The Story of the Space Shuttle

You are 16, going on 17. Steve Jobs was all of sixteen when he met Stephen Wozniak. What resulted was Apple. When Sergey Brin and Larry Page met at Stanford, they were in their early twenties. They were soon to start Google.

Today's teenagers are our smartest generation yet. They are tomorrow's entrepreneurs, investors, managers, policy makers, watchdogs and of course, consumers. But do you know what the corporate and business world is all about? How do businesses touch everyone's lives? What really makes an entrepreneur tick? How does the engine of a company run? Who is a social entrepreneur? And why do we need the world of business—is business good or bad for us? If you are curious, come join Subroto Bagchi and a group of smart teenagers on their exciting voyage of discovery, and in the process, get yourself a teen MBA!

The Other Country

An astrologer predicts that an indolent and insolent youth is going to reach great heights, much to the surprise of his frustrated father, who thinks that the greatest height his son is going to reach is the tip of the palm tree in the neighbourhood to steal its fruit. The youth - Bandu - embarks on a sinuous journey in search of his fortune, and along with his friend Ronak travels to different states in India. Each stop is eventful and accompanied with kicks, knocks and knavery that shakes Bandu's scruples and Ronak's bones. Every city has its own charm to offer, and the two men indeed find charm, harm and the ensuing balm. One man's tragedy is another man's comedy. This book is about travails of two young men whose tragedy becomes onlookers' comedy. Does Bandu really succeed as the astrologer predicted? Does his lack of meaningful education become a hindrance in his

destiny for Raaj-yog, which in today's world translates to Mantri-yog? Join Bandu and Ronak in their enchanting journey, and note the disclaimer that any reference to police, politicians and purloiners is purely for pun.

HDFC Bank 2.0

Some say the great mystery of how one can live in two worlds at once died with Thomas Hunter many years ago. Still others that the gateway to that greater reality was and is only the stuff of dreams. They are all wrong. Rachele Matthews, who grew up in the small town of Eden, Utah, discovered just how wrong when she dreamed and awoke in another world. There she learned that she was the 49th Mystic, the prophesied one, tasked with finding five ancient seals before powerful enemies destroy her. If Rachele succeeds in her quest, peace will reign. If she fails, the world will forever be locked in darkness. In *The 49th Mystic*, Rachele found the first three of those five seals through great peril and mind-altering adventure. But two seals remain hidden and the fate of both worlds hangs in their balance. As Rachele Matthews sits deep in a dungeon, Vlad Smith is just getting started. Thomas Hunter's world is about to be turned inside out. The mystics say that there is no defense against the Fifth Seal--but finding it will cost Rachele everything. So begins the final volume of high stakes in one girl's quest to find an ancient path that will save humanity. The clock is ticking; the end rushes forward. Ready? Set? Dream.

MBA at 16

This is the story of Bandhan, the only bank that emerged in eastern India after Independence. Founded by the son of a sweet vendor, with a mere Rs 2 lakh, the sum total of his life savings. On 17 June, 2015, Chandra Shekhar Ghosh stepped out of the Reserve Bank of India building in Mumbai with the much-coveted banking licence, beating some of the country's top corporate houses. This moment compensated for all the frustrations that had come along the way. A year later, Bandhan Bank was launched with 6.7 million small borrowers. So, how did Ghosh build India's biggest MFI from scratch and then, along with his team, transform it into a universal bank? Bandhan: The Making of a Bank chronicles that journey. This is also Ghosh's personal story-of a boy growing up in small-town Agartala struggling with poverty, but relentless in his ambition to make it big. He battles competition, hostile moneylenders, a tough economic climate and the perpetual lack of resources. Nobody in India perhaps knows better than him the psyche of a small borrower and the alchemy of doing business with the poor, profitably. This is one of India's biggest entrepreneurial stories.

False Colors

TATAlog presents eight riveting and hitherto untold stories about the strategic and

operational challenges that TATA companies have faced over the past two decades and the forward thinking and determination that have raised the brand to new heights. From Tata Indica, the first completely Indian car; to the jewellery brand Tanishq; and Tata Finance, which survived several tribulations, TATAllog, written by a Tata insider, reveals the DNA of every TATA enterprise—a combination of being pioneering, purposive, principled and ‘not perfect’.

