The Anthropology of Religion, Magic, and Witchcraft -- Pearson eText

This comparative reader takes an anthropological approach to the study of religious beliefs, both strange and familiar. The engaging articles on all key issues related to the anthropology of religion grab the attention of students, while giving them an excellent foundation in contemporary ideas and approaches in the field. The multiple authors included in each chapter represent a range of interests, geographic foci, and ways of looking at each subject. Divided into ten chapters, this book begins with a broad view of anthropological ways of looking at religion, and moves on to some of the core topics within the subject, such as myth, ritual, and the various types of religious specialists.

The Anthropology of Magic

Religion has experienced growing importance in recent years, and interest in the anthropological study of religion has increased as well. This reference book offers a much-needed overview of the most significant topics and concerns in the field. Chapters by expert contributors examine such matters as snake handling, magic and ritual, shamanism, and the role of religion in particular cultures. Chapters contain extensive documentation, and a bibliography concludes the volume.

"Sets the stage for an ethnography of menstruation beliefs and will, I predict, be viewed as the opening work of a whole ethnographic tradition . . . will be widely cited."—Anna Meigs, Macalester College "Provides a concise and complete critique of the literature and thinking on menstrual practices and introduces new analyses and concepts with regard to previously unknown material."—Ann L. Wright, University of Arizona

Religion and Magic in Socialist and Post-Socialist Contexts

This book provides an indispensable survey of many of the key developments in the study of religion and magic over the past one hundred years. During this period the study of the sacred has changed dramatically. It has expanded beyond the traditional confines of theology and philosophy to become part of modern subjects such as anthropology, sociology and psychology. Theology, meanwhile, has been joined by newly founded subjects such as religious studies, comparative religions and the history of religions. Concentrating on these new disciplines, the book provides clear, comprehensive and concise summaries of a wide range of leading scholars' studies of religion and magic, setting their work within the context of the different theoretical approaches they have adopted. The book thus provides an accessible introduction to many of the principal theoretical developments of the past one hundred years, from the evolutionism of the nineteenth century to the structuralism of the twentieth century.

Anthropology and Religion

This accessible and illuminating book explores the classical opposition between magic, science and religion.

Anthropology of Religion: The Basics

Anthropology's long and complex relationship to magic has been strongly influenced by western science and notions of rationality. This book takes a refreshing new look at modern magic as practised by contemporary Pagans in Britain. It focuses on what Pagans see as the essence of magic - a communication with an otherworldly reality. Examining issues of identity, gender and morality, the author argues that the otherworld forms a central defining characteristic of magical practice. Integrating an experiential ethnographic approach with an analysis of magic, this book asks penetrating questions about the nature of otherworldly knowledge and argues that our scientific frameworks need re-envisioning. It is unique in providing an insider's view of how magic is practised in contemporary western culture.

The Anthropology of Magic

This concise and accessible textbook introduces students to the anthropological study of religion. Stein and Stein examine religious expression from a cross-cultural perspective and expose students to the varying complexity of world religions. The chapters incorporate key theoretical concepts and a rich range of ethnographic material. The fourth edition of *The Anthropology of Religion, Magic, and Witchcraft* offers:

- increased coverage of new religious movements, fundamentalism, and religion and conflict/violence;
- fresh case study material with examples drawn from around the globe;
- further resources via a comprehensive companion website.

This is an essential guide for students encountering anthropology of religion for the first time.

Magic Witchcraft and Religion: A Reader in the Anthropology of Religion takes an anthropological approach to the study of religious beliefs and practices, both strange and familiar. The engaging articles on all key issues related to the anthropology of religion grab the attention of students, while giving them an excellent foundation in contemporary ideas and approaches in the field. The multiple authors included in each chapter represent a range of interests, geographic foci, and ways of looking at each subject. Features of the ninth edition include new study questions and articles, as well as updated discussions on religion, illness, healing, and death.

Sacred Realms

This book contains three prolific essays by the world renown polish anthropologist Bronislaw Malinowski. First published in 1926, Magic, Science and Religion provides its readers with a seminal collection of texts exploring the concepts of magic, religion, science, rite and myth, detailing how they interlink to offer exciting and informative insights into the Trobrianders of New Guinea. A must-have for any students of anthropology and collectors of Malinowski's work, we are republishing this classic work with a new introductory biography of the author.

The Anthropology of Religion, Magic, and Witchcraft

Drawing from ethnographic examples found throughout the world, this revised and updated text, hailed as the "best general text on religion in anthropology available," offers an introduction to what anthropologists know or think about religion, how they have studied it, and how they interpret or explain it since the late 19th century.

