Most Billiard instructional guides focus solely on the physical aspects of the game - the techniques, the shots, and the rules. Zen Pool teaches you all of these practical insights and skills, then goes one step further - showing you how to improve your total game by increasing your physical, mental, and spiritual awareness in the present moment. Many readers have described remarkable improvements after reading the lessons taught in this book - and many professional players have reported winning more tournaments. Zen Pool is your own private success coach: It will guide you to new levels of play and give you the knowledge you need to vastly improve your game. The wisdom and secrets herein have been distilled from a lifelong and fruit bearing quest, including study with, and of, many pool masters. So open Zen Pool, begin your journey, and let three-time national billiards champion Max Eberle awaken the master within you.

Borobudur

A coffee table book about a Lost Boy in search of Winnie Cooper, with a helping of tongue-in-cheek wit and sarcasm. An unparalleled view of pop-culture and relationships, filled with rich photography. From music industry professional SW Hammond comes a collection of provocative essays woven to create the misguided anti-love story of a young man learning about relationships through Axl Rose, Paris Hilton, and Taylor Swift. Raised on rock n' roll, Hammond blends an unparalleled view of pop culture and philosophy that plagues his irrational sense of women and what they want. From childhood

viewings of Full House leading to his lifelong hatred of John Stamos, his introduction to the Riot Grrrl movement and Kathleen Hanna, to a questionable infatuation with The O.C.'s Summer Roberts—all of your insatiable favorites are mixed with a reflective-Kevin-Arnold-like inner monolog and a bottle of Jack Daniels. The Mixtape Manifesto: A Pop Culture Confessional is filled with rich photography captured during Hammond's days on the road while working for Sony Music and Warped Tour, as well as bringing to life the music, movies, and television that has perpetuated his laughable neurotic angst. If you're ready to take a little mind trip, join in, you just may learn something about your life while reading about his.

With vivid photography and insightful commentary, this travel pictorial shines a light on the Buddhist art and architecture of Borobudur. The glorious ninth-century Buddhist stupa of Borobudur—the largest Buddhist monument in the world—stands in the midst of the lush Kedu Plain of Central Java in Indonesia, where it is visited annually by over a million people. Borobudur contains more than a thousand exquisitely carved relief panels extending along its many terraces for a total distance of more than a kilometer. These are arranged so as to take the visitor on a spiritual journey to enlightenment, and one ascends the monument past scenes depicting the world of desire, the life story of Buddha, and the heroic deeds of other enlightened beings—finally arriving at the great circular terraces at the top of the structure that symbolizes the formless world of pure knowledge and perfection.

The Kidnapping Club

In a rapidly changing New York, two forces battled for the city's soul: the pro-slavery New Yorkers who kept the illegal slave trade alive and well, and the abolitionists fighting for freedom. We often think of slavery as a southern phenomenon, far

removed from the booming cities of the North. But even though slavery had been outlawed in Gotham by the 1830s, Black New Yorkers were not safe. Not only was the city built on the backs of slaves; it was essential in keeping slavery and the slave trade alive. In *The Kidnapping Club*, historian Jonathan Daniel Wells tells the story of the powerful network of judges, lawyers, and police officers who circumvented anti-slavery laws by sanctioning the kidnapping of free and fugitive African Americans. Nicknamed "The New York Kidnapping Club," the group had the tacit support of institutions from Wall Street to Tammany Hall whose wealth depended on the Southern slave and cotton trade. But a small cohort of abolitionists, including Black journalist David Ruggles, organized tirelessly for the rights of Black New Yorkers, often risking their lives in the process. Taking readers into the bustling streets and ports of America's great Northern metropolis, *The Kidnapping Club* is a dramatic account of the ties between slavery and capitalism, the deeply corrupt roots of policing, and the strength of Black activism.

Handbook of Electrical Installation Practice covers all key aspects of industrial, commercial and domestic installations and draws on the expertise of a wide range of industrial experts. Chapters are devoted to topics such as wiring cables, mains and submains cables and distribution in buildings, as well as power supplies, transformers, switchgear, and electricity on construction sites. Standards and codes of practice, as well as safety, are also included. Since the Third Edition was published, there have been many developments in technology and standards. The revolution in electronic microtechnology has made it possible to introduce more complex technologies in protective equipment and control systems, and these have been addressed in the new edition. Developments in lighting design continue, and extra-low voltage luminaires for display and feature illumination are now dealt with, as is the important subject of security lighting. All chapters have been amended to take account of revisions to British and other standards, following the trend to harmonised European and international standards, and they also take account of the latest edition of the Wiring Regulations. This new edition will provide an invaluable reference for consulting engineers, electrical contractors and factory plant engineers.

How to Diagnose and Fix Everything Electronic, Second Edition

The goal of the manual is to supply an operational tool for pedologists, agronomists, environmentalists, and all of the other specialists who carry out land evaluation for agriculture and forestry or, more generally, stakeholders and policy makers who make decisions at the local level based on the knowledge of the nature of soil. Discussion of the topics is not only technical and operational, but also in-depth and didactic; therefore, the text may also be used as a valid complement for students majoring in subjects that involve soil use, management and conservation. The literature offers a wide choice of possible soil and land evaluation methods, while knowledge of the relationships existing between the physical characteristics of lands, particularly those of soils, and the requirements of specific uses is limited.

The Right Toys

Inspired by a voracious curiosity about humans and other subjects, the poems in Heather Christle's What Is Amazing describe and invent worlds in an attempt to understand through participation. The book draws upon the wisdom of foolishness and the logic of glee, while simultaneously exploring the suffering inherent to embodied consciousness. Speakers play out moments of bravado and fear, love and mortality, disappointment and desire. They socialize incorrigibly with lakes, lovers, fire, and readers, reasoning their way to unreasonable conclusions. These poems try to understand how it is that we come to recognize and differentiate objects and beings, how wholly each is attached to its name, and which space reveals them. What Is Amazing delights in fully inhabiting its varied forms and voices, singing worlds that often coincide with our own.

YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

Taking another lesson from nature, the latest advances in image processing technology seek to combine image data from several diverse types of sensors in order to obtain a more accurate view of the scene: very much the same as we rely on our five senses. *Multi-Sensor Image Fusion and Its Applications* is the first text dedicated to the theory and practice of the registration and fusion of image data, covering such approaches as statistical methods, color-related techniques, model-based methods, and visual information display strategies. After a review of state-of-the-art image fusion techniques, the book provides an overview of fusion algorithms and fusion performance evaluation. The following chapters explore recent progress and practical applications of the proposed techniques to solving problems in such areas as medical diagnosis, surveillance and biometric systems, remote sensing, nondestructive evaluation, blurred image restoration, and image quality assessment. Recognized leaders from industry and academia contribute the chapters, reflecting the latest research trends and providing useful algorithms to aid implementation. Supplying a 28-page full-color insert, *Multi-Sensor Image Fusion and Its Applications* clearly demonstrates the benefits and possibilities of this revolutionary development. It provides a solid knowledge base for applying these cutting-edge techniques to new challenges and creating future advances.

James Alexander, Ph.D., joined the U.S. Navy in 1947 at the age of 17, a 10th-grade high school dropout, and advanced through the ranks to become a chief warrant officer. The navy served as a cocoon that allowed him to mature, gain an education, learn leadership skills, and develop social graces. The story is told with the banter, sea stories, and salty language typical of the era. Alexander is Dean Emeritus of the Meinders School of Business at Oklahoma City University, and is the author of 31 books.