The Maruti Story : How A Public Sector Company Put India On Wheels

Joy. Anguish. Smile. Tears. Inspirations. Decadence. Love. Apathy. Peace. Chaos. Pendulum is of life.

The Merit Myth

Born in a small village in Punjab at the turn of the century, Rai Bahadur Mohan Singh Oberoi began his career in the industry at Shimla's Cecil Hotel on a monthly wage of Rs 50. But he was not destined to remain in that position for long. With a combination of clear-sighted thinking, frugality and sheer hard work, he managed to put together a plan and the finances necessary to acquire his first hotel, Clarkes. That was only the beginning. Decades later, the Oberoi Group has over thirty-one

luxury hotels and two river cruise ships in six countries, and is acknowledged as a standard to aspire for. In this well-researched and candid biography, written with the cooperation of the late M.S. Oberoi, Bachi Karkaria describes how a man from modest beginnings became the head of an internationally celebrated hotel chain. It also shows how a major business is built up, run and kept at the top.

The Creation of Wealth

Jacob Knight is unconventional and on fire for God. His supervisor knows just the right place for his next assignment. Pulled out of the hectic Southern California lifestyle, Jay and Lisa are dropped into a tranquil English village where churches had failed to succeed for the past hundred years. It seemed too good to be true; an idyllic setting, an ancient cottage and the chance to produce a vibrant congregation until their world became a living hell. When Jay finds blood dripping from the church rafters and they become a target of terror by a stranger, Jay and Lisa realize they've disturbed a stronghold of darkness. Their fight for survival forces them to plumb the unknown depths of faith so foreign and yet so powerful that their lives would never be the same again. Based on a true story."

The Cruel Stars

Rethinking the future of India through automation. From scavenging to lunar missions, from railway factories to healthcare and even tax planning, automation is growing faster and deeper in India than is visible. In a country where more than a million people get ready for jobs every month, this rise in automation can appear as an unwelcome change or a threat to their livelihood. But the reality is that automation is enhancing efficiency, accuracy and accountability of India's working professionals in ways that haven't been seen before. Automation is helping generate information in a data-poor country. It is making India's private sector more active and government's functioning more transparent and reliable. Through several case studies of private enterprises and government departments, India Automated chronicles the transformation that India is undergoing and how robotics and process automation are infusing proficiency in our work and personal lives. Automation is turning to be one of the most impactful results of the Fourth Industrial Revolution technologies in India. AI, drones, blockchain, cybersecurity, 3D printing, augmented and virtual reality include automated processes. These are also opening new categories of employment for job seekers. This book argues for deeper collaboration between industrial and government sectors to ensure that automation enhances India's steady growth while also mitigating its negative impact. With this forward-looking approach, Pranjal Sharma brings us face to face with the reality that it is imperative for India to align itself with this revolution.

Break Barriers

The Huautla in Mexico is the deepest cave in the Western Hemisphere, possibly the world. Shafts reach skyscraper-depths, caverns are stadium-sized, and sudden floods can drown divers in an instant. With a two-decade obsession, William Stone and his 44-member team entered the sinkhole at Sotano de San Augustin. The first camp settled 2,328 feet below ground in a cavern where headlamps couldn't even illuminate the walls and ceiling. The second camp teetered precariously above an underground canyon where two subterranean rivers collided. But beyond that lay the unknown territory -- a flooded corridor that had blocked all previous comers, claimed a diver's life, and drove the rest of the team back. Except for William Stone and Barbara am Ende, who forged on for 18 more days, with no hope of rescue, to set the record for the deepest cave dive in the Western Hemisphere.

Bhujia Barons

Leading innovators in progressive addiction treatment outline a science-based program for overcoming addiction-related problems, demonstrating how to effectively use positive reinforcement and motivational and behavioral strategies. (Self-Help)

Tulsiprasad Bandhopadhyay the Next Mla!

