychotherapy and Professor of Psychology and Marriage & Family Therapy, Purdue University, USA. From the Foreword "There are "two for the price of one" in this volume. The "first book" in this book is a highly readable introductory accounting of the major approaches to Family Therapy. the second "book-within-a-book" is Alan Carr's singular contribution, The Formulation Model of family therapy treatment planning and intervention. This is an eminently teachable and learnable clinical model. I like to think of Carr's book as news you can use, rather than views that confuse. It will be accessible on "the other side" of the Atlantic" Alan S Gurman, Ph.D., Professor of Psychiatry and Director of Marital and Family Therapy Training, University of Wisconsin Medical School, USA.

Model Programs in Child and Family Mental Health

The British National Bibliography

A comprehensive, theory-based approach to working with young clients in both school and clinical settings *Counseling and Psychotherapy with Children and Adolescents, Fifth Edition* provides mental health professionals and students with state-of-the-art theory and practical guidance for major contemporary psychotherapeutic schools of thought. Children and adolescents are not just small adults; they have their own needs, requirements, and desires, on top of the issues presented by still-developing brains and limited life perspective. Providing care for young clients requires a deep understanding of the interventions and approaches that work alongside growing brains, and the practical skill to change course to align with evolving personalities. The thoroughly revised fifth edition is a comprehensive reference, complete with expert insight. Organized around theory, this book covers both clinical and school settings in the fields of psychology, counseling, and social work. Coverage of the latest thinking and practice includes Cognitive Behavioral, Rational-Emotive, Reality Therapy, Solution Focused, Family Systems, and Play Therapy, providing a complete resource for any mental health expert who works with young people. Understand the major approaches to counseling and psychotherapeutic interventions Discover the ethical and legal implications of working with children and adolescents Learn how to employ culturally responsive counseling with younger clients Examine interventions for children and adolescents with disabilities and health care needs This updated edition includes a stronger emphasis on the clinical application of theory to specific disorders of childhood and adolescence, and new coverage of the legal and ethical issues related to social media. Chapters include a case studies and online resources that make it ideal for classroom use, and new chapters on Solution-Focused Therapy and Play Therapy enhance usefulness to practicing therapists. Expert guidance covers techniques for working with individuals, groups, and parents, and explores the efficacy of the theories under discussion.

Advances in School Mental Health Promotion

A comprehensive and practical approach to the world of marriage, couples, and family counseling Esteemed academics David Capuzzi and Mark D. Stauffer present the theory, research, and real-life practice of today's counselors and therapists in family therapy settings. Aligned with the Council for Accreditation of Counseling and Related Educational Programs (CACREP) and Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE), this useful text covers foundational teaching important to readers, but also critical modern topics not included in other texts, such as sexuality, trauma, divorce, domestic violence, and addictions, filial play therapy, and using community genograms to position culture and context in family therapy. With a unique focus on practical applications, the book discusses the major family therapy theories, and provides graduate students and post-graduate learners in counseling, mental health, and behavioral health fields the skills and techniques they need to help couples and families as part of their work in a variety of helping environments. Each chapter

contains case studies and anecdotes that help readers think critically about the issues they are likely to deal with as clinicians. Written by recognized and respected contributors, this book helps readers see the connection between what they know and what happens in couples and family counseling sessions. Readers will: Learn the knowledge and skills essential to family therapy Understand the history, concepts, and techniques associated with major theories Examine the key issues specific to couples work, with relevant intervention Explore solutions to the complexities generated by special issues Discusses the modern realities of family, diversity and culture, and systemic contexts Family and couples counseling presents a complex interplay of various factors inherent to each individual, the dynamic interplay between each person's issues, and the outside influences that shape behavior. Foundations of Couples, Marriage, and Family Counseling helps readers sort out the complexity and guide clients toward lasting resolution.

Technical Report Series

The Handbook of Research on Emotional and Behavioral Disorders explores the factors necessary for successful implementation of interventions that foster productive relationships and ecologies to establish, reinforce, and sustain adaptive patterns of emotional and behavioral functioning across childhood and into adulthood. Although there has been a concerted focus on developing evidence-based programs and practices to support the needs of children and youth with emotional and behavioral disorders, there has been less emphasis on the developmental, social, and environmental factors that impact the implementation and effectiveness of these approaches. Chapters from leading experts tackle this complexity by drawing on a range of disciplines and perspectives including special education; mental health services; school, clinical, and community psychology; social work; developmental psychology and psychopathology; and prevention science. An essential resource for scholars and students interested in emotional and behavioral disorders, this volume crafts an essential framework to promote developmentally meaningful strategies for children and youth with even the most adverse experiences and intensive support needs.

Positive Psychology

Crime prevention policy and practice is, on the whole, far from objective. Instead of being based on scientific evidence, the crime policy agenda is seemingly driven by political ideology, anecdotal evidence and programme trends. Evidence-Based Crime Prevention seeks to change this by comprehensively and rigorously assessing the existing scientific knowledge on the effectiveness of crime prevention programmes internationally. Reviewing more than 600 scientific evaluations of programmes intended to prevent crime in settings such as families, schools, labour markets and communities, this book grades programmes on their scientific validity using the 'scientific methods scale'. This collection, which brings together contributions from leading researchers in the field of crime prevention, will provide policy-makers, researchers and community leaders with an understandable source of information about what works, what does not work and what is promising in preventing crime.
