How does a suburban pizza joint end up profiled on national magazine covers and network TV news? (Hint: The secret is not in the sauce.) When Nick Sarillo decided to open a family-friendly pizza restaurant in the suburbs of Chicago, people thought he was nuts. Having worked as a carpenter for much of his adult life, he lacked any formal experience in restaurants or in managing a small business. Everyone told him no one else would ever care about his place the way he did. They warned he'd have to work 20-hour-days and monitor every employee just to stay in business. But Sarillo saw things differently, and set out to run his business in a radically different way. Today Nick's Pizza & Pub is one of the top ten busiest independent pizza restaurants in the country, with two locations that gross about six times the revenue of the typical pizza restaurant. And in an industry where most employees leave within less than a year, Nick's annual turnover rate is less than 20 percent. How did he do it? The secret lies in Nick's purpose-driven culture, in which every employee—from the waiters to the chefs to the managers—is equipped with the tools necessary to do their jobs while also advancing the company's overall mission. The result is higher sales, a dedicated team, and a big little business that is beloved by the entire community. In *A Slice of the Pie* Sarillo tells the story of how he built his extraordinary culture and shows how anyone can follow his methods. For instance, Nick's managers engage the staff by tracking and rewarding unusual metrics, such as how many guests request a particular server or the average check amount of each carryout host. Likewise, team members of all ages and levels of experience are encouraged to express themselves, acquire new

skills, and suggest ideas to help the business grow. A Slice of the Pie will help transform even the smallest, simplest, and most ordinary business into a successful, high-performance organization.

This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored . The first part starts from the “old” growth theory and bridges to the “new” growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

There are many things that you may have put up with, endured, allowed, and permitted that God never ordained. Matthew 16:19 says, I will give you the keys of the kingdom of heaven, and whatsoever you bind, that is, declare to be improper and unlawful on earth must be already bound in heaven; and whatsoever you loose on earth, declare lawful, must be what is already loosed in heaven. (Amplified) Wrong relationships can cause these same curses that we have been delivered from to be ushered right back into our lives. Surround yourself with people who will come into agreement with you and celebrate you. We need also to weed out the users and abusers of our finances. Either people who have used you will repent, and try to make it right with you or throw a tantrum, give you a hard-luck story and go right back to usury. You cannot continue to remain in situations that causes you to compromise your integrity, your calling, and put into jeopardy your divine destiny in life. What is Satan using as a bargaining tool in order to gain entrance into your life? Is he using money to gain entrance? Sex? Is he promising you fame? Don't negotiate with him, because you will always lose playing games with the devil. The people who will celebrate you are those who are ordained to be a part of your life and ministry! No one who is invited to your celebration is sad or jealous because you are being blessed. Everyone at your celebration party has brought you a gift, and no one is empty handed. "How to Walk in Manifestation" is a powerful revelation that will change the course of your life.

This book has been developed from its earlier and far less formal presentment as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methylations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section

D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

In two volumes, the APA Handbook of Clinical Geropsychology offers a well-balanced scientist-practitioner approach, with chapters that succinctly review empirical research across a broad range of areas and offer practical approaches for the application of theory to everyday practice with the aging population. The handbook reviews the history of clinical geropsychology and geropsychology practice, to help the reader better understand how the field has grown over the past 30 plus years and to assess the several directions in which it is headed. Chapter authors highlight strength-based approaches to human development and aging, review the status of evidence-based treatment, explore the interface of geriatric medicine and clinical psychotherapy, review several "normal aging" areas of research, and discuss such common psychological, neurological, and other medical issues common in aging as depression, late-life anxiety disorders, schizophrenia, alcohol abuse and substance misuse, suicidal behaviour, mild cognitive impairment, Alzheimer's, and many more. The reader will not only gain knowledge about foundational competencies in the field of clinical geropsychology, but will also find a treasure of information related to assessment, intervention, and consultation in this continually evolving field.

What exactly is goodness? Where is it found in the literary imagination? Toni Morrison, one of American letters' greatest voices, pondered these perplexing questions in her celebrated Ingersoll Lecture, delivered at Harvard University in 2012 and published now for the first time. Perhaps because it is overshadowed by the more easily defined evil, goodness often escapes our attention. Recalling many literary examples, from Ahab to Coetzee's Michael K, Morrison seeks the essence of goodness and ponders its significant place in her writing. She considers the concept in relation to unforgettable characters from her own works of fiction and arrives at conclusions that are both eloquent and edifying. In a lively interview conducted for this book, Morrison further elaborates on her lecture's ideas, discussing goodness not only in literature but in society and history—particularly black history, which has responded to centuries of brutality with profound creativity. Morrison's essay is followed by a series of responses by scholars in the fields of religion, ethics, history, and literature to her thoughts on goodness and evil, mercy and love, racism and self-destruction, language and liberation, together with close examination of literary and theoretical expressions from her works. Each of these contributions, written by a scholar of religion, considers the legacy of slavery and how it continues to shape our memories, our complicities, our outcries, our lives, our communities, our literature, and our faith. In addition, the contributors engage the religious orientation in Morrison's novels so that readers

who encounter her many memorable characters such as Sula, Beloved, or Frank Money will learn and appreciate how Morrison's notions of goodness and mercy also reflect her understanding of the sacred and the human spirit.