India: it's a nation of geeks, swots and nerds. Almost one in five of all medical and dental staff in the UK is of Indian origin, and one in six employed scientists with science or engineering doctorates in the US is Asian. By the turn of the millennium, there were even claims that a third of all engineers in Silicon Valley were of Indian origin, with Indians running 750 of its tech companies. At the dawn of this scientific revolution, *Geek Nation* is a journey to meet the inventors, engineers and young scientists helping to give birth to the world's next scientific superpower ? a nation built not on conquest, oil or minerals, but on the scientific ingenuity of its people. Angela Saini explains how ancient science is giving way to new, and how the technology of the wealthy are passing on to the poor. Delving inside the psyche of India's science-hungry citizens, she explores the reason why the government of the most religious country on earth has put its faith in science and technology. Through witty first-hand reportage and penetrative analysis, *Geek Nation* explains what this means for the rest of the world, and how a spiritual nation squares its soul with hard rationality. Full of curious, colourful characters and gripping stories, it describes India through its people ? a nation of geeks. curious, colourful characters and gripping stories, it describes India through its people ? a nation of geeks.

Pendulum

When Jamsetji Tat started a trading firm in 1868, few could have guessed that he

was also starting an important chapter in the making of modern India. Jamsetji saw that the three keys to India's industrial development were steel, hydroelectric power, and technical education and research. A century and a half later, the Tatas can claim with justice to have lined up to the vision of their founder. This edition includes the story of how the Tatas, with Ratan Tata at the helm, have had to grapple with change in the post-1992 era of economic reforms, when the opening up of India to the world came as both a challenge and a blessing. In a frank epilogue, Ratan Tata talks about the difficulties he faced in implementing change, including resistance from his colleagues. This new edition also has a postscript on the Nano, which has given the most global prominence to the Tata brand. The Creation of Wealth is R.M. Lala's bestselling account of how the Tatas have been at the forefront in the making of the Indian nation-not just by their phenomenal achievements as industrialists and entrepreneurs but also by their significant contributions in areas like factory reforms, labour and social welfare, medical research, higher education, culture and arts, and rural development.

The Hundred Dresses

A story that proves that Indians when empowered can change the course of history. The targets were stupendous and almost unachievable. Slightly over two years to find a suitable partner, finalize all legal documentation, build a factory, create a sales and service network and develop and launch a people's car that would sell

100,000 a year, in a sector where Indian expertise was limited.

The Tata Group

A history of how India became a major player in the global technology industry, mapping technological, economic, and political transformations. The rise of the Indian information technology industry is a remarkable economic success story. Software and services exports from India amounted to less than \$100 million in 1990, and today come close to \$100 billion. But, as Dinesh Sharma explains in *The Outsourcer*, Indian IT's success has a long prehistory; it did not begin with software support, or with American firms' eager recruitment of cheap and plentiful programming labor, or with India's economic liberalization of the 1990s. The foundations of India's IT revolution were laid long ago, even before the country's independence from British rule in 1947, as leading Indian scientists established research institutes that became centers for the development of computer science and technology. The “miracle” of Indian IT is actually a story about the long work of converting skills and knowledge into capital and wealth. With *The Outsourcer*, Sharma offers the first comprehensive history of the forces that drove India's IT success. Sharma describes India's early development of computer technology, part of the country's efforts to achieve national self-sufficiency, and shows that excessive state control stifled IT industry growth before economic policy changed in 1991. He traces the rise and fall (and return) of IBM in India and the emergence

of pioneering indigenous hardware and software firms. He describes the satellite communication links and state-sponsored, tax-free technology parks that made software-related outsourcing by foreign firms viable, and the tsunami of outsourcing operations at the beginning of the new millennium. It is the convergence of many factors, from the tradition of technical education to the rise of entrepreneurship to advances in communication technology, that have made the spectacular growth of India's IT industry possible.