Religion Explained

Many of our questions about religion, says renowned anthropologist Pascal Boyer, are no longer mysteries. We are beginning to know how to answer questions such as "Why do people have religion?" Using findings from anthropology, cognitive science, linguistics, and evolutionary biology, *Religion Explained* shows how this aspect of human consciousness is increasingly amenable to coherent, naturalistic explanation. This brilliant and controversial book gives readers the first scientific explanation for what religious feeling is really about, what it consists of, and where it comes from.

Religion and Magic in the Life of Traditional Peoples

Magic is arguably the least understood subject in anthropology today. Exotic and fascinating, it offers us a glimpse into another world but it also threatens to undermine the foundations of anthropology due to its supposed irrational and non-scientific nature. Magic has thus often been 'explained away' by social or psychological reduction. *The Anthropology of Magic* redresses the balance and brings magic, as an aspect of consciousness, into focus through the use of classic texts and cutting-edge research. Suitable for student and scholar alike, *The Anthropology of Magic* updates a classical anthropological debate concerning the nature of human experience. A key theme is that human beings everywhere have the potential for magical consciousness. Taking a new approach to some perennial topics in anthropology - such as shamanism, mythology, witchcraft and healing - the book raises crucial theoretical and methodological issues to provide the reader with an engaging and critical understanding of the dynamics of magic. A Reader in the Anthropology of Religion

China has many religions. But rituals of local temples are none of these. They celebrate many gods and their powers to respond. Gods are invited as welcome guests by appropriate rituals of welcome and communication. Other rituals pacify ghosts and harmful powers. These rituals are rich with their own poetry, a poetry of performance, not just of contemplation. Interpreting this poetry demands revision of theories of ritual and religion. The author has spent over four decades studying Chinese ritual and religion through observation in contemporary China and Taiwan, constantly revising and rethinking theories of religion, ritual and their role in different political regimes."

Moral Power

Religion and magic have played important roles within Eastern European societies where social reality and socio-political balance may differ greatly from those in the West. Although often thought of as being two distinct, even antagonistic forces, religion and magic find ways to work together. By taking on various examples in the multicultural settings of post-Soviet and post-socialist spaces, this collection brings together diverse historical and ethnographic analyses of orthodoxy and heterodoxy from the pre- and post-1989 periods, studies on the relationship of religious and state institutions to individuals practicing alternative forms of spirituality, and examples of borderlands as spaces of ambiguity. This volume is at the crossroads of anthropology, history, as well as cultural memory studies. Its archival and field research findings help understand how repurposing religious and magic practices worked into the transition that countries in Eastern Europe and beyond have experienced after the end of the Cold War.

Magic, Science and Religion and the Scope of Rationality

"Koen Stroeken's work is fascinating, thought-provoking, theoretically challenging and ethnographically penetrating. It is anthropology, yes, and very true anthropology for that matter, but it is also a deep and unsettling experience finding its voice." * Per Brandstrom, Uppsala University "The book is thoroughly engaging and a timely

The Nature of Magic

Anthropologist Susan Johnston turns a scholarly eye on one of humankind's primary interests throughout history: the spiritual belief system.

Magic Witchcraft and Religion: A Reader in the Anthropology of Religion

Ritual and Belief: Readings in the Anthropology of Religion is a collection of 41 readings in religion, magic, and witchcraft. The choice of readings is eclectic: no single anthropological approach or theoretical perspective dominates the text. Theoretical significance, scholarly eminence of the author, and inherent interest provide the principal criteria, and each reading complements its companion chapters, which are pedagogically coherent rather than ad hoc assemblages. Included among the theoretical perspectives are structural-functionalism, structuralism, Malinowskian functionalism, cultural materialism, and cultural evolutionism; also included are the synchronic and diachronic approaches. The book offers a mixture of classic readings and more recent contributions, and the 'world religions' are included along with examples from the religions of traditionally non-literate cultures. As diverse a range of religious traditions as possible has been embraced, from various ethnic groups, traditions, and places.

Magic, Witchcraft, and Religion: A Reader in the Anthropology of Religion

A Reader in the Anthropology of Religion is a collection of some of the most significant classic and contemporary writings on the anthropology of religion. It includes both material whose theme is 'religion' in a straightforward and obvious sense, as well as material that has expanded how we might look at religion - and the horizons of what we mean by 'religion' - linking it to broader questions of culture and politics.

Ritual and Belief

Anthropology of Religion: The Basics is an accessible and engaging introductory text organized around key issues that all anthropologists of religion face. This book uses a wide range of historical and ethnographic examples to address not only what is studied by anthropologists of religion, but how such studies are approached. It addresses questions such as: How do human agents interact with gods and spirits? What is the nature of doing religious ethnography? Can the immaterial be embodied in the body, language and material objects? What is the role of ritual, time, and place in religion? Why is charisma important for religious movements? How do global processes interact with religions? With international case studies from a range of religious traditions, suggestions for further reading, and inventive reflection boxes, Anthropology of Religion: The Basics is an essential read for students approaching the subject for the first time.

