Good, solid information is hard to get. How hard is it for you to come up with ideas to boost learning for children at home? Dont be taken in by expensive educational materials and toys that might not be up-to-date, age-appropriate, or geared toward your childs learning style. A childs most important first teacher is the parent. With our preschool, primary, and upper grades programs, we involve the parents in the individual educational needs of their child or children. Please take some time to review the materials and learn more about simple educational materials and tools that you can use with your children at home to boost their IQ and vocabulary. This program only requires a few minutes each day too, as often as you would like.

Young Lentil wants to learn to sing, but no matter how hard he tries he can't sing on key. He can't even pucker his lips to whistle! So Lentil learns to play the

harmonica instead and beautifully carries his tune through the winding streets of Alto, Ohio. Lentil masters his craft just as the beloved Colonel Carter returns to town and the Alto residents decide to plan a special celebration. But Old Sneep, the grouchiest man in town, doesn't want anyone celebrating Colonel Carter's homecoming. When Old Sneep stops the welcoming parade in its tracks, Lentil's music turns out to be just what Alto needs. Robert McCloskey, the Caldecott-winning author and illustrator of *Make Way for Ducklings*, brings readers this delightful two color picture book.

Why does a magnet pick up a paper clip but not a leaf or a penny? How can the whole world be a magnet? Follow the step-by-step instructions about how to make your own magnet, and then find out for yourself what makes a magnet! This nonfiction picture book is an excellent choice to share during homeschooling, in particular for children ages 4 to 6. It's a fun way to learn to read and as a supplement for activity books for children.

'Do children have anything to teach teachers? Jean Piaget believes that they do. As a beginning teacher, I focused on elaborate preparation of explanations and demonstrations on content. To piaget and his co-workers I owe a special debt for their ingenuous methods of exploring children's thinking and their theory of intellectual development. A study of Piaget's work, together with direct observations of children, has been instrumental in my transition to another stage of development as a teacher.' -Ed Labinowicz

Eliminate summer learning loss with this easy-to-use resource for parents. Keeping the skills your child learned in first grade sharp while on break from school will help his or her second grade year get off to a great start. This standards-based tool provides 9 weeks of engaging and relevant lessons that support content learning in social studies, writing, reading, science, math, and art. This resource makes summer learning fun by incorporating everyday family activities that are easy for parents to implement. This standards-based resource also addresses shifts in Common Core and other state standards, and the

parental-support tools will help parents prepare their children for academic success.

### **Cool Experiments on Static Electricity - Science Book of Experiments | Children's Electricity Books**

Provides an introduction of Thomas Edison, one of the world's greatest inventors. This book helps inspire kids to be inventors and scientists. Children try Edison's experiments themselves with activities such as making a puppet dance using static electricity, manufacturing a switch for electric current, constructing a telegraph machine, and more.

missing from the library and her dad is looking like the #1 suspect in Edgar Award-winning author Susan Vaught's latest middle grade mystery. I could see the big inside of my Sam-Sam. I had been training him for 252 days with mini tennis balls and pieces of bacon, just to prove to Dad and Mom and Aunt Gus and the whole world that a tiny, fluffy dog could do big things if he wanted to. I think my little dog always knew he could be a hero. I just wonder if he knew about me. When the cops show up at Jesse's house and arrest her dad, she figures out in a hurry that he's the #1 suspect in the missing library fund money case. With the help of her (first and only) friend Springer, she rounds up suspects (leading to a nasty confrontation with three notorious school bullies) and asks a lot of questions. But she can't shake the feeling that she isn't exactly cut out for being a crime-solving hero. Jesse has a neuro-processing disorder, which means that she's "on the spectrum or whatever." As she explains it, "I get stuck on lots of stuff, like words and phrases and numbers and smells and pictures and song lines and what time stuff is supposed to happen." But when a tornado strikes her small town, Jesse is given the opportunity to show what she's really made of—and help her dad. Told with the true-as-life voice Susan Vaught is known for, this mystery will have you rooting for Jesse and her trusty Pomeranian, Sam-Sam.

inward seven-year-old, to the expansive eight-year-old, and then into the nine-eleven-thirteen-fifteen-year age range that alternates inward and outward, moody and expansive, in the young person. All through these ages, they are learning, and this manual has additional ideas for each age and stage, plus materials for teachers and group leaders. Too much information (TMI) is thrown at these ages about what it means to be a “teenager” or “tweenager.” Some handle this information overload and transition period by withdrawing and becoming crabby. However, regardless of social and emotional issues, their learning abilities are still sharp and keen and welcome the more ideas in these manual activities that are sequenced by age level. These enablers only take a few minutes at a time and can boost vocabulary and knowledge categories for young people, especially with the “Around the World” section.