Beyond the Last Blue Mountain

With over 100 companies offering products and services across 150 countries, 700,000 employees contributing a revenue of US\$100-billion, the Tata Group is India's largest and most globalized business conglomerate. The Tata name is known for salt, software, cars, communications, housing and hospitality. How did they come so far? How did they groom leadership, delight customers and drive business excellence? How did they maintain a brand and corporate values that are considered gold standard? A deep-dive into the Tata universe brings forth hitherto lesser-known facts and insights. It also brings you face-to-face with business decisions and outcomes that are most intriguing: - How did Tata Motors turnaround Jaguar Land Rover when Ford failed to do so? - Why wasn't TCS listed during the IT-boom? - Why wasn't Tata Steel's Corus acquisition successful? This definitive book tells riveting tales and gives insider accounts of adventure and achievement,

conflict and compassion, dilemmas and decisions across twenty-five Tata companies. With over a decade of rigorous research, interviews with 100 senior Tata leaders, and pan-India site visits, this book decodes the Tata principles of business. It's an exceptional blend of a business biography and a management classic.

The California Field Atlas

Don't simply show your data—tell a story with it! *Storytelling with Data* teaches you the fundamentals of data visualization and how to communicate effectively with data. You'll discover the power of storytelling and the way to make data a pivotal point in your story. The lessons in this illuminative text are grounded in theory, but made accessible through numerous real-world examples—ready for immediate application to your next graph or presentation. Storytelling is not an inherent skill, especially when it comes to data visualization, and the tools at our disposal don't make it any easier. This book demonstrates how to go beyond conventional tools to reach the root of your data, and how to use your data to create an engaging, informative, compelling story. Specifically, you'll learn how to:

- Understand the importance of context and audience
- Determine the appropriate type of graph for your situation
- Recognize and eliminate the clutter clouding your information
- Direct your audience's attention to the most important parts of your data
- Think like a designer and utilize concepts of design in data visualization

Leverage the power of storytelling to help your message resonate with your audience Together, the lessons in this book will help you turn your data into high impact visual stories that stick with your audience. Rid your world of ineffective graphs, one exploding 3D pie chart at a time. There is a story in your data—Storytelling with Data will give you the skills and power to tell it!

Storytelling with Data

MORE WAR... A desperate attack on the Kilrathi homeworld had succeeded in destroying the entire planet, including the Emperor and his warlords. The surviving Kilrathi, on warships and on their colony worlds were hopelessly demoralized and had sued for peace. The catlike warrior race was no longer a threat to Earth and its colonies. Thirty-five years of war had finally come to an end, bringing peace in our time. They thought... The reality was more ominous. There were still plenty of independent Kilrathi warlords surviving, commanding a formidable array of warships and weaponry. Some wanted revenge on the apes who had destroyed the sacred homeworld, some wanted to set up their own new empires, and some were simply content to go pirate, raiding human colonies at will. But back on Earth, the war-weary people and their leaders turned a deaf ear to reports of Kilrathi belligerence, preferring to look forward to a peaceful and prosperous future. But it was only the calm before a new story... At the publisher's request, this title is sold without DRM (Digital Rights Management).

Beyond Addiction

At age seventeen, Gia Carangi was working the counter at her father's Philadelphia luncheonette, Hoagie City. Within a year, Gia was one of the top models of the late 1970's, gracing the covers of Cosmopolitan and Vogue, partying at New York's Studio 54 and the Mudd Club, and redefining the industry's standard of beauty. She was the darling of moguls and movie stars, royalty and rockers. Gia was also a girl in pain, desperate for her mother's approval—and a drug addict on a tragic slide toward oblivion, who started going directly from \$10,000-a-day fashion shoots to the heroin shooting galleries on New York's Lower East Side. Finally blackballed from modeling, Gia entered a vastly different world on the streets of New York and Atlantic City, and later in a rehab clinic. At twenty-six, she became one of the first women in America to die of AIDS, a hospital welfare case visited only by rehab friends and what remained of her family. Drawing on hundreds of interviews with Gia's family, lovers, friends, and colleagues, *Thing of Beauty* creates a poignant portrait of an unforgettable character—and a powerful narrative about beauty and sexuality, fame and objectification, mothers and daughters, love and death.