Blood Magic

This comparative reader takes an anthropological approach to the study of religious beliefs and practices, both strange and familiar. The engaging articles on all key issues related to the anthropology of religion grab the attention of students, while giving them an excellent foundation in contemporary ideas and approaches in the field. The multiple authors included in each chapter represent a range of interests, geographic foci, and ways of looking at each subject. Magic, Witchcraft, and Religion

Integrates structural and historical perspectives on the semiotics of religion and gives an account of the distinctive features of religious language and symbolism.

The Anthropology of Religion, Magic, and Witchcraft

This book examines how and why practitioners of nature religion - Western witches, druids, shamans - seek to relate spiritually with nature through 'magical consciousness'. 'Magic' and 'consciousness' are concepts that are often fraught with prejudice and ambiguity respectively. Greenwood develops a new theory of magical consciousness by arguing that magic ultimately has more to do with the workings of the human mind in terms of an expanded awareness than with socio-cultural explanations. She combines her own subjective insights gained from magical practice with practitioners' in-depth accounts and sustained academic theory on the process of magic. She also tracks magical consciousness in philosophy, myth,

folklore, story-telling, and the hi-tech discourse of postmodernity, and asks important questions concerning nature religion's environmental credentials, such as whether it is inherently ecological as many of its practitioners claim.

Introducing Anthropology of Religion

Randall Styers seeks to account for the vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that. He argues that it can best be explained in light of the European and Euro-American drive to establish and secure their own identity as normative.

Religion and Magic

Innovation-making is a classic theme in anthropology that reveals how people fine-tune their ontologies, live in the world and conceive of it as they do. This ethnographic study is an entrance into the world of Buryat Mongol divination, where a group of cursed shamans undertake the 'race against time' to produce innovative remedies that will improve their fallen fortunes at an unconventional pace. Drawing on parallels between social anthropology and chaos theory, the author gives an in-depth account of how Buryat shamans and their notion of fortune operate as 'strange attractors' who propagate the ongoing process of innovation-making. With its view into this long-term 'cursing war' between two shamanic factions in a rural Mongolian district, and the comparative findings on cursing in rural China, this book is a needed resource for anyone with an interest in the anthropology of religion, shamanism, witchcraft and genealogical change. Katherine Swancutt is a Research Fellow in Social Anthropology at the University of Oxford. She has carried out fieldwork on shamanic religion across Inner Asia, working among Buryats in northeast Mongolia and China since 1999, and among the Nuosu of Southwest China since 2007.

Magic, Witchcraft, and Religion

Taking the reader into the heart of one of the fastest-growing religious movements in North America, Sabina Magliocco reveals how the disciplines of anthropology and folklore were fundamental to the early development of Neo-Paganism and the revival of witchcraft. Magliocco examines the roots that this religious movement has in a Western spiritual tradition of mysticism disavowed by the Enlightenment. She explores, too, how modern Pagans and Witches are imaginatively

reclaiming discarded practices and beliefs to create religions more in keeping with their personal experience of the world as sacred and filled with meaning. Neo-Pagan religions focus on experience, rather than belief, and many contemporary practitioners have had mystical experiences. They seek a context that normalizes them and creates in them new spiritual dimensions that involve change in ordinary consciousness. Magliocco analyzes magical practices and rituals of Neo-Paganism as art forms that reanimate the cosmos and stimulate the imagination of its practitioners. She discusses rituals that are put together using materials from a variety of cultural and historical sources, and examines the cultural politics surrounding the movement—how the Neo-Pagan movement creates identity by contrasting itself against the dominant culture and how it can be understood in the context of early twenty-first-century identity politics. *Witching Culture* is the first ethnography of this religious movement to focus specifically on the role of anthropology and folklore in its formation, on experiences that are central to its practice, and on what it reveals about identity and belief in twenty-first-century North America.

The Anthropology of Religion, Charisma, and Ghosts

First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

Anthropology of Religion

This lively and readable survey introduces students to key areas of the field and shows how to apply an anthropological approach to the study of contemporary world religions. Written by an experienced teacher, it covers all of the traditional topics of anthropology of religion, including definitions and theories, beliefs, symbols and language, and ritual and myth, and combines analytic and conceptual discussion with up-to-date ethnography and theory. Eller includes copious examples from religions around the world – both familiar and unfamiliar – and two mini-case studies in each chapter. He also explores classic and contemporary anthropological contributions to important but often overlooked issues such as violence and fundamentalism, morality, secularization, religion in America, and new religious movements. *Introducing Anthropology of Religion* demonstrates that anthropology is both relevant and essential for understanding the world we inhabit today.
