Shame, Blame, and Culpability

This volume reports on the growing body of knowledge on shame and guilt, integrating findings from the authors' original research program with other data emerging from social, clinical, personality, and developmental psychology. Evidence is presented to demonstrate that these universally experienced affective phenomena have significant implications for many aspects of human functioning, with particular relevance for interpersonal relationships. --From publisher's description.

Shame and the Anti-Feminist Backlash

Throughout the nineteenth century and twentieth century, various attempts were made to define and control problematic behaviour in public by legal and legislative means through the use of a somewhat nebulous concept of 'indecenty'. Remarkably however, public indecenty remains a much under-researched aspect of English legal, social and criminal justice history. Covering a period of just over a

century, from 1857 (the date of the passing of the first Obscene Publications Act) to 1960 (the date of the famous trial of Penguin Books over their publication of *Lady Chatterley's Lover* following the introduction of a new Obscene Publications Act in the previous year), *Public Indecency in England* investigates the social and cultural obsession with various forms of indecency and how public perceptions of different types of indecent behaviour led to legal definitions of such behaviour in both common law and statute. This truly interdisciplinary book utilises socio-legal, historical and criminological research to discuss the practical response of both the police and the judiciary to those caught engaging in public indecency, as well as to highlight the increasing problems faced by moralists during a period of unprecedented technological developments in the fields of visual and aural mass entertainment. It is written in a lively and approachable style and, as such, is of interest to academics and students engaged in the study of deviance, law, criminology, sociology, criminal justice, socio-legal studies, and history. It will also be of interest to the general reader.

This ground-breaking collection of research-based chapters addresses the themes of shame, blame and culpability in their historical perspective in the broad area of crime, violence and the modern state, drawing on less familiar territories such as Russia and Greece, not just on material from familiar locations in western Europe. Ranging from the early modern to the late twentieth century, the collection has implications for how we understand punishments imposed by states or the community today. Shame, blame and culpability is divided into three sections, with a crucial case study part complementing two theoretical parts on shame, and on blame and culpability; exploring the continuance of shaming strategies and examining their interaction with and challenge to 'modern' state-sponsored blaming mechanisms, including allocations of culpability. The collection includes chapters on the deviant body, capital punishment and, of particular interest, Russian case studies, which demonstrate the extent to which the Russian, like the Greek, experience need to be seen as part of a wider European whole when examining ideas and themes. The volume challenges ideas that shame strategies

were largely eradicated in post-Enlightenment western states and societies; showing their survival into the twentieth century as a challenge to state dominance over identification of what constituted 'crime' and also over punishment practices. Shame, blame and culpability will be a key text for students and academics in the fields of criminology and crime, gender or European history.

Focusing on women's relationships, decisions and agency, this is the first study of women's experiences in a nineteenth-century Irish prison for serious offenders. Showcasing the various crimes for which women were incarcerated in the post-Famine period, from repeated theft to murder, Elaine Farrell examines inmate files in close detail in order to understand women's lives before, during and after imprisonment. By privileging case studies and individual narratives, this innovative study reveals imprisoned women's relationships with each other, with the staff employed to manage and control them, and with their relatives, spouses, children and friends who remained on the outside. In doing so, Farrell illuminates the

hardships many women experienced, their poverty and survival strategies, as well as their responsibilities, obligations, and decisions. Incorporating women's own voices, gleaned from letters and prison files, this intimate insight into individual women's lives in an Irish prison sheds new light on collective female experiences across urban and rural post-Famine Ireland.

feminist campaign for the vote in early twentieth-century Britain, Ireland, and Australia used shame as a political tool. It demonstrates just how proficient women were in employing a diverse vocabulary of emotions – drawing on concepts like embarrassment, humiliation, honour, courage, and chivalry – in the attempt to achieve their political goals. It looks at how far nationalist contexts informed each gendered emotional community at a time when British imperial networks were under extreme duress. The book presents a unique history of gender and shame which demonstrates just how versatile and ever-present this social emotion was in the feminist politics of the British Empire in the early decades of the twentieth century. It employs a fascinating new thematic lens to histories of anti-feminist/feminist entanglements by tracing national and transnational uses of emotions by women to police their own political communities. It also challenges the common notion that shame had little place in a modernizing world by revealing how far groups of patriotic womanhood, globally, deployed shame to combat the effects of feminist activism.