Ambani & Sons

An eye-opening and timely look at how colleges drive the very inequalities they are

meant to remedy, complete with a call—and a vision—for change. Colleges fiercely defend America's deeply stratified higher education system, arguing that the most exclusive schools reward the brightest kids who have worked hard to get there. But it doesn't actually work this way. As the recent college-admissions bribery scandal demonstrates, social inequalities and colleges' pursuit of wealth and prestige stack the deck in favor of the children of privilege. For education scholar and critic Anthony P. Carnevale, it's clear that colleges are not the places of aspiration and equal opportunity they claim to be. *The Merit Myth* calls out our elite colleges for what they are: institutions that pay lip service to social mobility and meritocracy, while offering little of either. Through policies that exacerbate inequality, including generously funding so-called merit-based aid for already-wealthy students rather than expanding opportunity for those who need it most, U.S. universities—the presumed pathway to a better financial future—are woefully complicit in reproducing the racial and class privilege across generations that they pretend to abhor. This timely and incisive book argues for unrigging the game by dramatically reducing the weight of the SAT/ACT; measuring colleges by their outcomes, not their inputs; designing affirmative action plans that take into consideration both race and class; and making 14 the new 12—guaranteeing every American a public K-14 education. *The Merit Myth* shows the way for higher education to become the beacon of opportunity it was intended to be.

Beyond the Deep

My New York Marathon

Auggie Pullman, who was born with extreme facial abnormalities, goes from being home-schooled to entering fifth grade at a private middle school in Manhattan, which entails enduring the taunting and fear of his classmates.

Bandhan

Can technology and human beings coexist in a mutually beneficial way? In this ground-breaking book, N. Chandrasekaran, chairman of Tata Sons, the holding company and promoter of more than 100 Tata operating companies, presents a radical reimagining of the future of technology and reveals how it has the potential to solve the world's biggest challenges. He imagines 2030: India is among the world's top three economies, with all Indians using advanced technology to do their job or get their job done, and having access to quality jobs, better healthcare and skill-based education. And he says: this reality is possible. It is within reach. With Bridgital. To the coming disruption of artificial intelligence, he proposes an ingenious solution: to use it as an aid. Instead of taking jobs away, AI can generate them. Instead of replacing workers, AI will assist them. Chandrasekaran and his co-author, Roopa Purushothaman, chief economist of the Tata Group, show how the

Bridgital model can address our divide between rich and poor, skilled and unskilled, and can provide better service delivery in health, transport, law and education. It could create and impact millions of jobs around the world. One of the country's foremost industry leaders and pioneers, N. Chandrasekaran brings his expertise of over thirty years with the Tata Group to offer India as a blueprint for building a prosperous planet where digital and physical worlds work together and everyone is included in the growth story. It's a powerful vision for the future.

Foreword by Ratan N. Tata

The Outsourcer

How a family-run business from humble Bikaner transformed Haldiram into a global, much-loved brand In the early twentieth century, a young man, Ganga Bhishan Agarwal, aka Haldiram, gained a reputation for making the best bhujia in town. Fast-forward a century and the Haldiram's empire has revenue much greater than that of McDonald's and Domino's combined. In Bhujia Barons, Pavitra Kumar tells the riveting story of the Agarwal family in its entirety—a feat never managed before. It begins in dusty, benign Bikaner and traces the rise and rise of this home-grown label, now one of the most-recognized Indian brands in the world. The Haldiram's story is not an average business story—it's chock-full of family drama, with court cases, jealousy-fuelled regional expansion, a decades-old trademark battle, and a closely guarded family secret of the famous bhujia. Fast-paced and

captivating, this book provides a delicious look into family business dynamics and the Indian way of doing business.

The Old Man and The Sea

A quiet, aging teacher decides to run the NY Marathon. Along the way, he transforms into the man he always wanted to be.

The Tatas: How a Family Built a Business and a Nation

A collection of essays on some of the most vexing issues troubling Indian society today.--

Rise of the Mystics (Beyond the Circle Book #2)

An exhaustive and unforgettable portrait of India's greatest and most respected industrialist. Written with J.R.D. Tata's co-operation, this superb biography tells the

J.R.D. story from his birth to 1993, the year in which he died in Switzerland. The book is divided into four parts: Part I deals with the early years, from J.R.D.'s birth in France in 1904 to his accession to the chairmanship of Tatas, India's largest industrial conglomerate, at the age of thirty-four; Part II looks at his forty-six years in Indian aviation (the lasting passion of J.R.D.'s life) which led to the initiation of the Indian aviation industry and its development into one of India's success stories; Part III illuminates his half-century-long stint as the outstanding personality of Indian industry; and Part IV unearths hitherto unknown details about the private man and the public figure, including glimpses of his long friendships with such people as Jawaharlal Nehru, Mahatma Gandhi, Indira Gandhi and his association with celebrities in India and abroad.

