Building Literacy in Social Studies

In today's schools, students and teachers feel unprecedented—even alarming—levels of stress. How can we create calmer classrooms in which students concentrate better and feel more positive about themselves and others? Author Thomas Armstrong offers a compelling answer in the form of mindfulness, a secular practice he defines as the intentional focus of one's attention on the present moment in a nonjudgmental way. In *Mindfulness in the Classroom*, Armstrong - Explains how mindfulness affects the structure and function of the brain. - Provides an overview of mindfulness as both a personal practice and a classroom methodology that aligns with such educational models as Social and Emotional Learning (SEL), Positive Behavioral Intervention and Supports (PBIS), and Universal Design for Learning (UDL). - Shares and explains the extensive research that shows the positive effects of mindfulness practices in the classroom. - Describes how to adapt mindfulness for different grade levels, integrate it into regular school subjects, and implement it schoolwide. - Offers guidelines for teaching mindfulness responsibly, without religious overtones. Dozens of observations from teachers, students, researchers, and practitioners provide striking evidence of the power of mindfulness and offer hope to anyone who wants to make classrooms more productive places of learning.

Nystce Social Studies (005) Test Secrets Study Guide

Preparing students to be active, informed, literate citizens is one of the primary functions of public schools. But how can students become engaged citizens if they can't read, let alone understand, their social studies texts? What can educators--and social studies teachers in particular--do to help students develop the knowledge, skills, and motivation to become engaged in civic life? *Building Literacy in Social Studies* addresses this question by presenting both the underlying concepts and the research-based techniques that teachers can use to engage students and build the skills they need to become successful readers, critical thinkers, and active citizens. The authors provide targeted strategies--including teaching models, graphic organizers, and step-by-step instructions--for activities such as * Building vocabulary, * Developing textbook

literacy skills, * Interpreting primary and secondary sources, * Applying critical thinking skills to newspapers and magazines, and * Evaluating Internet sources. Readers will also learn how to organize classrooms into models of democracy by creating learning communities that support literacy instruction, distribute authority, encourage cooperation, and increase accountability among students. Realistic scenarios depict a typical social studies teacher's experience before and after implementing the strategies in the classroom, showing their potential to make a significant difference in how students respond to instruction. By making literacy strategies a vital part of content-area instruction, teachers not only help students better understand their schoolwork but also open students' eyes to the power that informed and engaged people have to change the world.

In this 2nd edition of Focus: Elevating the Essentials to Radically Improve Student Learning, Mike Schmoker extends and updates the case that our schools could be on the cusp of swift, unparalleled improvements. But we are stymied by a systemwide failure to simplify and prioritize; we have yet to focus our limited time and energy on the most essential, widely acknowledged, evidence-based practices that could have more impact than all other initiatives combined. They are: simple, coherent curricula; straightforward, traditional literacy practices; and lessons built around just a few hugely effective elements of good teaching. As Schmoker demonstrates, the case for these practices—and the need for them—has grown prodigiously. In every chapter, you'll find late-breaking discoveries and practical

advice on how to simplify the implementation of new state standards in the subject areas; on the hidden pitfalls of our most popular, but unproven instructional fads and programs; and on simple, versatile strategies for building curriculum, planning lessons, and integrating literacy into every discipline. All of these strategies and findings are supported with exciting new evidence from actual schools. Directly aligned to the College, Career, and Civic Life (C3) Framework for Social Studies State Standard, this work highlights ways in which global learning can seamlessly be interwoven into the disciplines of history, economics, geography, civics, psychology, sociology, and anthropology. Recently adopted by the National Council for the Social Studies, the nation's largest professional organization of history and social studies teachers, the C3 Framework prioritizes inquiry-oriented learning experiences across the social studies disciplines in order to advance critical thinking, problem solving, and

participatory skills for engaged citizenship.
