Catalog

When fossils of birds from China's Jehol region first appeared in scientific circles, the world took notice. These Mesozoic masterpieces are between 120 and 131 million years old and reveal incredible details that capture the diversity of ancient bird life. Paleontologists all over the world began to collaborate with Chinese colleagues as new and wondrous fossil-related discoveries became regular events. The pages of National Geographic and major scientific journals described the intricate views of feathers as well as food still visible in the guts of these ancient birds. Now, for the first time, a sweeping collection of the most interesting of Jehol's avian fossils is on display in this beautiful book. Birds of Stone makes visible the unexpected avian diversity that blanketed the earth just a short time (geologically speaking) after a dinosaur lineage gave rise to the first birds. Our visual journey through these fossils is guided by Luis M. Chiappe, a world expert on early birds, and Meng Qingjin, a leading figure in China's natural history museum community. Together, they help us understand the "meaning" of each fossil by providing straightforward narratives that accompany the full-page photographs of the Jehol discoveries. Anyone interested in the history of life—from paleontologists to inquisitive birders—will find Birds of Stone an irresistible feast for the eyes and mind.

Avian Medicine and Surgery

The Sacred Books of the Old Testament

The third edition succeeds the fifth update of second edition. One of the main features has been the adoption of new and revised international standards, notably the International Standard Identifier for Libraries and Related Organizations, the ISBN 13 and the linking ISSN. New fields have been added for recording the Persistent Record Identifier. Uniform Conventional Headings for Legal and Religious texts are now catered for with separate fields. A number of fields have been revised: archival materials, manuscripts and documentation produced by the ISSN International Centre.

Dictionary of the North-West Semitic Inscriptions (2 vols)

A cumulative list of works represented by Library of Congress printed cards.

Spinoza's Ethica from Manuscript to Print

The fourth edition of Donald Plumb's "Veterinary Drug Handbook" remains the resource every veterinarian needs within reach. This one-volume comprehensive coverage of the systemic drugs used in veterinary medicine and an extensive appendix makes it an essential tool.

The Text of New Testament

For the first time in one volume this book presents contributions to the textual criticism of the New Testament made over the past twenty years by Bart Ehrman, one of the premier textual scholars in North America. Including fifteen previously published articles and six lectures (delivered at Duke University and Yale University), this collection will be of vital importance to all students and scholars of the New Testament and early Christianity.

Saving a World Treasure: Protecting Florence from Flooding

Veterinary Drug Handbook

Oregon Fossils

Cave organisms are the 'monsters' of the underground world and studying them invariably raises interesting questions about the ways evolution has equipped them to survive in permanent darkness and low-energy environments. Undertaking ecological studies in caves and other subterranean habitats is not only challenging because they are difficult to access, but also because the domain is so different from what we know from the surface, with no plants at the base of food chains and with a nearly constant microclimate year-round. The research presented here answers key questions such as how a constant environment can produce the enormous biodiversity seen below ground, what adaptations and peculiarities allow subterranean organisms to thrive, and how they are affected by the constraints of their environment. This book is divided into six main parts, which address: the habitats of cave animals; their complex diversity; the environmental factors that support that diversity; individual case studies of cave ecosystems; and of the conservation challenges they face; all of which culminate in proposals for future research directions. Given its breadth of coverage, it offers an essential reference guide for graduate students and established researchers alike.

Ginzburg, "the preeminent Italian historian of his generation [who] helped create the genre of microhistory" ("New York Times"), ruminates on how perspective affects what we see and understand. 26 illustrations.

Dictionary of the Amharic Language

The Committee Firenze 2016, on the occasion of the 50th anniversary of the tragic 1966 flood, invited six engineers and scientists to form an International Technical Scientific Committee (ITSC) to assess the current status of flood protection for the city of Florence and identify steps to reduce the risk of flooding facing the city. In this final Report, ITSC concludes that Florence remains at risk to significant flooding and this risk grows each day. It is not a question of whether a flood of the magnitude of 1966 or greater will occur, but when. In fact, the level of protection that exists in Florence now is not on a level appropriate to the citizens and treasures that rest within the city. If, under current conditions, a 1966-like flood occurred, the consequences to human lives, treasures, properties and community infrastructure could be much more catastrophic than they were in 1966.

Libros Españoles en Venta 1993: vol. [3] : Materias

Since the first edition was published, there has been increasing public interest in birds. More people are keeping aviaries, bird watching is increasing in popularity, falconry has seen a considerable revival and conservation groups are encouraging captive breeding of wild species for restocking. Veterinarians continue to be consulted more frequently on avian problems and this book provides a basic, accessible guide to avian medical or surgical problems. The book has been substantially updated; much of the chapter on Aids to Diagnosis has been rewritten

and expanded, and the formulary and sections on infectious diseases have been updated. An additional chapter on anatomical and physiological diversity has been added to explain the many factors to be taken into account when the clinician is presented with an unfamiliar species.