"Jeh", a Life of J.R.D. Tata

In this epic sci-fi adventure for fans of *The Expanse* and *Battlestar Galactica*, five intrepid heroes must unite to save civilization after a long-dormant enemy awakens and strikes a devastating blow “This jarring, engrossing story of a species-wide fight for survival is recommended for all science fiction readers.”—*Publishers Weekly* (starred review) The galaxy was once terrorized by the Sturm, a group of “species purists” intent on destroying any human with genetic or cybernetic enhancements. Fashioning themselves as the one true “Human Republic,” the Sturm cut a bloody swath across the stars, killing billions before finally being

defeated and driven into the far reaches of Dark Space. Centuries of peace bred complacency. Everyone believed the Sturm had died out in the Dark. They were wrong. The enemy has returned and, with a brutal and decisive attack, knocks out almost all of humanity's defenses. Now on the brink of annihilation, humankind's only hope is a few brave souls who survived the initial attack: Commander Lucinda Hardy, thrust into uncertain command of the Royal Armadalen Navy's only surviving warship. Booker3, a soldier of Earth, sentenced to die for treason, whose time on death row is cut short when the Sturm attack his prison compound. Princess Alessia, a young royal of the Montanblanc Corporation, forced to flee when her home planet is overrun and her entire family executed. Sephina L'trel, the leader of an outlaw band who must call on all of her criminal skills to resist the invasion. And, finally, Admiral Frazer McLennan, the infamous hero of the first war with the Sturm hundreds of years ago, who hopes to rout his old foes once and for all—or die trying. These five flawed, reluctant heroes must band together to prevail against a relentless enemy and near-impossible odds. For if they fail, the future itself is doomed. "Frenetic action viewed in a black fun-house mirror."—Kirkus Reviews

Geek Nation

Ambani & Sons is the riveting story of one of the wealthiest families in the world. Dhirubhai Ambani was a rags-to-riches tycoon, whose company, Reliance, is now

one of India's major corporations. His sons, Anil and Mukesh, took over after his death in 2002 and their respective arms of the company are bigger than the parent ever was. However, a family feud of colossal proportions, that has had political reverberations, ensued. The Ambani tale contains a bigger story about modern India, not only as an economic powerhouse, but about the complicated links between government and big business.

The Mindful College Applicant

In a time when crossing guards are posted to prevent high schoolers from jumping in front of trains and parents shelling out \$100K for packaged college applications, education has become a mad race to grab the Ivy ring. Based on experience in admissions with the Ivy League and other highly competitive universities, emerging scientific evidence on the impact of emotional intelligence and mindfulness, and discussions with admissions officers, students, families, and high school counselors, this book is a guide on how to go through the existing, however brutish, college applications process with less stress and anxiety, and more joy and mindfulness. Equipped with the powerful tools of emotional intelligence and mindfulness, this work acknowledges the reality of what the process is, and challenges young people to reach for a more meaningful ideal for themselves. This book shares a look at the holistic admissions process and offers an alternative one to the current climate of untenable stress. This updated model aims to shift

mindsets from treating the admissions process as a ruthless competition with one externally-prescribed definition of success, to a step in a lifelong journey of curiosity and wonder. By building self-awareness, compassion, resilience, it's possible to navigate the process with greater authenticity, balance, and joy.

Tata Consultancy Services Story- and Beyond

'Powered by intellect, driven by values'—Infosys has been at the forefront of a new India Inc. since 1981. Leadership @ Infosys is the first book to codify Infosys's unique history, values and leadership practices that account for the firm's stellar rise from US\$ 200 seed capital to a multibillion dollar global enterprise. As an extension of Infosys's tradition of growing leaders through a programme called Leaders Teach, the book captures the origins of Infosys's leadership approach and leverages advanced psychometrics to identify current leaders who are exceptionally effective in Infosys's leadership model. These leaders share approaches that they believe account for their successes, and are candid about where they stumbled in the past to help junior leaders avoid their mistakes. Chapters based on Infosys's Leadership Journey Series include discussions of strategic leadership, change leadership, operational leadership, talent leadership, relationship and networking leadership, content leadership and entrepreneurial leadership by thought leaders in each area, and feature a state-of-the-science review of leadership research along with practical examples that leaders can use

to improve their performance and aptitude to take on increasing levels of responsibility.

