Since writing her international bestseller *Change Your Questions, Change Your Life*, Marilee Adams has increasingly been responding to speaking and consulting requests from educators. Drawing on what she has learned from these experiences she presents the ultimate guide for teachers looking to change the lives of their students while significantly improving their own lives in the process. Adams weaves a compelling story of one teacher's lasting impact on a student to demonstrate how educators can practice and pass on what she calls the Learner Mindset - consistently asking the kind of open-minded, creative, positive questions that encourage curiosity and growth. She contrasts this with the Judger mindset - negative, close-minded, and limiting - that we all too easily succumb to, particularly under pressure - and, as she shows, teachers today are under enormous pressure. Complete with a field-ready workbook that brings Adams' tools for cultivating a Learner mindset directly into the classroom, this book will help teachers become more resilient and better able to nurture a lifelong love of learning in even their most hard-to-reach students.

What's a king to do? King Pig is grand ruler of the sheep. He can make them do whatever he wants (clean his castle), whenever he wants (the middle of the night). But for some reason, he can't seem to make them like him. Until he has a brilliant idea! King Pig marches all the sheep into his castle and sets

them to work dyeing, cutting and knitting their wool into a pile of fancy new clothes. He prances out in his spectacular, intricate, rainbow-bright fashions expecting applause and adulation, but . . . NOTHING! The sheep are so preoccupied with themselves (could it be that they're naked and cold without their wool?) that they don't even notice him! What's a king to do? When King Pig finally thinks of a way to make amends, it may not be perfect -- but it's a pretty good start. Nick Bland's playful, wonderfully humorous illustrations will leave kids and parents grinning, even as they share an important lesson about treating others the way they would like to be treated.

won't give up on them. Cal is not the readin' type. Living way high up in the Appalachian Mountains, he'd rather help Pap plow or go out after wandering sheep than try some book learning. Nope. Cal does not want to sit stoney-still reading some chicken scratch. But that Book Woman keeps coming just the same. She comes in the rain. She comes in the snow. She comes right up the side of the mountain, and Cal knows that's not easy riding. And all just to lend his sister some books. Why, that woman must be plain foolish—or is she braver than he ever thought? That Book Woman is a rare and moving tale that honors a special part of American history—the Pack Horse Librarians, who helped untold numbers of children see the stories amid the chicken scratch, and thus made them into lifetime readers.

With the growth of genetically modified foods, the use of many seeds is dwindling—of 80,000 edible plants, only about 150 are being cultivated. With a global cast of men and women, scientists and laypeople, and photographic documentation, Nancy Castaldo chronicles where our food comes from, and more importantly, where it is going as she digs deeper into the importance of seeds in our world. This empowering book also calls young adult readers to action with suggestions as to how they can preserve the variety of one of our most valuable food sources

through simple everyday actions. Readers of Michael Pollen will enjoy the depth and fascinatingly intricate social economy of seeds.

A teacher presents a lesson, and at the end asks students if they understand the material. The students nod and say they get it. Later, the teacher is dismayed when many of the students fail a test on the material. Why aren't students getting it? And, just as important, why didn't the teacher recognize the problem? In *Checking for Understanding*, Douglas Fisher and Nancy Frey show how to increase students' understanding with the help of creative formative assessments. When used regularly, formative assessments enable every teacher to determine what students know and what they still need to learn. Fisher and Frey explore a variety of engaging activities that check for and increase understanding, including interactive writing, portfolios, multimedia presentations, audience response systems, and much more. This new 2nd edition of *Checking for Understanding* has been updated to reflect the latest thinking in formative assessment and to show how the concepts apply in the context of Fisher and Frey's work on gradual release of responsibility, guided instruction, formative assessment systems, data analysis, and quality instruction. Douglas Fisher and Nancy Frey are the creators of the Framework for Intentional and Targeted (FIT) Teaching™.