The Devastated Vineyard

Marine Diesel Engines

This one volume contains all 12 volumes (90) essays of the original work. There is a linked table of contents to each of them. The Fundamentals: A Testimony To The Truth is a set of 90 essays published from 1910 to 1915 by the Bible Institute of Los Angeles. The essays were designed to affirm, among other things, conservative Protestant beliefs, especially those of the Reformed tradition, and defend against ideas deemed inimical to them. They are widely considered to be the foundation of modern Christian fundamentalism. The essays set out what was believed to be the fundamentals of Christian faith. The volumes defended orthodox Protestant beliefs and attacked higher criticism, liberal theology, Catholicism socialism, Modernism, atheism, Christian Science, Mormonism, Millennial Dawn, Spiritualism, and evolutionism. Listed here is just some of the essay. The Virgin Birth of Christ - James Orr The Deity of Christ - Benjamin B. Warfield The Purposes of the Incarnation - G. Campbell Morgan The Personality and Deity of the Holy Spirit - R. A. Torrey The Proof of the Living God - Arthur T. Pierson History of the Higher Criticism - Dyson Hague A Personal Testimony - Howard A. Arts & Humanities Citation Index

This section of the Handbook of Zoology is intended as a comprehensive and exhaustive account of the biology of the taxa Gastrotricha, Nematoda, Nematomorpha, Priapulida, Kinorhyncha, Loricifera, Gnathostomulida, Micrognathozoa, Rotifera, Seisonida and Acanthocephala, covering all relevant topics such as morphology, ecology, phylogeny and diversity. The series is intended to be a detailed and up-to-date account of these taxa. As was the case with the first edition, the Handbook is intended to serve as a reliable resource for decades. Many of the taxa of this volume are comparatively unknown to many biologists, despite their diversity and importance for example in meiofaunal communities (Gastrotricha, Rotifera, Gnathostomulida), their fascinating recent discoveries (Loricifera and Micrognathozoa), their importance as parasites (many nematodes, Nematomorpha, Acanthocephala) and their importance for evolutionary questions (e.g. Priapulida, Gastrotricha). The groups covered range from those poor in species (such as Micrognathozoa with 2 known species) to the species-rich and diverse Nematoda and their ca. 20.000 described species. While each taxon is covered by one chapter, nematodes are treated in several chapters dedicated to their structural, taxonomic and ecological diversity.

The National Union Catalogs, 1963-

Three Conquests of Canaan

This revised and expanded edition of Oregon Fossils includes a record of all known fossils in Oregon going back 400 million years, along with collecting localities by county, age, rock formation, and published source. The book also provides a

geologic overview of the state, from ocean beaches to the high desert, from the Blue Mountains to the Siskiyou. Unique among fossil field guides, Oregon Fossils includes both specimen identification and interesting notes about their discovery, naming, and conservation. The narrative is sprinkled with biographical sketches of paleontologists who have contributed to the state's fossil record, and the text is richly illustrated with photographs, line drawings, charts, and maps. A complete bibliography lists full citations to fossil material. The only single volume that provides Oregon's fossil record and history, Oregon Fossils is well-written, well-organized guide. It is an excellent reference for classroom and library use, for researchers, and for private collectors and hobbyists.

Ex Oriente Ad Danubium

The Travels of Sir John Mandeville is the chronicle of the alleged Sir John Mandeville, an explorer. His travels were first published in the late 14th century, and influenced many subsequent explorers such as Christopher Columbus.

Wooden Eyes

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

English Grammar and Analysis

An Analysis of the Laws of England

Learn about cruising catamaran virtues and vices. Read more historical information and actual facts and figures about production cruising catamarans and the industry that produces them. Peruse little publicized characteristics that inhibit the potential performance of these boats. Cruising in Catamarans provides a blueprint for realistic expectations and contains charts, diagrams and a unique methodology for assessing various boats. Learn the techniques of cruising catamaran sailing and handling. Learn when to reef, how to judge leeway; how to anchor light displacement boats including the techniques of bridling, how to take powerboat wakes, how to handle twin-screw cats. Learn about what characteristics are best

for safe pleasant voyaging and which ones to shun like the plague.

Studies in the Textual Criticism of the New Testament

The North-West Semitic epigraphic contributes considerably to our understanding of the Old Testament and of the Ugaritic texts and to our knowledge of the North-West Semitic languages as such. This dictionary is concerned with the North-West Semitic material found in inscriptions, papyri and ostraca in Phoenician, Punic, Hebrew, various forms of Aramaic, Ammonite, Edomite, the language of Deir Alla et cetera. The material covers the period from ca. 1000 B.C. to ca. 300 A.D. Besides translations the entries include discussions and full references to scholarly literature. The book is a translated, updated and considerably augmented edition of Jean & Hoftijzer, "Dictionnaire des inscriptions semitiques de l'ouest," The additions concern newly found texts as well as references to new scholarly literature. The book is an indispensable tool for research in North-West Semitic epigraphy, on the Old Testament and on Ugaritic texts, and for Semitic linguistics.