The classic work that refutes the lies we tell ourselves about race, poverty and the poor. Here are three myths about poverty in America: – Minority children perform poorly in school because they are “culturally deprived.” – African-Americans are handicapped by a family structure that is typically unstable and matriarchal. – Poor

people suffer from bad health because of ignorance and lack of interest in proper health care. Blaming the Victim was the first book to identify these truisms as part of the system of denial that even the best-intentioned Americans have constructed around the unpalatable realities of race and class. Originally published in 1970, William Ryan's groundbreaking and exhaustively researched work challenges both liberal and conservative assumptions, serving up a devastating critique of the mindset that causes us to blame the poor for their poverty and the powerless for their powerlessness. More than twenty years later, it is even more meaningful for its diagnosis of the psychic underpinnings of racial and social injustice.

Crime in England, 1815-1880 provides a unique insight into views on crime and criminality and the operation of the criminal justice system in England from the early to the late nineteenth century. This book examines the perceived problem and causes of crime, views about offenders and the consequences of these views for the treatment of offenders in the criminal justice system. The book explores the perceived causes of criminality, as well as concerns about particular groups of offenders, such as the 'criminal classes' and the 'habitual offender', the female offender and the juvenile criminal. It also considers the development of policing, the systems of capital punishment and the transportation of offenders overseas, as well as the evolution of both local and convict prison systems. The discussion primarily investigates those who were drawn into the criminal justice system and the attitudes towards and mechanisms to address crime and offenders. The book draws together original research by the author to locate these broader developments and provides detailed case studies illuminating the lives of those

Blaming the Victim

A gripping explanation of the biases that lead to the blaming of pregnant women and mothers. Are mothers truly a danger to their children's health? In 2004, a mentally disabled young woman in Utah was charged by prosecutors with murder after she declined to have a Caesarian section and subsequently delivered a stillborn child. In 2010, a pregnant woman who attempted suicide when the baby's father abandoned her was charged with murder and attempted feticide after the daughter she delivered prematurely died. These are just two of the many cases that portray mothers as the major source of health risk for their children. The American legal system is deeply shaped by unconscious risk perception that distorts core legal principles to punish mothers who "fail to protect" their children. In *Blaming Mothers*, Professor Fentiman explores how mothers became legal targets. She explains the psychological processes we use to confront tragic events and the unconscious race, class, and gender biases that affect our perceptions and influence the decisions of prosecutors, judges, and jurors. Fentiman examines legal actions taken against pregnant women in the name of "fetal protection" including court ordered C-sections and maintaining brain-dead pregnant women on life support to gestate a fetus, as well as charges brought against mothers who fail to protect their children from an abusive male partner. She considers the claims of physicians and policymakers that refusing to breastfeed is risky to children's health. And she explores the legal treatment of lead-poisoned children, in which

