In the first edition of this landmark book, business loyalty guru Fred Reichheld revealed the question most critical to your company's future: "Would you recommend us to a friend?" By asking customers this question, you identify detractors, who sully your firm's reputation and readily switch to competitors, and promoters, who generate good profits and true, sustainable growth. You also generate a vital metric: your Net Promoter Score. Since the book was first published, Net Promoter has transformed companies, across industries and sectors, constituting a game-changing system and ethos that rivals Six Sigma in its power. In this thoroughly updated and expanded edition, Reichheld, with Bain colleague Rob Markey, explains how practitioners have built Net Promoter into a full-fledged management system that drives extraordinary financial and competitive results. With his trademark clarity, Reichheld:

- Defines the fundamental concept of Net Promoter, explaining its connection to your company's growth and sustained success
- Presents the closed-loop feedback process and demonstrates its power to energize employees and delight customers
- Shares new and compelling stories of companies that have transformed their performance by putting Net Promoter at the center of their business

The New York Times bestselling author of Reality-Based Leadership rejects the current fad of "engaging" employees and the emotional drama of "meeting their needs"--returning leadership to leaders and productivity to businesses. For years now, leaders in almost every industry have accepted two completely false assumptions--that change is hard, and that engagement drives results. Those beliefs have inspired expensive attempts to shield employees from change, involve them in high-level decision-making, and keep them happy with endless "satisfaction surveys" and workplace perks. But what these engagement programs actually do, Cy Wakeman says, is inflate expectations and sow unhappiness, leaving employees unprepared to adapt to even minor changes necessary to the organization's survival. Rather than driving performance and creating efficiencies, these programs fuel entitlement and drama, costing millions in time and profit. It is high time to reinvent leadership thinking. Stop worrying about your employees' happiness, and start worrying about their accountability. Cy Wakeman teaches you how to hire "emotionally inexpensive" people, solicit only the opinions you need, and promote self-awareness in your whole team. No Ego disposes with unproven HR maxims, and instead offers a complete plan to turn your office from a den of discontent to a happy, productive place.