Data Sovereignty

Eleanor Estes's *The Hundred Dresses* won a Newbery Honor in 1945 and has never been out of print since. At the heart of the story is Wanda Petronski, a Polish girl in a Connecticut school who is ridiculed by her classmates for wearing the same faded blue dress every day. Wanda claims she has one hundred dresses at home, but everyone knows she doesn't and bullies her mercilessly. The class feels terrible when Wanda is pulled out of the school, but by that time it's too late for apologies. Maddie, one of Wanda's classmates, ultimately decides that she is "never going to stand by and say nothing again."

Leadership @Infosys

In spite of the Challenger and Columbia disasters, the US Space Shuttle, which entered service in 1981, remains the most successful spacecraft ever developed. Conceived and designed as a reusable spacecraft to provide cheap access to low Earth orbit, and to supersede expendable launch vehicles, serving as the National Space Transportation System, it now coexists with a new range of commercial

rockets. David Harland's definitive work on the Space Shuttle explains the scientific contribution the Space Shuttle has made to the international space programme, detailing missions to Mir, Hubble and more recently its role in the assembly of the International Space Station. This substantial revision to existing chapters and extension of 'The Space Shuttle', following the loss of Columbia, will include a comprehensive account of the run-up to resumption of operations and conclude with a chapter beyond the Shuttle, looking at possible future concepts for a partly or totally reusable space vehicle which are being considered to replace the Shuttle.

Thing of Beauty

HOW A MARATHON INSPIRED A CALL TO PURPOSE On the outside, I was like every other 4-year-old. I had no idea what cancer was, or the real reason my parents had uprooted our family and moved to America. They did it for me, to find a cure before it was too late. So begins a personal journey decades in the making. Author Bishoy Tadros has faced seemingly insurmountable setbacks and impossible odds--from his childhood bout with acute lymphoblastic leukemia to crossing the finish line in Central Park competing in the TCS New York City Marathon. Break Barriers is a story about uncovering your potential, even if you are the underdog. It's about learning to apply the virtues of patience, perspective, and purpose to achieve whatever you dream in life. Bishoy's message is a reminder that your comeback will always be stronger than the original setback.

Wonder

"[A] gorgeously illustrated compendium."--Sunset This lavishly illustrated atlas takes readers off the beaten path and outside normal conceptions of California, revealing its myriad ecologies, topographies, and histories in exquisite maps and trail paintings. Based on decades of exploring the backcountry of the Golden State, artist-adventurer Obi Kaufmann blends science and art to illuminate the multifaceted array of living, connected systems like no book has done before. Kaufmann depicts layer after layer of the natural world, delighting in the grand scale and details alike. The effect is staggeringly beautiful: presented alongside California divvied into its fifty-eight counties, for example, we consider California made up of dancing tectonic plates, of watersheds, of wildflower gardens. Maps are enhanced by spirited illustrations of wildlife, keys that explain natural phenomena, and a clear-sighted but reverential text. Full of character and color, a bit larger than life, The California Field Atlas is the ultimate road trip companion and love letter to a place.

Tatalog

Throughout history, we have witnessed several struggles, battles, and wars as each imperial power has been in pursuit to assert their supremacy and gain

dominance over the wealth and resources of other countries. This 'Pursuit of Supremacy' is ingrained in every human, and the extent of individual aspiration to dominate others defines an individual's leadership style - while a dictator may be the person who with might of his resources and powers, forces his dominance, a benevolent person thrives on his ability of influencing thoughts or actions - on others. It has always been a human endeavour to assert their domination over others and to ensure an unequal state where the weaker community is set to serve the dominant power's interests. This book deep dives into concepts and our narrative of 'Data Colonisation'. Let's do some context setting around the various colonisations that have sprung up in human history in pursuit of supremacy. A textbook definition of Colonisation is a process by which the central system of power dominates the surrounding land and its components. The primary purpose of this colonisation was economic and to ensure that the conqueror had exclusive rights on the countries that were conquered and ruled. These subservient countries became the exclusive property of the conqueror - source of its cheap imports and unique export markets for high priced goods and services. The citizens of the conqueror were, thus, ensured an enhanced quality of life.

