Auto Repair For Dummies

Bentley is a brand that is rich in history but forward thinking and innovative. This is the company that created a Le Mans winner and a state limousine in the same year. Their 200 mph vehicles contain the hand-stitching of fine leather and of high glossed veneers from 80-year-old trees; as well as the latest in-car technologies. For Bentley there is no contradiction between supreme luxury and sheer exhilaration. This was James Bond's first car, the record-setting ride of the Bentley Boys, the vision of founder W.O. Bentley-- "a fast car, a good car, the best in its class"-- and a vision that is still unfolding. Here is a grand tour through one of automotive's truly distinctive brands. easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

The Airbus A380 is the world's most recognised and most talked about airliner since the Boeing 747 and Concorde appeared in the skies in the late 1960s. Designed to challenge Boeing's monopoly in the large-aircraft market, it made its first flight in April 2005, entering commercial service two years later with Singapore Airlines. This jet has become so popular that every four minutes--24 hours a day, seven days a week--an A380 is taking off or landing somewhere in the world. There is no other development in recent aviation history to rival this remarkable aircraft.
