The Institutes of English Grammar

Excerpt from The Institutes of English Grammar: Methodically Arranged With Copious Language Lessons; Also a Key to the Examples of False Syntax; Designed for the Use of Schools, Academies, and Private Students Tee school-book now pretty well-known as Brown's Institutes of English Grammar, was my first attempt at authorship in the character of a grammarian; and, satisfactory as it has been to the many thousands who have used it, it has nevertheless, like all other not incorrigible attempts in this line, been found susceptible of sundry important emendations. So that I must believe with Murray, that, Works of this nature admit of repeated improvements; and are, perhaps, never complete. It cannot, however, be said in my favour, as it has been in commendation of this author, that, He went on examining and correcting his grammar through all its forty editions, till he brought it to the utmost degree of perfection; but something has been done in this way, three or four of the early editions of the Institutes having been severally retouched and improved by the author's hand; and now, an undiminished demand for the work having continued to spread its reputation, I have at length the satisfaction to have endeavoured yet once, again to render it still more worthy of the public favour. The time which has elapsed since the author first published this work, has been mainly spent in labours and studies tending very directly to enlarge and mature his knowledge of English Grammar, especially, to better his acquaintance with the great variety of books and essays which have been written upon it. The principal result of these labours and studies has been given to the world in his large work entitled The Grammar of English Grammars. To conform the future editions of these Institutes more nearly to the text of this large Grammar, to supply some deficiencies which have been thought to lessen the comparative value of the former work, to divide the book more systematically into chapters and subdivisions, and to correct a few typographical errors which had crept in, were the objects contemplated in the revision which has now been effected.