Dare to Dream

| WINNER OF THE GAJA CAPITAL BUSINESS BOOK PRIZE 2019 | The nineteenth century was an exciting time of initiative and enterprise around the world. If John

D. Rockefeller was creating unimagined wealth in the United States that he would put to the service of the nation, a Parsi family with humble roots was doing the same in India. In 1822, a boy was born in a priestly household in Gujarat's Navsari village. Young Nusserwanji knew early on that his destiny lay beyond his village and decided to head for Bombay to start a business - the first in his family to do so. He had neither higher education nor knowledge of business matters, just a burning passion to carve a path of his own. What Nusserwanji started as a cotton trading venture, his son Jamsetji, born in the same year as Rockefeller, grew into a multifaceted business, turning around sick textile mills, setting up an iron and steel company, envisioning a cutting-edge institute of higher learning, building a world-class hotel, and earning himself the title of the 'Bhishma Pitamah of Indian Industry'. Stewarded ably over the decades by Jamsetji's sons Dorabji and Ratanji, the charismatic and larger-than-life JRD, and thereafter the more business-like Ratan, the Tata group today is a 110-billion-dollar empire. The Tatas is their story. But it is more than just a history of the industrial house; it is an inspiring account of India in the making. It chronicles how each generation of the family invested not only in the expansion of its own business interests but also in nation building. Few know, for instance, that the first hydel power project in the world was conceived of and built by the Tatas. Nor that some radical labour concepts such as eight-hour work shifts were born in India, at the Tata mill in Nagpur. The Tata Cancer Research Centre, the Indian Institute of Science, the Tata Institute of Fundamental Research, as also the national carrier Air India - the family has a long, rich and

unrivalled legacy. The Tatas is a tribute to a line of visionaries who have a special place in the hearts and minds of ordinary Indians. Written by seasoned journalist Girish Kuber, this is also the only book that tells the complete Tata story spanning almost two hundred years.

India Automated: How the Fourth Industrial Revolution is Transforming India

FOREWORD BY NANDAN NILEKANI “Tamal combines his financial knowledge, eye for detail, and an excellent storytelling style to create a vivid portrait of India’s most valued bank and its path to the future.” NANDAN NILEKANI, Co-founder and Chairman of Infosys and Founding Chairman of UIDAI (Aadhaar) “Tamal has enthusiastically documented the epiphany that HDFC Bank’s leadership had in starting out on their digital journey. India is set for seismic changes to day-to-day banking over the next few years and banks who don’t commit to fully re-engineering their practice around becoming a technology company that delivers real-time, contextual banking experiences will wither on the vine. HDFC Bank has made a solid start on this journey, but the final chapter has not yet been written.” BRETT KING, Founder, Moven and bestselling author of Bank 4.0 The seeds of change were sown in September 2014, when HDFC Bank MD Aditya Puri went to Silicon Valley to meet the brightest tech minds in the world. By the time he got

back, he knew exactly what needed to be done. It was time for a revolution. Instead of waiting to be disrupted by fintech companies, HDFC Bank went all out to disrupt itself, recasting its role and scope on a scale that has never been attempted before. In one of the biggest transformations ever undertaken in any business, HDFC Bank wants to become a platform facilitating a financial experience. Tamal Bandyopadhyay chronicles HDFC Bank's own digital disruption exercise through the very people who drove it, narrating a story that's as compelling as unique in India's financial system. With his keen eye for detail, deep knowledge of banking and unparalleled storytelling ability, Bandyopadhyay recounts the journey of India's most valued lender from a life cycle bank to a lifestyle bank. TAMAL BANDYOPADHYAY is a bestselling author, award-winning columnist and a keen observer of the Indian banking sector for over two decades.

Bridgital Nation

Biography of Jehangir Ratanji Tata, b. 1904, industrialist from India.