landlords and lead paint manufacturers are not held responsible for exposing children to high levels of lead, while mothers are blamed for their children's injuries. Blaming Mothers is a powerful call to reexamine who - and what - we consider risky to children's health. Fentiman offers an important framework for evaluating childhood risk that, rather than scapegoating mothers, provides concrete solutions that promote the health of all of America's children. This project is an attempt to challenge the canonical gender concept while trying to specify what gender was in the medieval and early modern world. Despite the emphasis on individual, identity and difference that past research claims, much of this history still focuses on hierarchical or dichotomous paring of masculinity and femininity (or male and female). The emphasis on differences has been largely based on the research of such topics as premarital sex, religious deviance, rape and violence; these are topics that were, in the early modern society, criminal or at least easily marginalizing. The central focus of the book is to test, verify and challenge the methodology and use the concept(s) of gender specifically applicable to the period of great change and transition. The volume contains two theoretical sections supplemented by case-studies of gender through specific practices such as mysticism, witchcraft, crime, and legal behaviour. The first section, "Concepts", analyzes certain useful notions, such as patriarchy and morality. The second section, "Identities", seeks to deepen this analysis into the studies of female identities in various situations, cultures and dimensions and to show the fluidity and flexibility of what is called femininity nowadays. The third part, "Practises", seeks to rethink the bigger narratives through the case-studies coming from Northern Europe to see how conventional ideas of gender did not work in this particular region. The case studies also challenge the established narratives in such well-research historiographies as witchcraft and sexual offences and at the same time suggest new insights for the developing fields of study, such as history of homicide.

of the examination procedure, it offers specific recommendations and step-by-step guidelines to everything from office decor, requisite equipment, test selection, rating categories, and techniques for minimizing stress to administering tests, writing reports, and making recommendations. Closely following Dr. Blau's famous Basic Psychological Examination package, the book guides readers in their assessment of environmental pressure, behavioral responses, intellectual factors, neuropsychological status, response capabilities, academic achievement, and personality. 1991 (0-471-63559-6) 279 pp.

THE PSYCHOLOGIST AS EXPERT WITNESS —Theodore H. Blau This very practical guide arms mental health professionals with everything they need to serve comfortably and effectively as expert witnesses. With the help of numerous real-life examples, excerpts from transcripts, sample forms, checklists, and legal documents, it shows you how to: prepare for your day in court; avoid being manipulated by attorneys; write up depositions and psychological and technical reports; and much more. And, as the use of mental health professionals as expert witnesses continues to extend beyond traditional judicial applications, the author addresses a wide range of untraditional situations and types of cases in which readers may be called upon to serve, including cases of liability and personal injury, eyewitness identification research, trademark and patent litigation, and others. 1984 (0-471-87129-X) 424 pp.

PSYCHIATRY AND CRIMINAL CULPABILITY How do we distinguish between sin and sickness? Few cases in recent memory so well typify the current confusion over this question as that of Jeffrey Dahmer. The confessed killer of fifteen young men,

Dahmer had sex with and cannibalized his victims' bodies. Yet, because he was not found to be mentally ill—the threshold requirement in tests of legal insanity—he was convicted and sentenced to 936 years imprisonment. How is it that such a severely disturbed person as Dahmer is adjudged sane and therefore culpable, while "Twinkiedefense" killer, Dan White and would-be presidential assassin John Hinckley, Jr., are deemed not guilty by reason of insanity? What are the origins of tests for criminal responsibility, and how is mental illness defined under them? Can causal links be shown to exist between specific crimes and disorders? Psychiatry and Criminal Culpability explores, in-depth, these questions and many others at the heart of one of the most controversial issues in our criminal justice system today. Throughout, Dr. Ralph Slovenko, an acknowledged expert whose professional experience straddles both the worlds of psychiatry and the law, brings a wealth of scholarship and direct experience to bear on the subject. Citing numerous landmark cases and historical formulations of criminal responsibility dating back to biblical times, he traces the evolution of current legal and psychiatric notions of culpability and the relationship between culpability and insanity. Writing for both a mental health and legal audience, Dr. Slovenko clearly and eloquently addresses a wide range of important topical issues. He explains the distinctions between the defenses of not guilty by reason of insanity, guilty but mentally ill, and diminished capacity. He identifies the types of mental illness that currently qualify under the test of criminal responsibility, including disorders that psychiatrists do not regard as psychotic, but which, nevertheless, many experts

assert negate responsibility. He explores the role of the mental health professional as an expert character witness in cases where it is uncertain whether the accused committed the crime in question. And much more. Fascinating, thought-provoking, and enlightening, *Psychiatry and Criminal Culpability* helps guide mental health and legal professionals through the moral and technical complexities of one of the knottiest issues of our day.
